

Company Overview

BioXcel Therapeutics, Inc. is a clinical stage biopharmaceutical company focused on drug development that utilizes novel artificial intelligence to identify the next wave of medicines across neuroscience and immunoncology. The company's drug re-innovation approach leverages existing approved drugs and/or clinically validated product candidates together with big data and proprietary machine learning algorithms to identify new therapeutic indices. The company's two most advanced clinical development programs are BXCL501, a sublingual thin film formulation designed for acute treatment of agitation resulting from neurological and psychiatric disorders, and BXCL701, an immunoncology agent designed for treatment of a rare form of prostate cancer and for treatment of pancreatic cancer.

BioXcel Therapeutics Forms Neuroscience Clinical Advisory Board to Support Global Development of BXCL501
