# RENNOVA HEALTH ISSUES LETTER TO STOCKHOLDERS

WEST PALM BEACH, FL -- (Marketwired) -- 08/28/17 -- **Rennova Health, Inc.** (NASDAQ: RNVA) (NASDAQ: RNVAZ) ("Rennova" or the "Company") today announced that Seamus Lagan, chief executive officer, has issued a letter to stockholders. The text is below.

August 28, 2017

To My Fellow Stockholders:

I would like to take this opportunity to update you on our activities and progress, and to share with you some insights into our Company's direction through 2018. Importantly, by the end of 2017 we expect to have our corporate and business restructuring process complete!

On August 8, 2017, Big South Fork Medical Center, our hospital in Tennessee, opened its doors and marked the start of a new journey for Rennova, one where we will be providing needed services with less reliance on sales efforts and the associated costs. This hospital historically was profitable, with revenue of approximately \$12 million in its last year of operation. To date Rennova has invested approximately \$5 million in this project. Already patient visits are exceeding our expectations. We are looking to expand our hospital operations with the possible acquisition of other similar rural healthcare facilities and physician practices in adjacent areas.

The previously reported dramatic disruption in the toxicology diagnostics sector, which had been the Company's primary business focus, forced many competitors out of the market. As a result of cost cutting and consolidation, Rennova is now exceptionally well positioned to see our innovative business model, stance on compliance and focused sales efforts once again deliver growth and results.

Over the past 18 months we have faced many challenges, all of which have been surmounted with persistence and confidence. The decrease in revenue and cash generation has required us to raise capital through the sale of equity securities to meet the needs of the business. We completed two public offerings in 2016 and have raised approximately \$13 million in 2017. We expect that our business will continue to secure the necessary capital to complete the turnaround and final parts of our restructuring plan.

As of June 30, 2017, our balance sheet had negative stockholders' equity of approximately \$17 million, compared with negative \$65 million as of March 31, 2017. This improvement is due in large part to changes in accounting practices for derivative liabilities, which are fully explained in our June 30, 2017 Form 10-Q filing with the Securities and Exchange Commission. Additionally, there were significant conversions of debt by existing debenture holders.

As we have previously informed you, as part of our plan to regain compliance with NASDAQ's stockholders' equity continued-listing requirement, in the near future Rennova intends to spin-off to its stockholders our genetic testing division, Advanced Molecular Services Group, Inc. (AMSG), and our IT and Software division, Health Technology Solutions, Inc. (HTS). To date we have invested more than \$20 million in these businesses. Rennova's Board has decided to spin-off these businesses directly to our stockholders in anticipation that the market will better appreciate the focused business plan and management of each division separately, while allowing Rennova to focus on its core competencies. In addition, we expect that we will be able to recognize our investment in these businesses as equity on our balance sheet, further reducing and largely curing the net equity deficiency and meeting the stockholders' equity requirement of NASDAQ.

The opportunity for AMSG to grow pharmacogenomics testing and expand into oncology diagnostics -- combining technology and informatics to provide meaningful interpretation of results while at the same time launching a mobile app-based platform to facilitate many exciting products in this space -- is significant.

HTS has a well-established suite of software products and medical billing services that we believe can be grown from initial revenues into meaningful and profitable revenues within 12 to 18 months.

We look forward to our stockholders benefiting from improved stockholders' equity in Rennova Health and enjoying direct ownership of shares in these divisions after the spin-off. We anticipate the spin-off process for both divisions will be completed in the coming months. We are excited about the opportunity to leverage the investment and products we have developed to date, and to grow revenue in these independent companies.

I would like to personally thank the board and all our stockholders for their continued support during this transition period.

Sincerely,

Seamus Lagan

Chief Executive Officer  
Rennova Health, Inc.
