

ExxonMobil Starts Production Ahead of Schedule at PNG LNG Project

- Project remains on target for first LNG cargo in the coming weeks
- Production ramp-up continuing
- PNG LNG project is expected to produce more than 9 trillion cubic feet of gas

IRVING, Texas--(BUSINESS WIRE)-- <u>Exxon Mobil Corporation</u> (NYSE:XOM) today announced the \$19 billion PNG LNG project has started producing liquefied natural gas (LNG) in Papua New Guinea ahead of schedule.

Production from the first LNG train will increase over the coming weeks and the first cargo is expected to be shipped to Asia markets before midyear.

Work on the second train is progressing and LNG production from this unit is expected to start in the next several weeks.

The project, which is operated by ExxonMobil affiliate ExxonMobil PNG Limited, is expected to produce more than 9 trillion cubic feet of gas over an estimated 30 years of operations.

"The PNG LNG project exemplifies ExxonMobil's leadership in project execution, advanced technologies and marketing capabilities," said Neil W. Duffin, president of ExxonMobil Development Company. "Project revenue and profitability are underpinned by long-term LNG sales contracts covering more than 95 percent of the plant's capacity."

The project is an integrated development that includes gas production and processing facilities in the Southern Highlands, Hela, Western, Gulf and Central provinces of Papua New Guinea. Approximately 435 miles of pipeline connect the facilities, which include a gas conditioning plant and liquefaction and storage facilities with capacity of 6.9 million tonnes of LNG per year.

Flooding, minimal pre-existing infrastructure and extremely steep slopes were among obstacles that were overcome in constructing the project. Pipe had to be airlifted in some areas because the soil could not support heavy machinery and lack of infrastructure required construction of supplemental roads, communication lines and a new airfield.

"The project is optimally located to serve growing Asia markets where LNG demand is expected to rise by approximately 165 percent between 2010 and 2025, to 370 million tonnes per year," said Duffin.

In addition to ExxonMobil PNG Limited, co-venturers include Oil Search Ltd., National Petroleum Company of PNG, Santos Ltd., JX Nippon Oil & Gas Exploration Corporation, Mineral Resources Development Company (representing landowners) and Petromin PNG

Holdings Limited.

ExxonMobil continues to assess and advance new expansion and development opportunities in Papua New Guinea.

About ExxonMobil

ExxonMobil, the largest publicly traded international oil and gas company, uses technology and innovation to help meet the world's growing energy needs. ExxonMobil holds an industry-leading inventory of resources, is the largest refiner and marketer of petroleum products, and its chemical company is one of the largest in the world. CAUTIONARY STATEMENT: Statements of future events or conditions in this release are forward-looking statements. Actual future results, including project plans, schedules, costs, and capacities; ultimate recoveries; and demand projections could differ materially due to changes in market conditions affecting the oil and gas industry or long-term oil and gas price levels; political or regulatory developments; reservoir performance; timely completion of development projects; technical or operating factors; the outcome of future commercial negotiations; and other factors discussed under the heading "Factors Affecting Future Results" in the Investor Information section of our website (www.exxonmobil.com) and in Item 1A of our most recent Form 10-K. References to quantities of gas include volumes that are not yet classified as proved reserves under SEC rules but that we believe will be produced in the future. The term "project" as used in this release does not necessarily have the same meaning as under any government payment transparency reporting rules.
