Substandard Mortality

Athene Annuity and Life Company

I, L. Doug King, am the Appointed Actuary of Athene Annuity and Life Company. I have reviewed the underlying assumptions of the application of substandard mortality for structured settlements. The substandard mortality is applied by using a constant extra death (CED) in accordance with Actuarial Guideline IX-A. I also certify that to the best of my knowledge, that the CED's applied in the Statutory reserve calculation are reasonable for the products where substandard mortality should be applied.

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of **Athene Annuity and Life Company** (the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Iowa.

The Insurance Division, Department of Commerce, of the State of Iowa (the Division) recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Iowa Insurance Law. The NAIC's *Accounting Practices & Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Iowa. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

Among the products issued by the Company are indexed universal life insurance and indexed annuities. These products allow a portion of the premium to earn interest based on certain indices, including the Standard & Poor's 500 Composite Stock Price Index and other bespoke indices. Call options, futures, variance swaps and total return swaps are purchased to hedge the interest credited to the customer as a direct result of movements in the related indices. In 2006, the Commissioner of the Division issued Bulletin 06-01*, Accounting for Derivative Instruments Used to Hedge the Growth in Interest Credited for Index Products*, which prescribes that an insurer may elect to recognize changes in the fair value of derivative instruments purchased to hedge indexed products in the statement of operations. The Company has elected to apply Bulletin 06-01 to its futures, variance swaps and total return swaps that are hedging fixed indexed annuities. Application of Bulletin 06-01 does not impact the Company's statutory surplus amounts.

In 2009, the Commissioner of the Division promulgated Iowa Administrative Code (IAC) Section 191-97, *Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve*, which prescribes that an insurer may elect (i) to use an amortized cost method to account for certain derivative instruments, such as call options, purchased to hedge the growth in interest credited to the customer on indexed insurance products and (ii) to utilize an indexed annuity reserve calculation methodology under which call options associated with the current index interest crediting term are valued at zero. IAC Section 191-97 does not apply to products that do not guarantee a minimum interest accumulation, such as our variable and index-linked deferred annuities. The Company has elected to apply IAC Section 191-97 to its eligible over the counter (OTC) call options and reserve liabilities.

The NAIC requires annuities issued by life insurance companies on or after January 1, 2015, to use the 2012 Individual Annuity Reserving (IAR) Mortality Table. In 2015, the Division promulgated IAC Section 191-43.3(5), which set an elective alternative effective date of January 1, 2016 for adoption of the 2012 IAR Mortality Table. The Company chose to use the Annuity 2000 Mortality Table for all annuities issued in 2015.

For the year ended December 31, 2025, the Company received a permitted accounting practice from the Division to record its investment in Apollo Aligned Alternatives Aggregator, L.P. (AAA) as if the underlying investments held by AAA were owned directly by the Company. The permission represents a deviation from SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies* and requires the Company to apply look-through accounting and reporting to AAA's investments as if the investments were owned directly by the Company. Application of this permitted practice at January 1, 2025 reduced the Company's carrying value of AAA by $212.3 million, and after applying reinsurance, reduced the Company's capital and surplus by $8.1 million, which was recorded directly through surplus as a cumulative effect of change in accounting principle. As a result of this permitted practice, the Company's net income for the year ended December 31, 2025 decreased by $20.0 million and cumulative capital and surplus as of December 31, 2025 was reduced by $263.0 million prior to the application of reinsurance. After the application of reinsurance, the permitted practice increased net income for the year ended December 31, 2025 by $8.1 million and had no impact on the Company's capital and surplus.

A reconciliation of the Company's net income and statutory surplus between practices prescribed or permitted by the State of Iowa and NAIC SAP is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results may differ from the estimates used in preparing the financial statements.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received. Accident and health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity, and expense experience for the year and to the appropriate level of statutory surplus to be retained by the Company.

Real estate investments are classified in the balance sheet as properties held for the production of income. Properties held for the production of income are carried at depreciated cost less encumbrances. Fair values are based upon market appraisals performed every five years, or more frequent if events and circumstances indicate the fair value of property owned is not recoverable.

In addition, the Company uses the following accounting policies, as applicable:

(1) Short-term investments are stated at amortized cost.

(2) Bonds which qualify as issuer credit obligations are stated at amortized cost or fair value based on their rating by the NAIC. Bonds held at amortized cost are amortized using the scientific interest method on a yield-to-worst basis.

(3) Common stocks are stated at market value except that investments in stocks of subsidiaries and affiliates in which the Company has an interest of 10% or more are carried on the equity basis. Federal Home Loan Bank (FHLB) stock is carried at fair value, which is presumed to be par because it can only be redeemed by the bank.

(4) Perpetual preferred stock is carried at fair value, not to exceed any currently effective call price. The related net unrealized capital gains or losses are reported in surplus along with any adjustment for federal income taxes. Redeemable preferred stock with an NAIC designation 1-3 is carried at amortized cost. Redeemable preferred stock with an NAIC designation 4-6 is carried at the lower of cost or fair value.

(5) Mortgage loans are reported at unpaid principal balances, net of unamortized premiums and discounts, less allowance for specific reserves.

(6) Bonds which qualify as asset-backed securities are stated at amortized cost or fair market value based on their rating by the NAIC. Changes to estimated cash flows on the securities are accounted for retrospectively for securities that are highly rated at the time of purchase and in which the security cannot be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. The prospective method is used for those securities where an other-than-temporary impairment has been taken, the security is not highly rated at the time of purchase, securities where receipt of all contractual principal cash flows is not expected, or those securities that can be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. Asset-backed securities stated at amortized cost are amortized or accreted using the scientific interest method.

