Weave Now Integrates with Dentrix Ascend

New integration combines industry-leading software to enhance patient experiences for thousands of dental practices.

LEHI, Utah--(BUSINESS WIRE)-- [Weave](#) (NYSE: WEAV), a leading all-in-one experience platform for small and medium-sized healthcare businesses, today announced an integration with [Dentrix Ascend](#), the leading practice management software for dental offices.

The new integration combines Dentrix Ascend's comprehensive cloud-based practice management solution with Weave's all-in-one patient experience software to help dental offices enhance the patient experience. Weave's software saves dental offices time by automating tasks and optimizing operations using tools specifically designed for practice growth.

"We are on a mission to transform every patient interaction by modernizing communications for dental practices," said Branden Neish, Chief Product & Technology Officer of Weave. "Our integration with Dentrix Ascend improves patient engagement and practice reputation, automates office tasks to save time, and drives growth through better patient experiences. We're excited to bring Weave's advanced features to Dentrix Ascend customers across individual and group practices."

Integration features & benefits include:

Save the Date and Appointment Reminders

Automated communications are sent by Weave shortly after an appointment is scheduled so patients can add it as an event on their calendars. Additional automated reminders help keep schedules full.

Patient Profile and Call Pop

Office staff can view detailed information like household name, demographics, and patient photos while serving them over the phone.

Schedule Sync

Schedules can be filtered by confirmed and unconfirmed patients, appointment type, and practitioner. Weave's built-in communication tools empower office staff to quickly reach out or prioritize follow up with patients on the schedule.

Reviews Auto-texting

Practices can customize and schedule automated texts to solicit reviews from patients after their appointments to improve online reputation.
