Lead Investigator Evaluates Next-Step for Soliton Pivotal Cellulite Clinical Data

- Preliminary presentation venue, AAD 2020 Annual Meeting, canceled due to coronavirus -

HOUSTON, March 20, 2020 /PRNewswire/ -- Soliton, Inc., (Nasdaq: SOLY) ("Soliton" or the "Company"), a medical device company with a novel and proprietary platform technology licensed from The University of Texas on behalf of the MD Anderson Cancer Center ("MD Anderson"), today announced that Dr. Elizabeth Tanzi, lead investigator on Soliton's pivotal cellulite trial is evaluating alternative presentation opportunities after the American Academy of Dermatology (AAD) canceled its annual meeting due to the current coronavirus (COVID-19) outbreak.

Soliton announced March 3, 2020, the results from its pivotal cellulite trial had been accepted for a podium presentation by Scientific Advisory Board member and leading dermatologist, Dr. Tanzi at the AAD 2020 Annual Meeting. As the medical meeting was cancelled due to COVID-19 concerns, Dr. Tanzi is now exploring alternative presentation options to the scientific community.

"The AAD Annual Meeting is one of the most prestigious dermatology conferences that grants physicians across the globe access to the latest and most innovative technologies in the dermatology industry. We believe that the opportunity to present clinical results at such a venue bestows a specific validation that industry physicians prefer and have come to expect," stated Christopher Capelli, MD, founder, President and CEO of Soliton. "Given the current uncertainty surrounding COVID-19, Dr. Tanzi is evaluating alternative avenues to present our pivotal cellulite results. Once identified, we will immediately communicate that to our shareholders. We appreciate everyone's patience during this challenging time for our country."

About Soliton, Inc.

Soliton, Inc. is a medical device company with a novel and proprietary platform technology licensed from MD Anderson. The Company's first FDA cleared commercial product will use rapid pulses of acoustic shockwaves as an accessory to lasers for the removal of unwanted tattoos. The Company is based in Houston, Texas, and is actively engaged in bringing the Rapid Acoustic Pulse ("RAP") device to the market. The Company believes this "Soliton" method has the potential to lower tattoo removal costs for patients, while increasing profitability to practitioners, compared to current laser removal methods. Soliton is investigating potential additional capabilities of the RAP technology in clinical and preclinical testing, including the potential to improve the appearance of cellulite by creating mechanical stress at the cellular level and inducing significant collagen growth and the potential to treat keloid and hypertrophic scars by targeting the stiffened environment in the intracellular matrix.
