Alaska LNG Project Selects Lead Terminal Location

ANCHORAGE, Alaska--(BUSINESS WIRE)-- [ExxonMobil](#), BP, ConocoPhillips and TransCanada have selected a site in the Nikiski area on the Kenai Peninsula as the lead site for the proposed Alaska LNG project's natural gas liquefaction plant and terminal.

More than 20 locations were evaluated based on conditions related to the environment, socioeconomics, cost, and other project and technical issues.

"This is a step forward for the Alaska LNG project and shows continued progress toward building Alaska's energy future," said Steve Butt, senior project manager. "The work that we have put into the site selection process gives us confidence that the Nikiski site is the lead location for the LNG plant and terminal. The Nikiski site also results in a pipeline route that provides an access opportunity to North Slope natural gas by the major population centers in Fairbanks, Mat-Su Valley, Anchorage and the Kenai Peninsula."

A number of engineering, technical, regulatory, fiscal, commercial and permitting issues still need to be resolved as work on the potential \$45-65+ billion project progresses. While Nikiski is the lead site, the project team continues to consider other secondary locations. Pipeline routing definition work also continues based on the project summer field work activities, which will be extended south of Livengood.

The companies are continuing to refine the agreed project concept that includes a gas treatment plant located on the North Slope, an 800-mile, 42-inch pipeline with up to eight compression stations and at least five off-take points for in-state gas delivery, and a liquefaction plant and terminal. The teams are currently preparing for more detailed engineering and design work, consistent with previously released plan phases.

A competitive, predictable and durable oil and gas fiscal environment will be required for a project of this unprecedented scale, complexity and cost to compete in global energy markets. The companies remain committed to working with the state to responsibly develop North Slope resources. A successful project could provide a host of economic benefits to Alaskans including state revenues, new job opportunities and access to decades of domestically-produced natural gas for homes and businesses.

CAUTIONARY STATEMENT:

Estimates, expectations, and business plans in this release are forward-looking statements. Actual future results, including ultimate recoveries and project plans, costs, and schedules, could differ materially due to changes in market conditions affecting the oil and gas industry or long-term oil and gas price levels; political or regulatory developments; reservoir

performance; timely completion of development projects; technical or operating factors; and other factors discussed under the heading "Factors Affecting Future Results" in the Investors section of our website (www.exxonmobil.com) and in Item 1A of our most recent Form 10-K. References to "resources" and similar terms include quantities of oil and gas that are not yet classified as proved reserves but that we believe will be produced in the future. The term "project" as used in this release does not necessarily have the same meaning as under SEC Rule 13q-1 relating to government payment reporting.

CAUTIONARY STATEMENT

This release contains statements that are forward-looking statements and involve risks and uncertainties. It is believed that the expectations reflected in these statements are reasonable, but actual results may differ from those expressed in such statements, depending on a variety of factors, including: the specific factors identified in the discussions accompanying such forward-looking statements; industry product supply; demand and pricing; political stability and economic growth in relevant areas of the world; development and use of new technology and successful commercial relationships; the actions of competitors; natural disasters and other changes in business conditions; and wars and acts of terrorism or sabotage.

CONOCOPHILLIPS

CAUTIONARY STATEMENT FOR THE PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

The following presentation includes forward-looking statements. These statements relate to future events, such as anticipated revenues, earnings, business strategies, competitive position or other aspects of our operations or operating results. Actual outcomes and results may differ materially from what is expressed or forecast in such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict such as oil and gas prices; operational hazards and drilling risks; potential failure to achieve, and potential delays in achieving expected reserves or production levels from existing and future oil and gas development projects; unsuccessful exploratory activities; unexpected cost increases or technical difficulties in constructing, maintaining or modifying company facilities; international monetary conditions and exchange controls; potential liability for remedial actions under existing or future environmental regulations or from pending or future litigation; limited access to capital or significantly higher cost of capital related to illiquidity or uncertainty in the domestic or international financial markets; general domestic and international economic and political conditions, as well as changes in tax, environmental and other laws applicable to ConocoPhillips' business and other economic, business, competitive and/or regulatory factors affecting ConocoPhillips' business generally as set forth in ConocoPhillips' filings with the Securities and Exchange Commission (SEC).
