Viveve to Participate in the H.C. Wainwright Global Life Sciences Virtual Conference

ENGLEWOOD, CO / ACCESSWIRE / March 2, 2021 Viveve Medical, Inc.

(NASDAQ:VIVE), a medical technology company focused on women's intimate health, today announced that Scott Durbin, chief executive officer, will participate in the virtual H.C. Wainwright Global Life Sciences Conference, March 9 - 10, 2021. Mr. Durbin will deliver the Viveve corporate presentation and meet with investment community members during the conference. Due to the coronavirus pandemic, all presentations and meetings will be virtual at the conference.

Event:

H.C. Wainwright Global Life Sciences Conference
March 9 -10, 2021 (Virtual)

Presentation Webcast:

Tuesday, March 9, 2021, 7:00 AM ET
(start of on-demand webcast availability)

The virtual corporate presentation will be available starting at 7:00 AM ET on the Investor section of the Viveve website at ir.viveve.com. Interested parties may continue to access an archived version of the presentation on the Company's website for 90 days after the event concludes.

About Viveve

Viveve Medical, Inc. is a medical technology company focused on women's intimate health. Viveve is committed to advancing new solutions to improve women's overall well-being and quality of life. The internationally patented Viveve® System incorporates Cryogen-cooled Monopolar Radiofrequency technology to uniformly deliver volumetric heating while gently cooling surface tissue to generate neocollagenesis in a single in-office session. In the United States, the Viveve® System is cleared by the Food and Drug Administration (FDA) for use in general surgical procedures for electrocoagulation and hemostasis. International regulatory approvals and clearances have been received for vaginal laxity and/or improvement in sexual function indications in more than 50 countries.

Viveve continues to advance its clinical development program in stress urinary incontinence (SUI). Recently reported U.S. Food and Drug Administration (FDA) approved changes to the U.S. pivotal PURSUIT trial protocol are intended to strengthen the overall study and its potential to achieve its primary efficacy endpoint. Study changes including an increase in the trial's size and more strict patient selection criteria were a result of guidance from Viveve's Clinical Advisory Board upon review of positive results from the Company's SUI feasibility

and preclinical studies. Viveve received FDA approval of its IDE application to conduct the multicenter, randomized, double-blinded, sham-controlled PURSUIT trial for improvement of SUI in women in July 2020 and FDA approval of its requested amendments to the IDE protocol as reported on December 10, 2020. Initiation of the trial was reported on January 21, 2021 and subject enrollment is underway. If positive, results from the PURSUIT trial may support a new SUI indication in the U.S.
