SEI's Institutional Nonprofit Business Adds More Than \$500 Million in New Assets

Company Continues to Experience Growth in Nonprofit Sector

OAKS, Pa., April 19 /PRNewswire-FirstCall/ -- SEI (Nasdaq: SEIC) today announced continued sales growth in its foundation and endowment institutional business with the addition of more than \$500 million in new nonprofit assets under management during the previous two quarters. New clients have cited SEI's expertise in addressing the increasingly complex liquidity needs of nonprofits as one of the differentiators in the selection process. Other key factors include diversification on the asset class and manager level, customized socially responsible investing options and SEI's ability to take on fiduciary responsibility for manager evaluation, termination and replacement.

SEI currently has more than 100 nonprofit clients and more than \$4 billion in nonprofit assets under management.

"Investment committees see the value in delegating manager oversight to allow the committee to focus on more strategic initiatives around asset allocation, use of new asset classes and the overall mission of the organization," said Carolyn McLaurin, Vice President and Managing Director of SEI's Nonprofit Group. "This new business continues to validate this trend."

Through its outsourced model, SEI takes on fiduciary responsibility for researching, selecting and monitoring managers that fit the ongoing strategies for the asset allocation set forth by the client's investment committee. In addition to manager oversight, SEI's model provides clients with strategic advice around asset allocation decisions and their impact on the goals and objectives of the organization.

About SEI's Institutional Group
