## ***About Aurinia***

Aurinia is a clinical stage pharmaceutical company focused on the global nephrology market. It is currently enrolling patients in its Phase 2b clinical trial to evaluate the efficacy of its drug, voclosporin, as a treatment for lupus nephritis (“LN”). LN is an inflammation of the kidneys, that if inadequately treated can lead to end-stage renal disease, making LN a serious and potentially life-threatening condition.

Voclosporin is a novel and potentially best in class calcineurin inhibitor (“CNI”) with extensive clinical data in over 2,600 patients in other indications. Voclosporin is made by a modification of a single amino acid of the cyclosporine molecule (a CNI approved for use in transplant patients since 1983). This modification results in a more predictable pharmacokinetic and pharmacodynamic relationship, an increase in potency vs. cyclosporine, an altered metabolic profile, and potential for flat dosing.

Aurinia also has development and commercialization partners in Canada, Israel, South Africa and Greater China. Visit [www.auriniapharma.com](http://www.auriniapharma.com), [www.sedar.com](http://www.sedar.com) and [www.sec.gov](http://www.sec.gov) for more information.
