Imaging Like You've Never Seen Before

Weekly IR Round-Up - Noteworthy News

#ICYMI (In Case You Missed It)

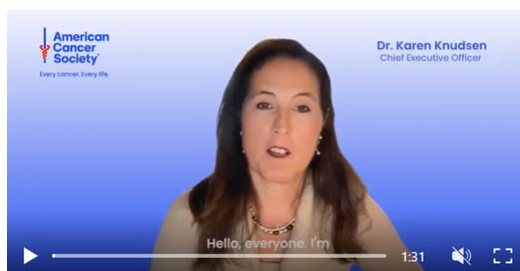

- Perimeter Medical Imaging AI (TSXV:PINK) was highlighted in the latest issue of [NOC Magazine](#), which covers latest news around artificial intelligence (AI) and its use in medical devices. This article recognizes Perimeter as an innovative AI-enabled medical device company and focuses on our ongoing clinical trial investigating AI + OCT in breast-conserving surgery.

"AI Leading the Next Paradigm for Medical Devices" by Mikela Mero

Cancer Facts & Figures 2024

- The American Cancer Society released its [Cancer Facts & Figures 2024 Report](#) with data detailing the current cancer burden in the US, progress that's been made, and what preventive steps you can take to help reduce your cancer risk.

Cancer diagnoses are on the rise, with a prediction of 2 million new cases in the U.S. this year, including two of the most common cancers: breast and prostate. This staggering statistic speaks to the importance

of early detection and giving all cancer patients access to the treatment they need.
