# TC BioPharm Donates to Leukemia and Lymphoma Society in Sponsorship of World AML Day

EDINBURGH, Scotland , April 21, 2022 /PRNewswire/ -- TC Biopharm (Holdings) PLC ("TC Biopharm" or the "Company") (NASDAQ: TCBP) (NASDAQ: TCBPW), a clinical stage biotechnology company developing platform allogeneic gamma-delta T cell therapies for cancer and viral indications, announced today that it has made a donation to the [Leukemia and Lymphoma Society](#) in order to help bring awareness to World AML Day.

Acute myeloid leukemia (AML) is a cancer of the blood and bone marrow. It is the most common type of acute leukemia in adults. It can sometimes spread to other parts of the body including the lymph nodes, liver, spleen, and central nervous system.

"TC BioPharm is proud to help generate awareness about AML as we continue to develop novel cell therapy treatments," said Bryan Kobel, CEO of TC BioPharm. "Going forward, we will continue to partner with leading healthcare institutions as we progress our allogeneic unmodified gamma delta therapeutic, OmniImmune®, through phase 2b/3 clinical trials in Acute myeloid leukemia."

## About The Leukemia & Lymphoma Society (LLS)

The Leukemia & Lymphoma Society, a 501(c)(3) charitable organization founded in 1949, is the largest voluntary health organization dedicated to fighting blood cancer in the world. The LLS's mission is to cure leukemia, lymphoma, Hodgkin's lymphoma and myeloma, and improve the quality of life of patients and their families.

## About TC BioPharm (Holdings) PLC

TC BioPharm is a clinical-stage biopharmaceutical company focused on the discovery, development and commercialization of gamma-delta T cell therapies for the treatment of cancer and viral infections with human efficacy data in acute myeloid leukemia. Gamma-delta T cells are naturally occurring immune cells that embody properties of both the innate

and adaptive immune systems and can intrinsically differentiate between healthy and diseased tissue. TC BioPharm uses an allogeneic approach in both unmodified and CAR modified gamma delta t-cells to effectively identify, target and eradicate both liquid and solid tumors in cancer.

TC BioPharm is the leader in developing gamma-delta T cell therapies, and the first company to conduct phase II/pivotal clinical studies in oncology. The Company is conducting two investigator-initiated clinical trials for its unmodified gamma-delta T cell product line - Phase 2b/3 pivotal trial for OmniImmune® in treatment of acute myeloid leukemia and Phase I trial for ImmuniStim in treatment of Covid patients using the Company's proprietary allogenic CryoTC technology to provide frozen product to clinics worldwide. TC BioPharm also maintains a robust pipeline for future indications in solid tumors and other aggressive viral infections as well as a significant IP/patent portfolio in the use of CARs with gamma delta t-cells and owns our manufacturing facility to maintain cost and product quality controls.