1. Summary of Significant Accounting Policies and Going Concern (Continued)

Debt securities that do not qualify as bonds under the principles-based bond definition are reported at the lower of amortized cost or fair value. Residual interests in securitization vehicles that do not qualify as bonds are initially reported at cost. Subsequently, they are reported using the calculated practical expedient method, where the book/adjusted carrying value is reduced by distributions received until the residual interests have a book or adjusted carrying value of zero. Any distribution received thereafter is recognized as interest income.

(7) Investments in affiliated common stocks are reported using the equity method. For insurance subsidiaries, the carrying value equals their statutory net worth plus unamortized goodwill, if applicable, multiplied by the percent of the Company's ownership interest. For non-insurance subsidiaries, the carrying value equals their US GAAP equity plus any unamortized goodwill, if applicable, multiplied by the percent of the Company's ownership interest.

(8) Investments in joint ventures, partnerships, or limited liability companies are valued at the Company's proportionate share of US GAAP equity of the entity, adjusted for audited results upon receipt. Changes in US GAAP equity are recorded as an unrealized gain or loss in the Company's capital and surplus. These investments are valued based on the timeliness of information received, which ranges from recording timely to a lag of up to three months.

(9) Call option derivative assets that hedge the interest credited to fixed indexed annuities as a direct result of changes in the related indices are recorded at amortized cost. Replication synthetic asset (RSAT) transactions are reported at amortized cost when the RSAT as a whole and the cash component are both at amortized cost. Derivative instruments used in hedging transactions that meet the criteria of a highly effective hedge, and are designated in a hedge accounting relationship, are valued and reported in a manner that is consistent with the hedged items. For foreign currency forward contracts classified as highly effective, an excluded component representing forward points on the currency contract is amortized into income over the life of the contract. All other derivative assets and liabilities are stated at fair value.

(10) The Company does not have premium deficiency reserves for accident and health business.

(11) Unpaid losses and loss adjustment expenses on any accident and health business include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are periodically reviewed and any adjustment is reflected in the period determined.

(12) During first quarter 2025, the Company modified its capitalization policy for project labor and professional services associated with software development projects to capitalize costs greater than $0.25 million from the previous $1 million threshold. The policy continues to depreciate these assets over a five-year period.

(13) The Company does not have any pharmaceutical rebate receivables.

D. Going Concern

Management's assessment of the relevant conditions through February 27, 2026 does not give rise to substantial doubt of the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Effective January 1, 2025, the Company adopted the principle-based-bond definition (PBBD). This adoption clarifies that securities qualifying as issuer credit obligations fall under the scope of SSAP No. 26, *Bonds*, while those qualifying as asset-backed securities fall under SSAP No. 43, *Asset-Backed Securities*. Securities that do not meet these criteria are reported as debt securities that do not qualify as bonds, residual tranches, other invested assets, or non-admitted assets.

Changes in measurement due to the transition is reported as a change in unrealized gains (losses) and not as a change in accounting principle. The impacts of securities reclassified under the PBBD are as follows:

- As of January 1, 2025, the aggregate book adjusted carrying value prior to adoption of PBBD for all securities reclassified from Schedule D, part 1 to Schedule BA is $1,648.5 million in the general account and $229.0 million in the separate accounts.
- As of January 1, 2025, the aggregate book adjusted carrying value after adoption of PBBD for securities reclassified from Schedule D, part 1 to Schedule BA that resulted in a change in measurement basis from amortized cost to lower of amortized cost or fair value is $872.1 million in the general account and $127.7 million in the separate accounts.
- The aggregate surplus impact for securities reclassified from Schedule D, part 1 to Schedule BA includes the difference between the book adjusted carrying value as of December 31, 2024 and the book adjusted carrying value after adoption as of January 1, 2025 for those securities that resulted in a change in measurement basis. The total surplus impact from the change in measurement basis was not material.
- Contemporaneous with the January 1, 2025 adoption of the PBBD, the Company made conforming revisions for INT 24-01: *Principles-Based Bond Definition Implementation Questions and Answers*, which provided further clarification on the accounting for hybrid instruments, among other topics. Pursuant to this guidance, the Company reclassified certain hybrid instruments from Schedule D, part 2, section 1 to Schedule BA. The corresponding impact to surplus was not material.

2. Accounting Changes and Corrections of Errors (Continued)

During 2025, the Company discovered an error which resulted in a $64.0 million understatement of aggregate reserves for life contracts and a $51.2 million understatement of reserves ceded under modco reinsurance, resulting in a $12.8 million overstatement of surplus in the prior period financial statements. The Company also discovered an error in 2025 which resulted in a $9.3 million understatement of asset valuation reserve (AVR) and a corresponding overstatement of surplus in the prior period financial statements. In accordance with SSAP No. 3 *Accounting Changes and Correction of Errors*, these corrections were recorded directly to surplus. Also during 2025, the Company discovered an error which resulted in a $13.4 million overstatement of commissions and expense allowances on reinsurance ceded in the separate account prior period financial statements. In accordance with SSAP No. 3, this correction was recorded directly to surplus in the separate account. The net impact of these corrections decreased surplus on the general account by a total of $35.5 million, representing 0.9% of ending capital and surplus as of both December 31, 2025 and December 31, 2024.

As discussed in Note 1, the Company received a permitted practice from the Division related to the measurement of its investment in AAA. The permitted practice was applied effective January 1, 2025, resulting in an $8.1 million reduction in capital and surplus after the application of reinsurance, which was recorded directly to surplus as a cumulative change in accounting principle.

3. Business Combinations and Goodwill

A. Statutory Purchase Method - None

B. Statutory Merger

(1) On December 20, 2023, the Company and Athene Annuity & Life Assurance Company (AADE), its Delaware domiciled parent company, executed an Agreement and Plan of Merger. Effective October 11, 2024, following the receipt of all required regulatory approvals, AADE (NAIC #61492) merged with and into the Company, with the Company as the surviving entity. The Company received a no objection letter from the Division to use a merger effective date of October 1, 2024 for financial reporting purposes.

