Soliton Named Best New Technology Award at the Aesthetic Industry Association Board Meeting

HOUSTON, Feb. 18, 2021 /PRNewswire/ -- Soliton, Inc., (Nasdaq: SOLY) ("Soliton" or the "Company"), a medical device company with a novel and proprietary platform technology, today announced that the company's Rapid Acoustic Pulse (RAP) device received the Best New Technology Award from the Aesthetic Industry Association (AIA).

The Soliton RAP device uses proprietary design acoustic shockwaves to mechanically disrupt targeted cellular structures in a completely non-invasive therapy. The clinically proven Rapid Acoustic Pulse (RAP) device was recently cleared by the FDA for temporary improvement in the appearance of cellulite. It had been previously cleared as an accessory to the 1064 nm Q-Switched laser for black ink tattoo removal in Fitzpatrick Skin Type I-III patients.

"We are honored to be the first recipient of this award from the Aesthetic Industry Association. We are thrilled to have our innovative technology recognized in this manner by industry peers and leaders. We are excited to further demonstrate the benefits of the RAP device to the AIA audience that includes physicians in the aesthetic industry and patients interested in tattoo removal and cellulite appearance reduction," commented Brad Hauser, Soliton CEO and President.

About Soliton, Inc.

Soliton, Inc. is a medical device company with a novel and proprietary platform technology licensed from The University of Texas on behalf of MD Anderson Cancer Center. The Company's first FDA cleared commercial product will use rapid pulses of acoustic shockwaves as an accessory to lasers for the removal of unwanted tattoos and the treatment of cellulite. The Company is based in Houston, Texas, and is actively engaged in bringing the Rapid Acoustic Pulse ("RAP") device to the market. The Company believes this "Soliton" method has the potential to lower tattoo removal costs for patients, while increasing profitability to practitioners, compared to current laser removal methods. Soliton is investigating potential additional capabilities of the RAP technology. The device is currently cleared in the United States only for use in tattoo removal and cellulite.
