IceCure Expands ProSense® ChoICE Study for Low-Risk Breast Cancer adding Legacy Health in Portland, OR as U.S. Clinical Site

CAESAREA, Israel, Oct. 6, 2026 /PRNewswire/ -- [IceCure Medical Ltd.](#) (NASDAQ: ICCM) ("IceCure," "IceCure Medical" or the "Company"), developer of minimally-invasive cryoablation technology that destroys tumors by freezing as an option to surgical tumor removal, today announced the addition of Legacy Health in Portland, Oregon, with its Legacy Medical Group—Surgical Oncology at Good Samaritan Medical Center, as a new U.S. clinical site for its post-marketing study (the "ChoICE Study") evaluating the use of ProSense® cryoablation in the local treatment of low-risk breast cancer.

The ChoICE study's co-primary investigator, Nathalie Johnson, M.D., FACS, serves as Senior Medical Director of the <https://www.legacyhealth.org/services-and-resources/services/adult/cancer-institute/Recently-Diagnosed/Breast-cancer/Breast-cancer-program> Legacy Cancer Institute. Dr. Johnson will provide clinical leadership for the Legacy Good Samaritan site's participation in the ChoICE Study where physicians, Marco Aru and Jennifer Garreau, are also co-investigators at the site. The Legacy Health Oncology Clinical Research team will be supporting enrollments to this study. The addition of Legacy Health further expands the U.S. clinical network participating in the ChoICE Study, which is designed to further evaluate the safety and effectiveness of ProSense® as a minimally invasive alternative to surgery for eligible patients with low-risk breast cancer.

The ChoICE Study was approved by the U.S. Food and Drug Administration ("FDA") as a post-market study and is expected to enroll approximately 400 patients across up to 30 clinical sites in the United States. The study is being conducted under a standardized protocol designed to generate additional real-world clinical data on ProSense® in the treatment of low-risk breast cancer.

"As a nationally recognized breast cancer expert, we are excited to welcome Dr. Nathalie Johnson and the Legacy Good Samaritan site to the ChoICE Study," said Eyal Shamir, Chief Executive Officer of IceCure Medical. "With Dr. Johnson serving as Co-Primary Investigator, we believe her background, experience and expertise, in addition to the inclusion of the Legacy Good Samaritan site represents an important milestone for the study. We deeply value her clinical leadership and look forward to continuing our collaboration as we expand patient access and bolster the clinical evidence supporting cryoablation for low-risk breast cancer."

About IceCure Medical

IceCure Medical (NASDAQ: ICCM) develops and markets advanced liquid-nitrogen-based cryoablation therapy systems for the destruction of tumors (benign and cancerous) by freezing, as a safe and effective minimally invasive option to surgical tumor removal, with the primary focus areas being breast, kidney, bone and lung cancer. The Company's flagship ProSense® system is marketed and sold worldwide for the indications cleared and approved to date including in the U.S., Europe, and Asia.

ProSense® cryoablation became the first-and-only medical device cleared by the FDA for the local treatment of breast cancer in patients aged 70 years and older with biologically low-risk tumors ≤1.5 cm in size who are treated with adjuvant endocrine therapy, including patients who are not eligible for surgery.

About Legacy Health

Legacy Health is a large, nonprofit, integrated health system with seven hospital campuses serving Oregon and Southwest Washington, including a full-service children's hospital and a behavioral health emergency services facility. Legacy also operates an extensive ambulatory services network that includes 70 clinic locations and offers a broad continuum of care. The organization is a community system of care with over 14,000 employees in two states. Known for its commitment to high-quality, patient-centered care, Legacy Health has earned a strong reputation for clinical excellence, community partnership, and mission-driven service in the Pacific Northwest. Forward Looking Statements

This press release contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are intended to be covered by the "safe harbor" created by those sections. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, can generally be identified by the use of forward-looking terms such as "believe," "expect," "may," "should," "could," "seek," "intend," "plan," "goal," "estimate," "anticipate" or other comparable terms. For example, the Company

is using forward-looking statements when it discusses: expected patient enrollment in the ChoICE Study; the goals, design and aims of the ChoICE Study; the enrollment and treatment of patients across 30 participating sites; and its belief that the addition of Dr. Nathalie Johnson and the Legacy Health Good Samaritan site represents an important milestone for the ChoICE Study. Historical results of scientific research and clinical and preclinical trials do not guarantee that the conclusions of future research or trials will suggest identical or even similar conclusions. Important factors that could cause actual results, developments and business decisions to differ materially from those anticipated in these forward-looking statements include, among others: the Company's planned level of revenues and capital expenditures; the Company's available cash and its ability to obtain additional funding; the Company's ability to market and sell its products; legal and regulatory developments in the United States and other countries; the Company's ability to maintain its relationships with suppliers, distributors and other partners; the Company's ability to maintain or protect the validity of its patents and other intellectual property; the Company's ability to expose and educate medical professionals about its products; political, economic and military instability in the Middle East, specifically in Israel; as well as those factors set forth in the Risk Factors section of the Company's Annual Report on Form 20-F for the year ended December 31, 2025 filed with the SEC on March 17, 2026, and other documents filed with or furnished to the SEC which are available on the SEC's website, www.sec.gov. The Company undertakes no obligation to update these statements for revisions or changes after the date of this release, except as required by law.