(2) The merger was accounted for in accordance with SSAP No. 68, *Business Combinations and Goodwill*, as a statutory merger. As such, financial statements for periods prior to the merger were combined and the recorded assets, liabilities and surplus of the Company and AADE were carried forward to the merged company. The common capital stock of AADE was deemed canceled and AADE's investment in the affiliated common stock of AAIA was eliminated. The business the Company previously ceded to AADE under a coinsurance agreement is no longer reflected as assumed and ceded risks in the restated merged financial statements.

The following table shows the gross unrealized losses and fair values of asset-backed securities, which have not been impaired to fair value, aggregated by length of time that individual securities have been in a continuous unrealized loss position as of December 31, 2025:

a. Aggregate amount of unrealized losses

(5) A full analysis of all relevant qualitative considerations was completed in reaching the conclusion that the impairments were not other-than-temporary, including the intent and ability to hold the investment for a period of time sufficient to allow for a recovery in value. Specific events that may influence the operations of the issuer and impaired earnings potential are reviewed in addition to length of time and extent to which the fair value has been less than cost.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

Repurchase Transaction - Cash Taker - Overview of Secured Borrowing Transactions

(1) Information regarding the company policy or strategies for engaging in repo programs, policy for requiring collateral

The Company participates in repurchase agreements with unaffiliated financial institutions. Under these agreements, the Company lends bonds and receives cash as collateral. The Company monitors the estimated fair value of the collateral and the securities loaned throughout the duration of the contract and contributes additional collateral as necessary. Securities loaned under these agreements may be sold or re-pledged by the transferee.

Certain repurchase agreements and reverse repurchase agreements are presented net on the balance sheets when they are subject to master netting arrangements and when the Company has both (1) the legal right to offset the amounts owed with amounts due from the same counterparty and (2) the intent to settle the transactions on a net basis or to realize the asset and settle the liability simultaneously. Amounts that are not eligible for offset are presented on a gross basis on the balance sheets.

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

Repurchase Transaction - Cash Provider - Overview of Secured Borrowing Transactions

(1) Information regarding the company policy or strategies for engaging in repo programs, policy for requiring collateral

Included in short-term investments and cash equivalents are amounts receivable under reverse repurchase agreements, which involves the purchase of investments from a seller with the agreement that the investments will be repurchased by the seller at a specified price, and at a specified date or within a specified period of time, not to exceed 364 days. The investments purchased, which represent collateral on a secured lending arrangement, are not reflected in the Company's balance sheets. Instead, the secured lending arrangement is reflected as a short-term investment or cash equivalent for the principal amount loaned under the agreement, if not subject to the master netting arrangements as discussed below.

Certain repurchase agreements and reverse repurchase agreements are presented net on the balance sheets when they are subject to master netting arrangements and when the Company has both (1) the legal right to offset the amounts owed with amounts due from the same counterparty and (2) the intent to settle the transactions on a net basis or to realize the asset and settle the liability simultaneously. Apollo Aligned Alternatives, L.P. (AAA) is a strategic alternative investment vehicle designed to include investment by affiliated and unaffiliated insurers and other investors, with each investor having pro rata exposure to the underlying investments. The partnership is managed by an affiliate of the Company. Under the terms of the partnership agreement, the Company has the right to require distribution of its pro rata portion of underlying assets and direct such assets to be liquidated.

As discussed in Note 1, the Company received a permitted practice to measure its investment in AAA as if the underlying investments held by AAA were owned directly by the Company. The Company presents the pro rata interests in the underlying funds that comprise its investment in AAA on Schedule BA, Part 1 annually. On Schedule BA, Parts 2 and 3, the Company reports its proportional share of AAA's activity in total.

While AAA's unfunded capital commitments (Unfunded AAA Commitments) have been included on a look through basis for the Company (based on the Company's percentage interest in AAA) as of December 31, 2025, such Unfunded AAA Commitments are not the legal obligation of the Company. Additionally, while the Company may provide commitments in respect of such Unfunded AAA Commitments under the Liquidity Facility, the Company has not yet done so.

The following table lists the general account's pro rata interest in the net contribution, carry value, fund income and unfunded commitments of new investment funds held by AAA during the year ended December 31, 2025.

8. Derivative Instruments

A. Derivatives under SSAP No. 86 - Derivatives

(1) The Company utilizes derivative instruments which may include the following:

Options: The Company has issued fixed indexed and index-linked annuity products. These contracts credit interest based on certain indices, including the Standard & Poor's 500® Composite Stock Price Index and other bespoke indices. Over-the-counter (OTC) option contracts, call options and call spreads are purchased to hedge the interest credited to the customer as a direct result of movements in the related indices. Upon exercise, the Company will receive the fair value of the call option. The parties with whom the Company enters into OTC option contracts are highly rated financial institutions where contracts are supported by collateral, which minimizes the credit risk associated with such contracts.

Notes to the Financial Statements

8. Derivative Instruments (Continued)

Swaptions: A swaption is an option to enter into a swap with a forward starting effective date. The Company uses swaptions to hedge the interest rate exposure associated with the minimum crediting rate. Increases in interest rates will generate losses on assets that are backing liabilities. In certain instances, the Company locks in the economic impact of existing purchased swaptions by entering into offsetting written swaptions. The Company pays a premium when it purchases the swaption. The Company utilizes these contracts in non-qualifying hedging relationships.

