## Tecogen Obtains First Order for New Tecofrost Package

**WALTHAM, MA / ACCESSWIRE / October 2, 2019 / [Tecogen Inc.](#)** (NASDAQ:TGEN), a clean energy company providing ultra-efficient, clean, natural gas driven on-site power, heating, and cooling equipment, is pleased to announce the sale of a Tecofrost ammonia refrigeration system for an ice skating facility located in Massachusetts. It is the first Tecofrost sale since the product was re-introduced earlier in the year and includes Tecogen's Ultera emission technology. The system will provide cooling for ice making, with waste heat recovery used for dehumidification, ice resurfacing, domestic hot water, and space heat.

"Many skating rinks rely on industrial refrigeration systems to maintain a professional quality ice surface," noted Stephen Lafaille, Director of Business Development at Tecogen. "Tecofrost is the only gas engine driven ammonia refrigeration system that is a drop-in replacement for electric systems and associated high operating costs. In addition to the reduced electric costs for the facility, the waste heat recovery of Tecofrost provides additional savings for building operators."

Industrial ammonia refrigeration systems are used in a variety of low-temp cooling applications due to their high efficiency and scalability. A typical food processing facility would likely have a refrigeration plant consisting of multiple compressor systems that serve different cooling loads throughout the facility. The Tecofrost system can either be a drop-in replacement for one or more of the existing electric compressor systems, or supplement the plant as a low operational cost "first on/last off" machine.

"We are excited for the potential of Tecofrost to open up new industrial process cooling markets that could not be served with our Tecochill product," noted Benjamin Locke, Tecogen CEO. "Previously, markets such as food and beverage operations, meat and dairy processing, and cold storage were not a fit for our chillers. The re-introduction of Tecofrost includes improvements such as a new compressor with higher efficiency, and our patented Ultera emission aftertreatment package, ensuring strong operational cost savings and clean emissions that will help drive new sales. We are approaching these markets with our manufacturing partner Vilter, which allows us to leverage their sales channels into new markets and geographies. We expect additional orders for Tecofrost as many facility operators look to reduce energy costs without sacrificing system performance."

### **About Tecogen**

[Tecogen Inc.](#) designs, manufactures, sells, installs, and maintains high efficiency, ultra-clean, cogeneration products including natural gas engine-driven combined heat and power, air conditioning systems, and high-efficiency water heaters for residential, commercial, recreational and industrial use. The company provides cost efficient, environmentally friendly

and reliable products for energy production that, through patented technology, nearly eliminate criteria pollutants and significantly reduce a customer's carbon footprint.

In business for over 35 years, Tecogen has shipped more than 3,000 units, supported by an established network of engineering, sales, and service personnel across the United States. For more information, please visit [www.tecogen.com](http://www.tecogen.com) or contact us for a free [Site Assessment](#).

Tecogen, InVerde e+, Ilios, Tecochill, Tecofrost, Tecopower, and Ultera are registered or pending trademarks of Tecogen Inc.

### **Forward Looking Statements**

This press release contains "forward-looking statements" which may describe strategies, goals, outlooks or other non-historical matters, or projected revenues, income, returns or other financial measures that may include words such as "believe," "expect," "anticipate," "intend," "plan," "estimate," "project," "target," "potential," "will," "should," "could," "likely," or "may" and similar expressions intended to identify forward-looking statements. These statements are only predictions and involve known and unknown risks, uncertainties, and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update or revise any forward-looking statements.

In addition to those factors described in our Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q under "Risk Factors," among the factors that could cause actual results to differ materially from past and projected future results are the following: fluctuations in demand for our products and services, competing technological developments, issues relating to research and development, the availability of incentives, rebates, and tax benefits relating to our products and services, changes in the regulatory environment relating to our products and services, integration of acquired business operations, and the ability to obtain financing on favorable terms to fund existing operations and anticipated growth.
