

For Immediate Release

Astronics Corporation Congratulates Textron Aviation on the First Flight of the Beechcraft Denali

EAST AURORA, NY, February 10, 2022 – [Astronics Corporation](https://astronics.com) (Nasdaq: ATRO), a leading provider of advanced technologies for global aerospace, defense, and other mission critical industries, congratulates Textron Aviation Inc., on the first flight of its new high-performance single-engine turboprop Beechcraft Denali.

The Beechcraft Denali is equipped with several of Astronics' products, including:

- Aircraft power systems: CorePower® Induction Starter Generator System, CorePower® Electronic Circuit Breaker Units, and the 28-Volt DC EmPower® In-Seat Power Supply from Astronics Advanced Electronic Systems
- Aircraft exterior lighting and cockpit panels from Astronics Luminescent Systems
- The Max-Viz 1400 Enhanced Vision System (EVS) from Astronics PECO

"Astronics is proud to be a part of the Beechcraft Denali program," said Mark Peabody, President of Astronics Aerospace Segment. "The technology and innovation being applied to the Beechcraft Denali program is often found in larger aircraft. We believe the addition of these systems will enable a significant increase in features and performance for smaller business and general aviation aircraft."

Astronics AES designs and manufactures advanced power generation and distribution systems, which efficiently manage aircraft power. The brushless starter generator, a key part of the Induction Starter Generator System, eliminates the need for brush maintenance and improves aircraft availability.

Astronics LSI has vast experience in the engineering and manufacturing of custom avionics keyboard panels. This includes illuminated display panels and control panel assemblies. LSI also offers a full exterior lighting system solution.

Astronics PECO is a leading provider of aerospace interiors, structures, and safety systems as well as mission-critical defense solutions.