Variance Swaps: The Company has issued fixed indexed products. These contracts credit interest based on certain indices, including the Standard & Poor's 500® Composite Stock Price Index. The Company uses variance swaps to hedge the market risks from changes in volatility for these products. Under variance swaps, the Company and the counterparty agree to exchange amounts calculated based on a fixed rate (implied volatility at inception of transaction) and realized volatility over the life of the transaction (similar to an interest rate swap). Generally, no cash is exchanged at the outset of the contract and neither party makes principal payments. The parties with whom the Company enters into OTC variance swaps contracts are highly rated financial institutions which minimizes the credit risk associated with such contracts.

Interest Rate Swaps: The Company uses interest rate swaps to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and liabilities. Under interest rate swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed notional principal amount. Generally, no cash is exchanged at the outset of the contract and neither party makes principal payments.

The interest rate swaps that qualify for hedge accounting in accordance SSAP No. 86, *Derivatives*, and are designated in a hedge accounting relationship, are recorded in a manner consistent with the hedged asset or liability. Qualifying interest rate swaps hedging liabilities, are carried at amortized cost. Cash which is exchanged as the difference between fixed and floating interest rates is recognized in the statements of operations through investment income. If the contract is terminated prior to maturity, a realized gain or loss is reported in the statements of operations for the amount of cash exchanged in order to close the contract.

Futures: Under exchange-traded futures contracts, the Company agrees to purchase a specified number of contracts with other parties and to post variation margin on a daily basis in an amount equal to the difference in the daily fair values of those contracts. Futures contracts are purchased to hedge the interest credited to the customer as a direct result of movements in the related indices. The clearing broker with whom the Company enters into exchange-traded futures are regulated futures commission merchants who are members of a trading exchange.

Futures are recorded at fair value of margin on deposit with the clearing broker. For futures that hedge fixed indexed annuity products, changes in margin on deposit are recognized in the Summary of Operations through investment income. For futures that hedge index-linked annuity products, changes in margin on deposit are recorded as unrealized capital gains or losses until the time of sale.

Currency Swaps: Foreign currency swaps are used by the Company to reduce the risk from fluctuations in foreign currency exchange rates associated with its assets denominated in foreign currencies. With a foreign currency swap transaction, the Company agrees with another party to exchange, at specified intervals, the difference between one currency and another at a forward exchange rate calculated by reference to an agreed upon principal amount. The principal amount of each currency is exchanged at the inception and termination of the currency swap by each party.

The currency swaps that qualify for hedge accounting in accordance with SSAP No. 86, and are designated in a hedge accounting relationship, are recorded in a manner consistent with the hedged asset or liability. The change in the value of the hedged item due to fluctuations in foreign exchange rates is recorded as unrealized capital gains or losses until the time of sale. As such, the qualifying currency swap also records the change in value associated with fluctuations in foreign currency exchange rates in unrealized capital gains and losses.

Forwards: The Company uses foreign exchange forward contracts to hedge certain invested assets against movement in foreign currency. The price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Foreign exchange forward contracts are utilized in non-qualifying hedging relationships.

The forwards that qualify for hedge accounting in accordance with SSAP No. 86, *Derivatives*, and are designated in a hedge accounting relationship, are recorded in a manner consistent with the hedged asset or liability. The change in the value of the hedged item due to fluctuations in foreign exchange rates is recorded as unrealized capital gains or losses until the time of sale. As such, the qualifying currency forward also records the change in value associated with fluctuations in foreign currency exchange rates in unrealized capital gains and losses. Additionally, the excluded component represented by the difference between the spot rate and forward price is amortized into income over the life of the contract with an offset to the statement value of the contract.

Credit Default Swaps: Credit default swaps are used to synthetically create the characteristics of a bond, or hedge credit risk, referred to as a replication synthetic asset transaction (RSAT). An RSAT is created by coupling a bond with a credit default swap to create a synthetic instrument that is cheaper than its cost in the cash market or one which has better default characteristics. These transactions provide the Company with a periodic premium to compensate it for accepting credit risk and are used to enhance investment income and improve the default characteristics of the portfolio. The exposure amount of such agreement, which is usually the notional amount, is equal to the maximum proceeds that must be paid by a counterparty for a defaulted security. Should a credit event occur on a reference entity, a counterparty would be required to pay the notional amount in exchange for receipt of an obligation of the reference entity. Generally, there is no cash requirement at the initiation of the credit default swap contract.

Credit default swaps used in replication transactions are carried at amortized cost. The premiums received are accrued and recognized in the Summary of Operations through investment income over the life of the agreements. A capital loss would be recorded on the date of default, through the Summary of Operations, to reflect the difference between the notional amount paid and the fair value of the bonds received.

Total Return Swaps: The Company purchases total return swaps to gain exposure and benefit from a reference asset without actually having to own it. Total return swaps are contracts in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of the underlying asset, which includes both the income it generates and any capital gains.

Warrants: The Company acquires equity option warrants through other business transactions. Warrants are instruments that give the company the right to purchase an underlying equity at a given price and time outlined in the warrant agreement.

Liquidity Facility — On June 27, 2025, Athene Holding Ltd., Athene Annuity Re Ltd. (AARe), Athene Life Re Ltd. and the Company entered into a revolving credit agreement with a syndicate of banks and Wells Fargo Bank, National Association, as administrative agent (Liquidity Facility). The Liquidity Facility is unsecured and has a commitment termination date of June 26, 2026, subject to any extensions of additional 364-day periods with consent of extending lenders and/or "term-out" of outstanding loans (by which, at our election, the outstanding loans may be converted to term loans which shall have a maturity of up to one year after the original maturity date), in each case in accordance with the terms of the Liquidity Facility. In connection with the Liquidity Facility, AARe guaranteed all of the obligations of each other borrower under the Liquidity Facility and the related loan documents. The Liquidity Facility will be used for liquidity and working capital needs to meet short-term cash flow and investment timing differences. The borrowing capacity under the Liquidity Facility is $2.6 billion, subject to being increased up to $3.1 billion in total on the terms described in the Liquidity Facility. The Liquidity Facility contains various standard covenants with which we must comply, including: 1) AARe minimum consolidated net worth of no less than $23.2 billion; and 2) restrictions on our ability to incur liens, with certain exceptions.

