“The completion of Q1 constitutes a positive operational inflection point for our business as we have quickly made our Multiscreen-as-a-Service (MaaS) platform vision become reality across a number of key fronts,” said Alan S. Knitowski, President, CEO and Co-Founder of Phunware. “Not only have we commenced the full roll out of our blockchain-enabled Mobile Loyalty Ecosystem specific to PhunToken, PhunCoin and PhunWallet as promised, but we have also executed a global distribution agreement with an anchor distribution partner that will be formally announced in the next several weeks. While we continue to work through what appears to be the final stages of the Covid pandemic operationally, we are both excited and comforted by the dramatic increase in business activity across all aspects of our software product and solution offerings for mobile, big data and the cloud. Importantly, these encompass all three of our core growth engines rolling forward, including our MaaS cloud, our data-driven loyalty marketplace and our secure, blockchain-enabled token, coin and wallet capabilities.”

## Non-GAAP Financial Measures and Reconciliation

Our non-GAAP financial measures include adjusted gross profit, adjusted gross margin and adjusted earnings before interest, taxes, depreciation and amortization ("EBITDA") (our "non-GAAP financial measures"). Our non-GAAP financial measures should be considered in addition to, not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. They are not measurements of our financial performance under GAAP and should not be considered as alternatives to revenue or net loss, as applicable, or any other performance measures derived in accordance with GAAP and may not be comparable to other similarly titled measures of other businesses. Our non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our operating results as reported under GAAP. Some of these limitations include: (i) Non-cash compensation is and will remain a key element of our overall long-term incentive compensation package, although we exclude it as an expense when evaluating its ongoing operating performance for a particular period, (ii) Our non-GAAP financial measures do not reflect the impact of certain charges resulting from matters we consider not to be indicative of ongoing operations, and (iii) other companies in our industry may calculate our non-GAAP financial measures differently than we do, limiting their usefulness as comparative measures.

We compensate for these limitations to our non-GAAP financial measures by relying primarily on our GAAP results and using our non-GAAP financial measures only for supplemental purposes. Our non-GAAP financial measures include adjustments for items that may not occur in future periods. However, we believe these adjustments are appropriate because the amounts recognized can vary significantly from period to period, do not directly relate to the ongoing operations of our business and complicate comparisons of our internal operating results and operating results of other peer companies over time. Each of the normal recurring adjustments and other adjustments described in this paragraph help management with a measure of our operating performance over time by removing items that

are not related to day-to-day operations or are non-cash expenses.
