

Perimeter Medical Imaging Presents at SPIE Photonics West 2016

Perimeter Medical Imaging, Inc., a developer of real time imaging systems for in-surgery tissue assessment, today presented an invited technical talk on the "Development and clinical translation of OTIS: a wide-field OCT imaging device for ex-vivo tissue characterization". Perimeter is honoured to have been invited to present as part of a special mini-symposium on Optical Rapid Ex-Vivo Tissue Assessment. The presentation, which outlined the development and validation work done to date on Perimeter's automated optical coherence tomography tissue imaging solution, was given by Ms. Elizabeth Munro, Perimeter's Engineering Operations Lead and long-time SPIE member. Ms. Munro also acted as a Session Chair for other Optical Rapid Ex-Vivo Tissue Assessment presentations.

About SPIE Photonics West / BIOS

BIOS is the world's largest and most prestigious international biomedical optics conference, encompassing clinical, translational, and fundamental research and development in the field of biomedical optics and photonics. It provides a premier technical forum for reporting and learning about the latest research and development, as well as for launching new applications and technologies.

BIOS is part of SPIE Photonics West, the largest biophotonics, laser, optoelectronics, and industrial manufacturing event in North America, with more than 22,000 exhibition attendees including 5,500 technical attendees from more than 50 countries.

About Perimeter Medical Imaging Inc.

Perimeter Medical Imaging develops, patents and commercializes advanced surgical imaging tools that allow surgeons, radiologists and pathologists to better assess microscopic tissue structures during the surgical procedure. Perimeter's OTIS™ is the only solution that provides clinicians with an ultra-high resolution image of the entire surface of the removed tissue specimen, providing accurate information in real time, enabling better decisions and ultimately reducing the need for follow-on second surgeries. Perimeter is a privately owned Canadian company. For more information, visit www.perimetermed.com.