Interest accrues on outstanding borrowings at either the adjusted term secured overnight financing rate plus a margin or the base rate plus a margin, with applicable margin varying based on AARe's financial strength rating. Rates and terms are as defined in the Liquidity Facility. As of December 31, 2025, the Company had no amounts outstanding under the Liquidity Facility and was in compliance with all financial covenants under the facility.

B. FHLB (Federal Home Loan Bank) Agreements

(1) The Company is a member of the FHLB of Des Moines. Through its membership, the Company is eligible to borrow under fixed or floating rate short-term arrangements to provide additional liquidity. These borrowings are accounted for as borrowed money under SSAP No. 15, *Debt and Holding Company Obligations.* The Company did not have any outstanding borrowings as of December 31, 2025 or December 31, 2024.

The Company has issued general and separate account funding agreements to the FHLB of Des Moines in exchange for cash resulting in a liability of $22,976.9 million as of December 31, 2025. The Company uses these funds in an investment spread strategy, consistent with its other investment spread operations. As such, the Company applies SSAP No. 52, *Deposit-Type Contracts,* accounting treatment to these funds, consistent with its other deposit-type contracts. It is not part of the Company's strategy to utilize these funds for operations, and any funds obtained from the FHLB of Des Moines for use in general operations would be accounted for consistent with SSAP No. 15 as borrowed money.

The Company must provide appropriate collateral to borrow under the arrangements described above. The borrowing capacity available to the Company under these agreements is largely a factor of the Company's ability to post eligible collateral, as well as internal limits such as single-holder exposure limits (10% of the entity's balance sheet liabilities) and NAIC capital requirements.

The tables below indicate the amount of FHLB of Des Moines stock purchased, collateral pledged, assets and liabilities related to the agreements with FHLB of Des Moines.

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

A. At December 31, 2025 the Company has authorized and issued 10.0 million shares of $1 par common stock which are outstanding and owned by AARe.

B. Dividend Rate of Preferred Stock - None

C. The payment of dividends by the Company to its parent is regulated under Iowa law. Under Iowa law, the Company may pay dividends only from the earned surplus arising from its business and must receive the prior approval (or non-disapproval) of the Iowa Insurance Commissioner to pay any dividend that would exceed certain statutory limitations.

In connection with the acquisition of Aviva USA during 2013, AHL entered into a Net Worth Maintenance Agreement to provide capital support to the Company such that AHL is obligated to maintain the Company's capital and surplus in an amount sufficient to maintain the Company's total adjusted capital to be at least 200% of company action level risk based capital. The agreement also provides that the Company will not pay any dividends if such dividends would cause the company action level risk based capital ratio to fall below 200%.

Effective January 30, 2020, the Company's then parent, AADE, entered into a Capital Maintenance Agreement to provide capital support to the Company, in an amount sufficient to satisfy the insurance laws of the State of New Jersey, in order to obtain authority for the Company to issue registered index-linked annuities in New Jersey (Original Agreement). In connection with the merger of AADE into the Company, effective October 11, 2024, the Company's new parent, AARe, entered into a Capital Maintenance Agreement with similar terms to continue to provide capital support to the Company in an amount sufficient to satisfy the insurance laws of the State of New Jersey. The agreement will remain in effect for ten years from the Original Agreement's effective date.

D. Ordinary Dividends - None

E. Within the limitations presented in item C above, based on December 31, 2025 results, the maximum dividend that may be paid without prior approval in 2026 is $0.

F. The unassigned surplus is held for the benefit of the Company's shareholder.

G. Surplus Advances - None

H. Stock Held for Special Purposes - None

I. Changes in Special Surplus Funds - None

J. Unassigned Funds (Surplus)

The portion of unassigned funds (surplus) represented or reduced by unrealized gains and (losses), net of capital gains tax is $1,443.4 million at December 31, 2025.

K. Company-Issued Surplus Debentures or Similar Obligations - None

L. Impact of Any Restatement Due to Prior Quasi-Reorganizations - None

M. During the quarter ended March 31, 2017, the Company recorded a surplus reset under SSAP No. 72, *Surplus and Quasi-Reorganizations*, in the amount of $1,502.3 million, resulting in a reclassification between unassigned surplus and gross paid-in and contributed surplus. In accordance with SSAP No. 72, the Company is required to disclose this surplus reset for ten years following its effective date.

14. Liabilities, Contingencies and Assessments

A. Contingent Commitments

(1) Commitments or contingent commitment(s) to an SCA entity, joint venture, partnership, or limited liability company

As of December 31, 2025, the Company has unfunded commitments to invest in SCA entities, joint ventures, partnerships or limited liability companies in the general and separate accounts of $ 5,523.7 million.

As of December 31, 2025, the Company has unfunded commitments to invest in certain bonds, preferred stock, and mortgage loans in the general and separate accounts of $ 20,116.6 million.

See Note 6 for additional details on the Company's reporting of unfunded commitments.

Effective July 31, 2019, the Company entered into a Capital Maintenance Agreement to provide capital support to its wholly-owned subsidiary, AANY, such that the Company has agreed to maintain AANY's total adjusted capital in an amount at least equal to 300% of AANY's company action level risk based capital. The agreement will remain in effect until both parties agree in writing to its termination and receive prior written approval from the regulating body. Given the current capital level of AANY, the likelihood of payment by the Company under the terms of this agreement is remote. See the table below for additional detail.

