Capstone Green Energy Selected by Leading Frozen Mexican Food Producer for C800S Microturbine Energy Solution

Turnkey 800kW Installation Delivers Reliable Electrical and Thermal Energy to Increase Efficiency and Reduce Pollutant Emissions

LOS ANGELES--(BUSINESS WIRE)-- [Capstone Green Energy Holdings, Inc.](#) (the "Company" or "Capstone") (OTCQX: CGEH), together with its subsidiaries, a leading provider of clean technology solutions using ultra-low-emission microturbine energy systems, today announced a significant project win with a premier producer of premium frozen Mexican foods. The company, recognized for its high-quality, pepper-focused product line distributed across Mexico and the United States, has selected the Capstone C800S microturbine to support its growing thermal-intensive manufacturing operations.

The client was seeking a reliable and efficient solution to meet rising energy demands and sustainability goals. The project will leverage the Capstone microturbine's clean exhaust heat in a Combined Heat and Power (CHP) application. This thermal energy will be used to preheat water for its boilers and to deliver consistent thermal energy for cooking processes, both mission-critical elements of its production workflow.

By integrating the C800S, the client aims to significantly reduce energy costs, lower pollutant emissions, and strengthen overall operational reliability.

The adoption of Capstone's microturbine technology underscores the customer's commitment to efficient, environmentally responsible manufacturing, while ensuring dependable production capacity to meet ongoing market demand.

The turnkey project, secured by DTC Machinery, Capstone's exclusive distributor in Mexico and Central America, is scheduled to be commissioned in early 2026.

Executive Commentary

"As food manufacturers push to elevate efficiency, reduce costs and enhance reliability, Capstone's microturbines in CHP applications stand out as a proven, resilient, affordable and sustainable energy solution," said Vince Canino, President and CEO of Capstone Green Energy. "This project underscores how our innovative clean technology delivers consistent, high-quality thermal energy to empower continuous production, strengthens energy resilience, and drives long-term operational success for our clients."

"Capstone's microturbines continue to prove their value in food processing applications," said Alejandro Muñoz Barba, Principal for DTC Machinery. "We are proud to deliver a

turnkey solution that provides efficiency, reliability, and meaningful operational savings for our customers.”

About Capstone Green Energy

For nearly four decades, Capstone Green Energy has been a leader in clean technology, pioneering the use of microturbines to revolutionize how businesses manage their energy needs sustainably. In collaboration with our global network of dedicated distributors, we have shipped over 10,600 units to 88 countries, helping customers significantly reduce their carbon footprints through high-efficiency, on-site energy systems and microgrid solutions.

Our commitment to a cleaner, more resilient energy future remains steadfast. Today, we offer a comprehensive range of microturbine products, from 65kW systems to multi-megawatt solutions, tailored to meet the specific needs of commercial, industrial, and utility-scale customers. In addition to our core microturbine technology, Capstone’s growing portfolio includes flexible Energy-as-a-Service (EaaS) offerings, such as build-own & transfer models, PPAs, lease-to-own, and rental solutions, which are designed to provide maximum value and energy security.

In our pursuit of cutting-edge energy solutions, Capstone has forged strategic partnerships to expand our impact and capabilities. Through these collaborations, we proudly offer advanced technologies that leverage renewable gas and heat recovery solutions, further enhancing the sustainability, efficiency, and reliability of our clients' operations. These integrated offerings reflect our commitment to building a cleaner, more responsible energy future.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, as amended. Such forward-looking statements include statements concerning anticipated future events and expectations that are not historical facts, such as statements concerning the anticipated commission date, expected system performance, and the future profitability and growth of the business. All statements, other than statements of historical fact, are statements that could be deemed forward-looking statements. In addition, forward-looking statements are typically identified by words such as “plan,” “believe,” “goal,” “target,” “aim,” “expect,” “anticipate,” “intend,” “outlook,” “estimate,” “forecast,” “project,” “continue,” “could,” “may,” “might,” “possible,” “potential,” “predict,” “should,” “would,” “will” and other similar words and expressions, although the absence of these words or expressions does not mean that a statement is not forward-looking. Forward-looking statements are based on the current expectations and beliefs of Capstone’s management and are inherently subject to a number of factors, risks, uncertainties and assumptions and their potential effects. There can be no assurance that future developments will be those that have been anticipated. Actual results may vary materially from those expressed or implied by forward-looking statements based on a number of factors, risks, uncertainties and assumptions, including, among others, the Company’s ability to execute on its strategic initiatives to expand into new market verticals,

including data centers; the Company's liquidity position and ability to access capital; the Company's ability to continue as a going concern; the Company's ability to successfully remediate the material weakness in internal control over financial reporting; the Company's ability to realize the anticipated benefits of its financial restructuring; the Company's ability to comply with the restrictions imposed by covenants contained in the exit financing and the new subsidiary limited liability company agreement; the uncertainty associated with the imposition of tariffs and trade barriers and changes in trade policies; employee attrition (including the recent departure of the Chief Financial Officer) and the Company's ability to retain senior management and other key personnel; the Company's ability to develop new products and enhance existing products; product quality issues, including the adequacy of reserves therefor and warranty cost exposure; intense competition; financial performance of the oil, natural gas and AI industries and other general business, industry and economic conditions; including the impacts of any changes in tariff policies and the impact of litigation and regulatory proceedings, and other risks described in the Company's prior press releases and in the Company's filings with the Securities and Exchange Commission (the "SEC"), including under the heading "Risk Factors" in those filings, and other risks the Company may identify from time to time. Forward-looking statements contained herein are made only as to the date of this press release, and the Company assumes no obligation to update or revise any forward-looking statements as a result of any new information, changed circumstances or future events or otherwise, except as required by applicable law.
