Helios Technologies Launches PowerView™ U35, the First Round Display in the Ultimate Series

SARASOTA, Fla.--(BUSINESS WIRE)-- Helios Technologies, Inc. (NYSE: HLIO) (“Helios” or the “Company”), a global leader in highly engineered motion control and electronic controls technology, has unveiled the PowerView™ U35, the first round display in the Ultimate Series. The Ultimate Series represents Helios’ next-generation portfolio of premium, rugged displays, built to deliver high performance and reliability in demanding environments. The PowerView™ U35 is offered through Enovation Controls, part of Helios’ Electronics segment, and will be available for order by the end of calendar year 2024.

“The PowerView™ U35 sets a new standard for rugged displays, offering high visibility, advanced processing power, and superior durability,” said Sean Bagan, Interim President, Chief Executive Officer and Chief Financial Officer of Helios. “This product underscores Helios' commitment to delivering cutting-edge technology and meeting the highest expectations for quality and reliability in extreme conditions across various industries. It also exemplifies our strategy of making premium standalone components that can be easily combined with our other offerings in a sub-system solution.”

Next-Level Display Technology for Extreme Environments

The PowerView™ U35 combines a high-speed dual-core processor with an optically bonded, anti-glare 3.5-inch screen, achieving exceptional visibility and usability in challenging lighting conditions. With a 1000 Nit brightness and IP67 rating, it is engineered for uncompromised performance and resilience.

Ideal for outdoor applications, the U35 is designed with intuitive functionality and is equipped with interfaces like CAN, USB, and Wi-Fi, along with both digital and analog inputs and outputs, making it adaptable for a wide array of industrial and specialized applications.

Robust Features and Versatile Application

Built with Enovation Controls' trusted engineering expertise, the PowerView™ U35 brings together a powerful hardware platform and software capabilities. Its extended operating temperature range (-30°C to +70°C) and high-durability construction make the display ideal for the most extreme operating environments. These rugged qualities ensure the U35

performs reliably, even in demanding applications where durability and clarity are essential.

“The Ultimate Series, featuring the U35, continues Helios’ legacy of delivering top-tier solutions for equipment used in rugged, all-weather conditions, reinforcing its position as a leader in advanced motion and electronic control technology,” said Lee Wichlacz, President, Electronics of Helios.

About Enovation Controls

Enovation Controls is a fast-growing and innovative manufacturer of electronic controls and displays for diverse markets. As an international leader in fully tailored solutions, Enovation Controls offers a broad range of displays, controls, and instrumentation products for various applications. With an internationally diverse team, we serve customers around the world through our global sales, manufacturing, and engineering operations. Enovation Controls partners directly with OEMs and supports a worldwide network of authorized distributors and system integrators. Visit us at www.enovationcontrols.com and follow us on LinkedIn.

About Helios Technologies

Helios Technologies is a global leader in highly engineered motion control and electronic controls technology for diverse end markets, including construction, material handling, agriculture, energy, recreational vehicles, marine and health and wellness. Helios sells its products to customers in over 90 countries around the world. Its strategy for growth is to be the leading provider in niche markets, with premier products and solutions through innovative product development and acquisition. The Company has paid a cash dividend to its shareholders every quarter since becoming a public company in 1997.
