Weekly IR Round-Up

Perimeter Showcases S-Series at #SSO 2024!

Today marked a successful Day 2 for the Perimeter team attending the Society of Surgical Oncology (SSO) [International Conference on Surgical Cancer Care](#) taking place in Atlanta, GA!

Our exhibit space hub has been set up to provide surgeons with demos on how our margin imaging technology can help them make patient-specific, targeted decisions at the point of care. See us in action by clicking the brief video below:

#ICYMI (In Case You Missed It)

Researchers based at The University of Texas Health Science Center and The University of Texas MD Anderson Cancer Center recently published a [peer-reviewed study](#) on reoperation rates and incremental healthcare costs associated with patients who require reoperations after undergoing breast-conserving surgery (BCS). The authors concluded that more attention and continuing efforts should be made to reduce reoperation rates.

Free access to the full article is now available [here](#).

The results of our study demonstrate that high reoperation rates after breast-conserving surgery persist and are correlated with elevated risks and adverse outcomes.

Anthony Lucci, MD

Professor of Breast Surgical Oncology,
University of Texas MD Anderson Cancer Center