Effective July 31, 2019, the Company entered into an agreement to guarantee payment of all amounts due from its subsidiary, AANY, to the contract and certificate holders under the terms of a group annuity contract issued by AANY during August 2019. As part of the issuance, AANY received sufficient assets to fund future obligations of the contract and the chance of any payments by the Company under this guarantee is remote. Further, it is expected that the previously mentioned Capital Maintenance Agreement between the Company and AANY would preclude any payments that would be required under this guarantee. This agreement will remain in effect until all obligations related to the group annuity contract have been satisfied. See the table below for additional detail.

B. Assessments

(1) Guaranty associations may subject member insurers, including the Company, to assessments that require the insurers to pay funds to cover contractual obligations under insurance policies issued by insurance companies that become impaired or insolvent. The assessments are based on an insurer's proportionate share of premiums written in that state during a specified one-year or three-year period for lines of business in which the impaired or insolvent insurer engaged, subject to prescribed limits. As of December 31, 2025, the Company recorded a liability of $6.5 million based on the current best estimate of future assessments expected, as well as an asset of $11.5 million for future premium tax credits. The actual amount of assessments levied against the Company may vary from this estimate.

Fiduciary or Best Interest Standards - On February 13, 2020, the NAIC adopted the Suitability in Annuity Transactions Model Regulation (SAT), which places responsibilities upon issuing insurance companies with respect to the suitability of annuity sales, including responsibilities for training agents. In addition the SAT incorporates a "best interest" or similar standard with respect to the suitability of annuity sales. A producer is considered to have acted in the best interest of the customer if they have satisfied certain prescribed obligations regarding care, disclosure, conflict of interest and documentation. State adoption of these revisions, and any future changes in such laws and regulations, may impact the way our US insurance subsidiaries market and sell their annuity products. Forty-eight states, including Iowa, have adopted the amended SAT that includes a best interest standard. On July 22, 2018, separate and apart from the NAIC, the NYDFS issued amendments to its SAT regulation to incorporate a "best interest" standard with respect to the suitability of life insurance and annuity sales. The amendments made by NYDFS are currently the subject of litigation. Future changes in such laws and regulations, including those that impose a "best interest" standard, may impact the way the Company and its subsidiaries market and sell annuity products.

Since 2016, the DOL has issued various regulations expanding the definition of "investment advice" and broadening the circumstances under which distributors and manufacturers of insurance and annuity products could be considered "fiduciaries" and subject to certain standards in providing advice. On December 15, 2020, the DOL issued regulatory action to reinstate the pre-2016 regulatory definition of fiduciary advice. In the preamble to Prohibited Transaction Exemption (PTE) 2020-02, however, the DOL announced a new interpretation of parts of the regulation that broadens the circumstances under which producers, including insurance producers, could be considered fiduciaries under ERISA in connection with recommendations to "rollover" assets from a qualified retirement plan to an IRA or from an IRA to another IRA. For this purpose, "IRA" includes individual retirement annuities. This guidance reverses an earlier DOL interpretation suggesting that rollover advice by someone who was not already a fiduciary to a plan did not constitute investment advice giving rise to a fiduciary relationship. In connection with the broadened application of the fiduciary definition, the DOL's PTE 2020-02 allows fiduciaries to receive compensation in connection with providing investment advice, including advice about rollovers, that would otherwise be prohibited as a result of their fiduciary relationship to the ERISA Plan, a participant in the ERISA Plan, or an IRA owner. On April 23, 2024, the Department of Labor published the final version of the fiduciary rule and certain prohibited transaction exemptions, including PTE 84-24 and PTE 2020-02. The effective date of September 23, 2024, is currently on hold due to legal challenges. Two federal district courts in Texas issued stays on the implementation and the DOL filed an appeal to these decisions. The appeals were later dismissed on November 28, 2025. There has been indication the DOL may revisit addressing the rule in 2026 and we will continue to monitor the situation to determine if any update would impact our business.

Notes to the Financial Statements

14. Liabilities, Contingencies and Assessments (Continued)

In addition to the matters previously discussed, the Company is routinely involved in litigation and other proceedings, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. At present, no contingencies related to pending litigation and regulatory matters are considered material in relation to the financial position of the Company.

Estimates of possible losses or ranges of losses for particular matters cannot, in the ordinary course, be made with a reasonable degree of certainty. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially adversely affected by an ultimate unfavorable resolution of pending litigation and regulatory matters.

15. Leases - None

16. Information About Financial Instruments With Off-Balance-Sheet Risk And Financial Instruments With Concentrations of Credit Risk

1. Face Amount of the Company's Financial Instruments with Off-Balance-Sheet Risk

The table below summarizes the face amount of the Company's financial instruments with off-balance-sheet risk:

		Assets		Liabilities	
		2025	2024	2025	2024

2. The Company's derivatives have off-balance sheet risk. See Note 8 for information regarding the Company's derivative instruments.

3. The Company is exposed to credit-related losses in the event of nonperformance by counterparties on derivative instruments. The Company does not anticipate non-performance by any of these counterparties. Purchasing instruments from financial institutions with high credit ratings minimizes the credit risk associated with such instruments. The amount of exposure is represented by the fair value (market value) at the reporting date less any posted collateral. Collateral support documents are negotiated to further reduce this exposure where deemed necessary. Exchange-traded derivatives are affected through a regulated exchange and positions are marked to market daily.

4. The counterparty may be required to post collateral for any derivative contracts that are entered. The amount of collateral that is required is determined by the market value and credit threshold of the counterparty.

