Caution Regarding Cannabis Operations in the United States

Investors should note that there are significant legal restrictions and regulations that govern the cannabis industry in the United States. Cannabis remains a Schedule I drug under the US Controlled Substances Act, making it illegal under federal law in the United States to, among other things, cultivate, distribute or possess cannabis in the United States. Financial transactions involving proceeds generated by, or intended to promote, cannabis-related business activities in the United States may form the basis for prosecution under applicable US federal money laundering legislation.

While the approach to enforcement of such laws by the federal government in the United States has trended toward non-enforcement against individuals and businesses that comply with medical or adult-use cannabis programs in states where such programs are legal, strict compliance with state laws with respect to cannabis will neither absolve TerrAscend of

liability under US federal law, nor will it provide a defense to any federal proceeding which may be brought against TerrAscend. Due to any investments made by TerrAscend in operations in the United States, enforcement of federal laws in the United States is a significant risk to the business of TerrAscend and any proceedings brought against TerrAscend thereunder may adversely affect TerrAscend's operations and financial performance.
