# Ideal Power Reports Second Quarter 2017 Financial Results

## Management to Host Conference Call at 4:30 p.m. ET

AUSTIN, Texas, Aug. 10, 2017 (GLOBE NEWSWIRE) -- [Ideal Power Inc.](#) (NASDAQ:IPWR), an innovative power conversion technology company, reported results for the three and six months ended June 30, 2017.

### ***Key Second Quarter 2017 and Subsequent Highlights:***

- Signed a master purchase agreement with NEXTracker for solar-plus-storage products utilizing the company's SunDial™ series PV string inverter and Stabiliti™ power conversion systems (PCS) for commercial, industrial and utility sites throughout North America.
- Received a purchase order for 35 units of Stabiliti™ 30kW PCS from an existing global technology customer for a solar-plus-storage integration project in a California school district.
- Partnered with W Energies Solar One to deploy a grid-resilient commercial solar-plus storage microgrid system in Texas.
- Partnered with Azimuth Energy for a 300 kilowatt / 500 kilowatt-hour remote solar-plus-storage microgrid in New York commercial facility.
- Deployed six Stabiliti 30C3 multi-port PCS in a collaborative hybrid microgrid project for a commercial facility in Saint Croix, U.S. Virgin Islands.
- Strengthened patent estate: currently have 71 issued patents, including 29 issued patents for B-TRAN™ with a similar number of patent applications pending.

"The second quarter of 2017 was highlighted by our new strategic initiative in the solar-plus-storage and microgrid markets and the completed product migration to our next generation 30kW Stabiliti and SunDial series," said Dan Brdar, Chief Executive Officer. "The shift in our strategic direction in combination with our innovative multi-port power conversion systems has opened doors in these markets and contributed to multiple orders in the second quarter and a major order in the third quarter with a global technology company. Unlike the standalone storage market, which has been slow to transact, the solar-plus-storage market leverages the mature and global solar market and is already transacting as such storage solves key end customer demand management, backup and critical load support problems that solar-only solutions cannot."

Concluded Brdar, "The third quarter of 2017 is starting off on a strong note as we recently signed a master purchase agreement with NEXTracker for our SunDial™ series PV string inverter and Stabiliti™ PCS for commercial, industrial and utility sites throughout North

America.”

## **Second Quarter 2017 Financial Results**

- Q2 2017 product revenue remained unchanged at \$0.3 million versus Q2 2016.
- Q2 2017 gross margins were negative 202% compared to 7.2% gross margins in Q2 2016, primarily attributable to the non-cash write down of legacy product inventory. The company discontinued its legacy product families and completed its transition to the company’s next generation 30kW Stabiliti™ and SunDial™ product families during Q2 2017.
- Q2 2017 net loss was \$3.2 million compared to \$2.5 million in Q2 2016, largely as a result of non-cash charges.
- Q2 2017 cash used in operating and investing activities was \$2.0 million compared to \$2.5 million in Q1 2017 and \$2.7 million in Q2 2016.
- Cash and cash equivalents totalled \$13.3 million as of June 30, 2017, with no long-term debt outstanding.

“The second quarter of 2017 was a period of transition for the company as we shifted our strategic focus from the slow-moving standalone storage market to the solar-plus-storage and microgrid markets, and discontinued our legacy product families in advance of the new UL1741 SA standards,” said Tim Burns, Chief Financial Officer. “Certification to this new standard will be required in many U.S. markets and power conversion products not certified to this standard will not be allowed to be installed in these markets after October 9<sup>th</sup>. In connection with this transition, we recorded a write-down of our finished goods and component inventory for our legacy products. In addition, as a result of our exclusive focus on our next generation 30kW products and our aggressive company-wide cost reduction plan, we were able to reduce our cash burn to \$2.0 million in the second quarter, a level lower than reported in any of the preceding eight quarters.”

“We now have a clean slate for what we believe will be a revenue ramp beginning in the second half of 2017 and accelerating in 2018 driven by growth in the solar-plus-storage and microgrid markets,” said Ideal Power Chairman Lon Bell. “While we believe the growth will be modest in the third quarter, we anticipate a strong fourth quarter to finish the year.”

## **Conference Call Details**

Ideal Power CEO Dan Brdar and CFO Tim Burns will host the conference call, followed by a question and answer period.

To access the call, please use the following information:

Date:	Thursday, August 10, 2017
Time:	4:30 p.m. ET, 1:30 p.m. PT
Toll-free dial-in number:	1-877-874-1586
International dial-in number:	1-719-457-2634
Conference ID:	7601500

Please call the conference telephone number 5-10 minutes prior to the start time. An operator will register your name and organization. If you have any difficulty connecting with the conference call, please contact MZ Group at 1-949-491-8235.

The conference call will be broadcast live and available for replay at <http://public.viavid.com/index.php?id=125651> and via the investor relations section of the Company's website at [www.IdealPower.com](http://www.IdealPower.com).

A replay of the conference call will be available after 7:30 p.m. Eastern time through September 10, 2017.

Toll-free replay number: 1-844-512-2921  
International replay number: 1-412-317-6671  
Replay ID: 7601500

### **About Ideal Power Inc.**

Ideal Power (NASDAQ:IPWR) is a power conversion technology company that delivers efficient and compact solutions to system integrators and project developers to connect distributed energy resources to the grid. Ideal Power's products offer enhanced performance for battery-enabled applications at a competitive cost, backed by first-rate customer service. With its patented power conversion technology, Ideal Power supports a broad set of growing markets, including solar photovoltaics, battery energy storage, mobile power and microgrids. For more information, visit [www.IdealPower.com](http://www.IdealPower.com).

### **Safe Harbor Statement**

All statements in this release that are not based on historical fact are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and the provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements in this press release include our statements that we expect revenue to ramp in the second half of 2017 and 2018 driven by growth in the solar-plus-storage and microgrid markets, that we anticipate a strong fourth quarter to finish the year, that the shift in our strategic direction will be successful, and that the purchase agreement with NEXTracker will be successful. While management has based any forward-looking statements included in this release on its current expectations, the information on which such expectations were based may change. These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of risks, uncertainties and other factors, many of which are outside of our control that could cause actual results to materially differ from such statements. Such risks, uncertainties, and other factors include, but are not limited to, whether the patents for our technology provide adequate protection and whether we can be successful in maintaining, enforcing and defending our patents, the timing and impact of regulatory developments affecting the markets for our products, our inability to predict with precision or certainty the pace of development and commercialization of our advanced technologies, unanticipated costs in connection with the discontinuation our legacy product families, the uncertainty of whether the demand for energy storage products will grow at a pace consistent with our expectations, whether our backlog will translate into revenue in future periods, whether demand for our products, which we believe are disruptive, will develop, and whether we can compete successfully with other manufacturers and suppliers of power conversion products, both now and in the future, as new products are developed and marketed and other risks and uncertainties set forth in our quarterly and annual reports filed with the Securities and Exchange Commission. Furthermore, we operate in a highly competitive and rapidly changing environment where new and unanticipated risks may arise. The availability and amount of government incentive programs affect our customers

spending patterns, and adverse changes or developments in such programs – such as the SGIP in California – have materially and adversely affected our orders, net sales, gross profit and net income, and may do so again in the future. Accordingly, investors should not place any reliance on forward-looking statements as a prediction of actual results. We disclaim any intention to, and undertake no obligation to, update or revise forward-looking statements.
