Business Segment: ELECTRONICS

**MACDERMID ALPHA ELECTRONICS SOLUTIONS SHANGHAI GDAC CENTER AWARDED
ADVANCE TECH CENTER CERTIFICATE**

(Waterbury, CT USA) - The Global Development Application Center (GDAC) Shanghai facility of MacDermid Alpha Electronics Solutions was certified as a “Shanghai Fengxian District Advanced Technology Development Center” by the Shanghai City Government in November 2018. This certificate is only awarded to select few companies who meet the Shanghai City Government’s advanced technology center criteria such as market and innovation leadership in the industry, meeting the Shanghai Fengxian district’s advanced manufacturing policy, and the facility’s capability for innovative production creation and knowledge management.

The MacDermid Alpha Electronics Solutions GDAC in Shanghai is part of a global technical center network for developing product applications, testing, and supporting commercialization chemical solutions to facilitate customers’ technology and process development. The certificate is indicative of the company’s commitment to serve its customers with highly trained technical expertise, advanced analytical capabilities, and process knowledge to tackle ever changing market demands and manufacturing challenges.

Since its opening, the Shanghai facility has filed 25+ patents while continuously investing in enhancing its technical capabilities. These capabilities and more make MacDermid Alpha Electronics Solutions a highly desired partner to help electronics manufacturers tackle advanced product and technology development hurdles.
