“Our second quarter was a pivotal one for focusing on the military and defense markets, domestically and globally,” said Red Cat CEO Jeff Thompson. “In October, we received our first purchase order from U.S. Customs and Border Protection for more than \$1 million as part of a previously-announced blanket purchase agreement (BPA) worth an estimated \$90 million. We expect to ship this order in January 2023. These drones will be the first to come off the production line from our new U.S. factory in Salt Lake City, which has the capacity to build thousands of drones. We are also pleased to report that the U.S. Army’s Short Range Reconnaissance Tranche 2 (SRR T2) program continues to expand in scope and value. Teal is working closely with the U.S. Army and will demonstrate the Teal Tranche 2 alpha prototype drone in January 2023.”

“We are pleased to report year-to-date revenue growth of more than 40%,” stated Joseph Heron, Chief Financial Officer. “The divestiture of our Consumer business will generate a solid return on our investment and strongly position us to take advantage of greater sales opportunities in the commercial sector, especially with the military.”
