## **Soliton to Present Pivotal Cellulite Clinical Trial Results at Virtual AAD 2020 Annual Meeting**

**- Leading dermatologist, Dr. Elizabeth Tanzi, to present pivotal cellulite trial results -**

HOUSTON, March 23, 2020 /PRNewswire/ -- Soliton, Inc., (Nasdaq: SOLY) ("Soliton" or the "Company"), a medical device company with a novel and proprietary platform technology licensed from The University of Texas on behalf of the MD Anderson Cancer Center ("MD Anderson"), today announced the results from its pivotal cellulite trial will be now be presented at the AAD 2020 Annual Meeting, to now be held virtually in the next 6-8 weeks.

The Company received notice on Friday, March 20, 2020, that The American Academy of Dermatology (AAD), which was recently forced to cancel their annual dermatology conference due to the coronavirus (COVID-19), is making plans to conduct their conference through a digital event highlighting content that would have been presented at the annual meeting. Soliton's previously accepted oral presentation regarding its pivotal cellulite clinical trial results is expected be presented in a pre-recorded webcast by Dr. Elizabeth Tanzi, the lead investigator on the trial and member of Soliton's Scientific Advisory Board. Details for the virtual presentation will be announced in the coming weeks.

"We are excited and appreciative that the American Academy of Dermatology has planned to host their Annual Meeting virtually this year. We are thankful for the opportunity to share with the physician and dermatology community Soliton's pivotal results regarding the potential of the RAP device to improve the appearance of cellulite," stated Christopher Capelli, MD, founder, President and CEO of Soliton.

## **About Soliton, Inc.**

Soliton, Inc. is a medical device company with a novel and proprietary platform technology licensed from MD Anderson. The Company's first FDA cleared commercial product will use rapid pulses of acoustic shockwaves as an accessory to lasers for the removal of unwanted tattoos. The Company is based in Houston, Texas, and is actively engaged in bringing the Rapid Acoustic Pulse ("RAP") device to the market. The Company believes this "Soliton" method has the potential to lower tattoo removal costs for patients, while increasing profitability to practitioners, compared to current laser removal methods. Soliton is investigating potential additional capabilities of the RAP technology in clinical and preclinical testing, including the potential to improve the appearance of cellulite by creating mechanical stress at the cellular level and inducing significant collagen growth and the potential to treat keloid and hypertrophic scars by targeting the stiffened environment in the intracellular matrix.
