What:

PlugIN is the first annual Marvell sponsored developer camp dedicated to educating and inspiring the developer community about the Plug Computer features and ecosystem.

This gathering is designed to foster creative and innovative new Plug Computer applications ideas, highlight the Plug Computer open source platform's ease of use and affordability, and bring together the Plug Computer network and community.

Afternoon, breakout sessions will focus on Linux, Java, Android and business development. Attendees will include developers, testers, designers and entrepreneurs. Registered attendees will receive a Plug Computer onsite and will be able to:

- # Have access to speak to the inventors of the Plug Computer
- # Brainstorm new ideas for the Plug Computer
- # Explore the existing ecosystem – and hear from successful application developers
- # Optimize Plug Computer developer experience
