Cleveland-Cliffs Acquires Minority Partner's Interest in United Taconite

Purchase Provides Cliffs 100% Ownership of Minnesota Mining Operation

CLEVELAND--(BUSINESS WIRE)--

Cleveland-Cliffs Inc (NYSE: CLF) today announced that it has acquired United Mining Co. Ltd.'s 30% interest in United Taconite (UTAC), an iron ore mining and pelletizing operation located in Eveleth, Minn. Cliffs previously owned a 70% interest in the joint venture and after completing the purchase now has 100% ownership.

Consideration will be a mix of cash, stock and iron ore pellets. The total includes \$100 million in cash and 1,529,619 Cleveland-Cliffs common shares. In addition, the transaction includes a provision to supply 1.2 million tons of iron ore pellets over the next five quarters at no cost.

Joseph Carrabba, Cliffs' chairman, president and chief executive officer, commented: "Strategically, the consolidation of the UTAC minority interest strengthens our core North American Iron Ore business, and together with our Northshore property, gives Cliffs two wholly-owned iron ore assets in North America. Moreover, as Cliffs currently manages the operation, there is no integration risk associated with the transaction."

The acquisition does not require regulatory approval and has an effective close date of June 30, 2008. United Taconite is expected to produce 5.2 million tons in 2008 and at Dec. 31, 2007 had proven reserves of 133 million tons. As a result of this transaction, as well as the recently announced expansion project at the Company's Michigan mines, Cliffs' total North American Iron Ore equity pellet production will increase to 23 million tons in 2008 and over 24 million tons in 2009.

Cleveland-Cliffs Inc, headquartered in Cleveland, Ohio, is an international mining company, the largest producer of iron ore pellets in North America and a major supplier of metallurgical coal to the global steelmaking industry. The Company operates six iron ore mines in Michigan, Minnesota and Eastern Canada, and three coking coal mines in West Virginia and Alabama. Cliffs also owns 85% of Portman Limited, a large iron ore mining company in Australia, serving the Asian iron ore markets with direct-shipping fines and lump ore. In addition, the Company has a 30% interest in the Amapa Project, a Brazilian iron ore project, and a 45% economic interest in the Sonoma Project, an Australian coking and thermal coal project.

This news release contains predictive statements that are intended to be made as "forward-looking" within the safe harbor protections of the Private Securities Litigation Reform Act of 1995. Although the Company believes that its forward-looking statements are based on reasonable assumptions, such statements are subject to risk and uncertainties.

Actual results may differ materially from such statements for a variety of reasons, including: changes in the sales mix; the impact of other price-adjustment factors on the Company's North American sales contracts; changes in demand for iron ore pellets by North American integrated steel producers, or changes in Asian iron ore demand due to changes in steel utilization rates, operational factors, electric furnace production or imports into the United States and Canada of semi-finished steel or pig iron; the impact of consolidation and rationalization in the steel industry; availability of capital equipment and component parts; availability of float capacity on the Great Lakes; changes in the financial condition of the Company's partners and/or customers; rejection of major contracts and/or venture agreements by customers and/or participants under provisions of the U.S. Bankruptcy Code or similar statutes in other countries; events or circumstances that could impair or adversely impact the viability of a mine and the carrying value of associated assets; inability to achieve expected production levels; reductions in current resource estimates; failure to receive or maintain required environmental permits; problems with productivity, labor disputes, weather conditions, fluctuations in ore grade, tons mined, changes in cost factors including energy costs, transportation, mine closure obligations and employee benefit costs; the ability to identify, acquire and integrate strategic acquisition candidates and the effect of these various risks on the Company's future cash flows, debt levels, liquidity and financial position.

Reference is also made to the detailed explanation of the many factors and risks that may cause such predictive statements to turn out differently, set forth in the Company's Annual Report and Reports on Form 10-K and previous news releases filed with the Securities and Exchange Commission, which are publicly available on Cleveland-Cliffs' website. The information contained in this document speaks as of the date of this news release and may be superseded by subsequent events.
