

PERIMETER

Imaging Like You've Never Seen Before

Weekly IR Round-Up

Inspired by Our Surgeon Champions!

Beth DuPree, MD, FACS, ABOIM has been an early and passionate advocate of using Perimeter's innovative technology as a tool to visualize margins with ultra-high-definition imagery. Dr. DuPree has shared her experiences in her own OR using Perimeter S-Series OCT in a series of brief instructional videos to help other breast surgeons.

The first video highlights how readily Perimeter's OCT fits into her surgical workflow as an adjunct to specimen X-ray and pathology, and it's portable so it can be easily moved into any OR.

The Patient Journey

Every patient journey is unique. Rather than a "one-size-fits-all" approach that could potentially result in removal of more tissue than is needed, Perimeter aims to provide surgeons with a technology that allows them to visualize margins "real-time" in their OR and customize patient care.

Listen to Mary describe her breast cancer diagnosis and involvement in a clinical trial using Perimeter's technology.

Perimeter S-Series OCT has 510(k) clearance under a general indication and has not been evaluated by the U.S. FDA specifically for use in breast tissue, breast cancer, other types of cancer, margin evaluation, and reducing re-excision rates. The safety and effectiveness of these uses has not been established. For more information, please visit www.perimetermed.com/disclosures.
