

Weekly IR Round-Up - Noteworthy News

#ICYMI (In Case You Missed It)

- This week, Perimeter Medical Imaging AI (TSXV:PINK) announced a follow-on commercial placement of its S-Series OCT system at a new hospital site within one of the largest healthcare networks in North Texas, part of a major national healthcare system.

Voice of the Surgeon

Surgeons often lack the tools they need to visualize margins in the OR. [Listen to Dr. Michele Carpenter](#), who adopted Perimeter's imaging technology in her OR.

"We, as surgeons, are visual people. We would all love to have a histology slide at the time of surgery, but that just doesn't happen. So I think that this is the closest that we're going to get right now."