The current credit exposure of the Company's derivative contracts is limited to the fair value at the reporting date less collateral held. Credit risk is managed by entering into transactions with creditworthy counterparties and obtaining collateral where appropriate and customary. The Company also attempts to minimize its exposure to credit risk through the use of various credit monitoring techniques. 100% of the net credit exposure for the Company from derivative contracts is with investment-grade counterparties.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities - None

18. Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans - None

Transfers into and out of Level 3 represent securities carried at lower of cost or fair value resulting in periodic transfers into and out of Level 3 Financial instruments which are characterized as carried at fair value. Transfers into and out of Level 3 may also occur due to changes in valuation sources, or changes in the availability of market observable inputs.

(3) Transfers between fair value hierarchy levels are recognized at the end of the period in which the transfer occurs.

(4) The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured and disclosed at fair value. The techniques utilized in estimating the fair values of financial instruments are reliant on the assumptions used.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

Fair value estimates are based on quoted market prices when available. When quoted market prices are not available, the Company utilizes commercially available pricing vendors that utilize observable market inputs, like recent trading activity, to derive fair value. When vendor prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates the fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect risk inherent in a particular methodology, model or input employed.

The Company's financial assets and liabilities carried at estimated fair value have been classified, for disclosure purposes, based on a hierarchy defined by current accounting guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The levels of the fair value hierarchy are as follows:

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.
- Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability.

  Level 2 inputs include the following:
  1. Quoted prices for similar assets or liabilities in active markets,
  2. Observable inputs other than quoted market prices, and
  3. Observable inputs derived principally from market data through correlation or other means.

- Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

Assets and liabilities are valued as discussed below in part C.

(5) See parts (1) through (4) above.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

Bonds, cash equivalents and short-term investments – The Company obtains the fair value for most marketable, public securities without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. If the Company cannot value public security with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3. The Company values privately placed securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer. In some instances, the Company uses a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. Privately placed securities are classified as Level 2 or 3.

Preferred stocks and common stocks unaffiliated – The Company values equity securities traded on an exchange as Level 1. Private equities or equity securities not traded on an exchange and are priced by a commercial pricing service are classified as Level 2, and the securities priced by an internal model are classified as Level 3. In addition, unaffiliated common stocks include FHLB stock, which is carried at fair value, which is presumed to be par because it can only be redeemed by the bank and is classified as Level 2.

Mortgage loans – The Company estimates mortgage loans on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Policy loans – The fair value of policy loans classified as Level 2 is equal to the carrying value of the loans, which are collateralized by the cash surrender value of the associated insurance contracts.

Derivatives (including separate account group annuity and index-linked annuity) – Derivative contracts can be exchange traded or over-the-counter. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, measures of volatility, prepayment rates, and correlation of the inputs. The Company considers and incorporates counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. The Company also evaluates and includes its own nonperformance risk in valuing derivatives. The majority of the Company's derivatives trade are in liquid markets; therefore, the Company can verify model inputs and model selection does not involve significant management judgment and are classified within Level 2. If the Company cannot verify model inputs and model selection does involve significant management judgment, the derivatives are classified as Level 3.

Other invested assets – Within other invested assets, partnerships are valued based on net asset value information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. These investments are reported in the Net Asset Value column. Other than partnerships, other invested assets may include surplus notes and other investments with bond or stock characteristics and the Company attempts to value these using several commercial pricing services, which would be classified as Level 2 assets. If the Company cannot value with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3 assets.

Separate account assets (variable products) – Separate account assets classified as Level 2 are valued based on the fair value of the underlying funds. Financial instruments within these separate accounts included in the NAV column are valued using the same fair value assumptions and methods utilized for other invested assets in the general account. Fair values and changes in the fair values of the underlying funds accrue directly to the policy owners and are not included in the Company's revenues and expenses or surplus.

Separate account assets (group annuity and index-linked annuity) – Financial instruments within these separate accounts classified as Level 2 and 3 or included in the NAV column are valued using the same fair value assumptions and methods utilized in the general account.

Repurchase agreements - The carrying value of the repurchase agreements liability approximates fair value and is reported as level 2.

Deposit-type contracts (including separate account group annuity and funding agreements) – Deposit-type contracts classified as Level 3 include single premium immediate annuities (SPIA) and supplemental contracts. Fair value of SPIA and supplemental contracts are calculated by discounting best estimate cash flows based on market interest rate assumptions. Fair value of funding agreements and guaranteed interest contracts are calculated by discounting future cash flows using market rates on the valuation date, and are classified as Level 2.

D. Not Practicable to Estimate Fair Value - None

E. Nature and Risk of Investments Reported at NAV

The Company invests in certain non-fixed income, alternative investments in the form of limited partnerships (investment funds) which are reported at NAV. Adjustments to the carrying amount reflect the Company's pro rata ownership percentage of the operating results as indicated by NAV in the investment fund financial statements. The NAV from the investment fund financial statements can be on a lag of up to three months when investee information is not received in a timely manner. These investments are listed in the NAV column of the fair value tables above as this is the primary method for reporting fair value for these investments.

As of December 31, 2025, the Company's general and separate accounts have $5,523.7 million unfunded commitments to invest in these investment funds. See Note 6 for additional details on the Company's reporting of unfunded commitments.

F. Subprime-Mortgage-Related Risk Exposure

(1) The Company engages in direct lending to the subprime markets. The Company's exposure to subprime risk is primarily limited to whole mortgage loans and investments within the fixed maturity investment portfolio in the form of securities collateralized by mortgages that have characteristics of subprime lending.

The Company generally defines subprime whole mortgage loans as borrowers with impaired credit history and lower FICO scores. In 2025 and 2024, the Company invested in residential whole loans which consisted of borrowers with lower FICO scores. The price paid for the residential loans factored in the consideration of the borrower's ability to repay along with the overall credit profile of the loan. The Company will continue to monitor the performance of the subprime residential mortgage loans along with performance expectations.

