Twin Vee PowerCats CEO Joseph Visconti Showcases New 280 GFX2 in YouTube Video

FORT PIERCE, FL / ACCESSWIRE / September 19, 2024 /Twin Vee PowerCats Co. (Nasdaq:VEEE),("Twin Vee" or the "Company"), a manufacturer of offshore, family-friendly sport boats, today announced the launch of its all-new 280 GFX2. Twin Vee's next-generation 28-foot boat was released in a YouTube video where CEO Joseph Visconti showcased and demonstrated the many new upgrades and additions Twin Vee designed and engineered into this offshore PowerCat fishing machine.

The 280 GFX2 marks a significant leap forward in boating technology. As Visconti mentions during the video, the 280 GFX2 "is an all-digital product." A 24-inch, fully integrated touchscreen helm offers an intuitive user interface, allowing owners to easily navigate and control the boat like a smartphone. The Company also introduced an all-digital switching system, which replaces the traditional mechanical switches and circuit breakers used in years past. This upgrade increases the reliability of the boat's power distribution system and is more convenient and flexible for boat owners.

The video's tour of the 280 GFX2 highlighted the spaciousness and thoughtful design onboard. The 280 GFX2 offers an expansive seating area that comfortably accommodates six or seven people, perfect for entertaining or relaxing with family and friends. Moreover, Twin Vee's commitment to quality can be found throughout the boat. According to Visconti, the upholstery is meticulously manufactured in-house, with stitching and designs rivaling luxury automobiles. Visconti proudly states, "The quality of this upholstery is something you would see in a one or two-hundred-thousand-dollar automobile. It's absolutely stunning, comfortable, and ergonomically correct." Even more improvements were also pointed out during the tour. The Gemlux stainless-steel cup, rod holders, and cleats, the finished and painted storage compartments, the redesigned leaning post with its recessed toe kick, and

the flush-mounted fold-out seats all demonstrate the quality of the 280 GFX2.

Visconti also emphasized the amenities anglers would appreciate in the all-new 280 GFX2.

Ample rod storage, oversized fish boxes, and a pressurized 50-gallon live well are just a few of the features that make this boat a fisher's dream. The boat's lighting system even provides fishers with exceptional visibility at night. According to Visconti, in addition to the spreader lights that illuminate the deck, Twin Vee installed "Razor floodlights forward and aft so if you are fishing at night, you essentially can light up a 40 to 50-foot area around you."

The Company's twin catamaran design was discussed during the 280 GFX2 launch video, as Visconti explained the science behind the smooth and stable ride that Twin Vee boats are known for. "What happens is you have that air and water mixture coming through the tunnel. It's called kinetic fluid induction," explains Visconti. "If you're going over a set of wakes or waves, the two sponsons will land first with the air and water in between creating a softer or a cushioned ride… You also have a wider boat, creating more stability and better ride quality. This is why Twin Vees are the best riding boats on the water."

Throughout the video, it is clear that Visconti believes that the 280 GFX2 is the product of Twin Vee's relentless pursuit of research, innovation, and quality. "I'm really proud of the work we do at Twin Vee and I'm extremely proud of the products we produce."
