Imaging Like You've Never Seen Before

Weekly IR Round-Up

Connecting with the Customer

Perimeter is looking forward to attending the [2024 American Society of Breast Surgeons Annual Meeting](#). We are showcasing our technology alongside the top companies in the breast oncology space, providing us with an opportunity to network with 1,700 medical professionals from the U.S. and 27 countries.

We believe combining a surgeon's clinical expertise with OCT technology can provide margin insights real-time during surgeries, which gives them clarity to act in the moment and close with confidence.

Younger DCIS Patients Included in High Rates of Reoperations for Breast-Conserving Surgery

The data coming out of the [peer-reviewed study](#) conducted at The University of Texas MD Anderson Cancer Center puts a fine point on high national rates of reoperations for breast-conserving surgery, which is especially notable for younger DCIS patients aged 18 to 44.

The results emphasize the need for better, more advanced margin assessment tools in the OR.
