Exodus Partners with Ledger to Integrate XO Swap into Ledger Live

Exodus integrates XO Swap into Ledger Live, offering users enhanced security and control for direct crypto swaps from their self-custody wallets

OMAHA, Neb., Sept. 17, 2024 (GLOBE NEWSWIRE) -- Exodus Movement, Inc. (OTCQX: EXOD) (the "Company" or "Exodus") is excited to announce its partnership with Ledger, the world leader in Digital Asset security for consumers and enterprises. This partnership introduces XO Swap, Exodus's premium crypto swap aggregator, to Ledger Live™, allowing users to perform crypto swaps directly from their self-custody wallets.

Currently available on the desktop version of Ledger Live™, XO Swap offers connectivity to third-party exchange API providers, enabling swaps across thousands of crypto pairs. This integration prioritizes user control and security, distinguishing it from centralized exchange platforms. A mobile version is anticipated to follow.

"We are thrilled to integrate XO Swap with Ledger Live™, combining our powerful swap aggregator with one of the most secure hardware wallets available today," said JP Richardson, CEO of Exodus. "This partnership is a significant milestone for us, empowering both new and existing consumers to manage their cryptocurrency in a secure and easy way."

XO Swap enables users to retain control over their crypto transactions. Swaps occur as on-chain transactions that are transparent and secure. Users' swaps are aggregated through multiple third-party API swap providers ensuring fast completion times and low costs. The swapped cryptocurrency is then delivered directly to the user's Ledger wallet.

"Ledger and Exodus are committed to giving a secure, seamless, and intuitive way to swap from our secure devices. The XO Swap integration gives Ledger users another way to swap their crypto with confidence," says Pascal Gauthier, CEO of Ledger. "Our collaboration with Exodus represents our mission to deliver more choice to users and aims to enhance user autonomy."

Exodus and Ledger are committed to continually driving innovation and improving the multichain experience for all users.
