

PERIMETER

Imaging Like You've Never Seen Before

Weekly IR Round-Up

Accelerating the Learning Curve for Customers

Click on the video below and take a look at this OCT image of a lumpectomy margin. Do you notice the circular shaped feature traveling through the fibrous tissue? That's a suspicious duct, which correlated to the post-op pathology report confirming Ductal carcinoma in situ, or DCIS, at the margin.

The S-Series OCT device is indicated for use as an imaging tool in the evaluation of excised human tissue microstructure, by providing two-dimensional, cross-sectional, real-time depth visualization, with image review manipulation software for identifying and annotating regions of interest.

The S-Series OCT has 510(k) clearance under [redacted] indication and has not been evaluated by FDA specifically for use in breast tissue [redacted] other types of cancer, margin evaluation, and reducing re-excision rates.

For more information on unapproved/ [redacted] visit perimetermed.com/disclosures.

Data provided by Norman Keith Sugg, MD
Novant Health Medical Park, NC
IRB # 00002644

Typically, we find that the learning curve for surgeons and clinicians is relatively fast, supported by image interpretation training, an exclusive Imaging Atlas reference library with pathology-verified tissue structure correlations, as well as "in-OR" support from Perimeter's field-based [Clinical Education team](#).

The Patient Journey

We understand that every patient's treatment and healing journey is unique as they move beyond surgery and get back to doing things they love.

Listen to Nadia as she shares her journey with breast cancer and infertility, as well as her treatment plan that included Perimeter's technology:

AI Webinar Series

Did you tune into our recent [AI webinar](#) featuring a discussion with Perimeter Board member, Anantha Kancherla (former head of Meta's AI platform) and Perimeter's CEO, Adrian Mendes? [Let us know if you have any follow-up questions or other AI topics of interest](#), and we will integrate them into future AI webinars in the series!