The Company's portfolio also contains residential mortgage backed securities that include subprime mortgage exposure. The risk of such defaults is generally higher in the case of subprime mortgages. The acquisition value of these residential mortgage backed securities factored in the consideration of that default risk. Quarterly, we monitor and evaluate the undiscounted expected future cash flows associated with these residential mortgage backed securities based on updates to key assumptions.

31. Reserves for Life Contracts and Annuity Contracts (Continued)

The Company offers riders on its fixed annuities which provides for future withdrawal and death benefits. In accordance with the NAIC's Accounting Practices and Procedures Manual, the rider should be reserved for under the revised Actuarial Guideline 33 (AG33). The Company requested and received approval to use an alternative methodology under the Practical Consideration section of AG 33 from the Insurance Division, Department of Commerce of the State of Iowa for policies issued prior to January 1, 2014. The reserve held at December 31, 2025 was based on Actuarial Guideline 43 (AG43) for policies issued prior to January 1, 2014, the approved alternative method for these contracts. For policies issued January 1, 2014 and after, the reserve was based on AG33.

2. For policies administered by Accordia, mean reserves for substandard policies are determined by computing the regular mean reserve for the policy and holding in addition one half of the extra premium charge for the year.

   For policies administered by Protective Life, extra premiums are charged according to underwriting classifications. For Debit-Ordinary substandard policies, reserves are calculated using the same interest rate as for standard policies but using multiples of standard rates of mortality. For regular Ordinary substandard policies, reserves are calculated by computing the regular reserve for the plan and adding one-half (1/2) of the extra premium charge for the year to that reserve.

3. As of December 31, 2025, the Company had $1,790.7 million of insurance in force for which the gross premiums were less than the net premiums according to the standard of valuation set by the State of Iowa. Reserves to cover the above shortfall in premium totaled $30.9 million at December 31, 2025, are calculated annually, and were included in reserves on Page 3, Line 1 (Exhibit 5, Miscellaneous Reserves).

4. The tabular interest at December 31, 2025, (Page 7, Line 4), tabular less actual reserve released (Page 7, Line 5) and tabular cost (Page 7, Line 9) have been determined by basic data for Fixed and Indexed Annuities and by formula for Life products, Variable Annuity with Guarantees, and Life Contingent Payouts as described in the NAIC instructions for Page 7.

5. The tabular interest on funds not involving life contingencies is calculated as the product of the mean fund balance and the average valuation interest rate.

A. Separate Account Activity

(1) The Company maintains five types of separate account arrangements. The first arrangement includes one separate account containing funding agreement policies issued to the FHLB, known as Separate Account – Funding Agreements. The second arrangement includes three separate accounts consisting of previously sold individual variable annuity and variable universal life products. The third arrangement, known as Group Annuity Separate Accounts, includes separate accounts supporting annuities payable under group fixed annuity contracts issued to various employers, or trusts established by such employers, in respect of those employers' pension plans. The fourth arrangement includes two separate accounts consisting of index-linked deferred annuity contracts, known as Index-Linked Deferred Annuity Separate Accounts. The fifth arrangement, known as Private Placement Variable Annuity Separate Account, supports private placement variable deferred annuities issued by the Company to accredited investors.

(2) Separate account assets legally insulated from the general account claims

In accordance with the products and transactions recorded within the separate account, some assets are considered legally insulated whereas others are not legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account. The assets legally insulated from the general account as of December 31, 2025, are attributed to the following separate account arrangements:

Product/Transaction	Legally Insulated Assets	Separate Account Assets (Not Legally Insulated)

The Company's variable annuity and variable life separate accounts have not paid risk charges for the past five years.

The Company's Group Annuity Separate Account and Index-Linked Deferred Annuity Separate Account liabilities are guaranteed by the general account. The Company's general account has not paid towards separate account guarantees for the past five years.

b. 2024 $ 24,555,763
c. 2023 $ 22,954,075

(4) Securities lending transactions and repurchase/reverse repurchase agreements within the separate account

The separate account participates in repurchase agreements with unaffiliated institutions under the same terms and framework as the general account. Under these agreements, the separate account lends bonds and receives cash. The program is used for routine liquidity management, and there are no material variations from the general account program. As of December 31, 2025, the separate account sold bonds with a fair value of $110.0 million and received $90.2 million of cash.

B. General Nature and Characteristics of Separate Accounts Business

Separate Account - Funding Agreements: The funding agreement policies are secured by the assets in the Company's general account which are not subject to claims that arise out of any other business of the Company. The funding agreement policies may not be accelerated by the holder unless there is a default under the agreement, but the Company may retire the funding agreement policies at any time. The assets and liabilities of this separate account are carried at the general account basis.

Variable Annuity and Variable Life Separate Accounts: Net investment experience of these separate accounts is credited directly to the policyholder and can be positive or negative, as determined by the performance and/or fair value of the investments held in the separate account. The variable annuities generally provide an incidental death benefit of the greater of account value or premium paid. The assets and liabilities of these accounts are carried at fair value. This business has been included in column 4 of the table below.

Group Annuity Separate Accounts: The group fixed annuity contracts obligate the Company's general account to make annuity payments if the separate account is not able to do so. The assets and liabilities of this separate account are carried at the general account basis.

Index-linked Deferred Annuity Separate Accounts: The index-linked annuity separate accounts support registered index-linked deferred annuity contracts issued by the Company. The assets and liabilities are carried at the general account basis.

Private Placement Variable Annuity Separate Account: The assets of this separate account are carried at fair value. Net investment experience is credited directly to the policyholder and can be positive or negative, as determined by the performance or fair value of the investments held. This business has been included in column 4 of the table below.
