## **Anixa Biosciences to Participate in the Sidoti Micro-Cap Virtual Conference on May 8 & 9, 2024**

SAN JOSE, Calif., April 30, 2024 /PRNewswire/ -- [Anixa Biosciences, Inc.](#) ("Anixa" or the "Company") (NASDAQ: ANIX), a clinical-stage biotechnology company focused on the treatment and prevention of cancer, today announced its participation in the Sidoti Micro-Cap Virtual Conference, taking place May 8-9, 2024. Anixa Chairman and CEO Dr. Amit Kumar will present an overview of the Company and its clinical programs including vaccines to prevent cancer and a CAR-T cell therapy to treat cancer.

Conference details:

<b>Presentation:</b>	Thursday, May 9, 2024, at 11:30 am ET*
<b>Presentation link:</b>	<a href="#">Click here</a> to register; available via Zoom
<b>Conference registration:</b>	Available on the <a href="#">conference website</a>
<b>1x1 meetings:</b>	Open to all investors upon conference registration

Dr. Kumar will discuss Anixa's preventative breast cancer vaccine, currently in Phase 1 clinical trials, that is showing strong positive data. Additional data releases expected in the coming months, and a Phase 2 trial is expected to commence in early 2025. Anixa's CAR-T cell therapy treatment for ovarian cancer is also in a Phase 1 trial and showing positive data. Anixa has a capital efficient business model, with greater than two years cash, no debt, and a clean cap table.

\*The presentation date and time are subject to change. Participants should refer to the final program agenda for up-to-date information.

### **About Anixa Biosciences, Inc.**

Anixa is a clinical-stage biotechnology company focused on the treatment and prevention of cancer. Anixa's therapeutic portfolio consists of an ovarian cancer immunotherapy program being developed in collaboration with Moffitt Cancer Center, which uses a novel type of CAR- T, known as chimeric endocrine receptor T-cell (CER-T) technology. The Company's vaccine portfolio includes a novel vaccine being developed in collaboration with Cleveland

Clinic to prevent breast cancer – specifically triple negative breast cancer (TNBC), the most lethal form of the disease – as well as a vaccine to prevent ovarian cancer. These vaccine technologies focus on immunizing against "retired" proteins that have been found to be expressed in certain forms of cancer. Anixa's unique business model of partnering with world-renowned research institutions on clinical development allows the Company to continually examine emerging technologies in complementary fields for further development and commercialization.
