Huntsman Announces Strong and Consistent Growth in Second Quarter 2018 Earnings

THE WOODLANDS, Texas, July 31, 2018 /PRNewswire/ --

Second Quarter 2018 Highlights

- Net income was \$623 million compared to \$183 million in the prior year period and \$350 million in the prior quarter.
- Adjusted EBITDA was \$415 million compared to \$299 million in the prior year period and \$405 million in the prior quarter.
- Diluted income per share was \$1.71 compared to \$0.69 in the prior year period and \$1.11 in the prior quarter.
- Adjusted diluted income per share was \$1.01 compared to \$0.59 in the prior year period and \$0.96 in the prior quarter.
- Net cash provided by operating activities was \$228 million. Free cash flow generation was \$174 million.
- Balance sheet remains strong with a net leverage of 1.4x.
- Completed cumulative share repurchases of approximately \$138 million through end of second quarter 2018.

See end of press release for footnote explanations

Huntsman Corporation (NYSE: HUN) today reported second quarter 2018 results with revenues of \$2,404 million, net income of \$623 million and adjusted EBITDA of \$415 million.

Peter R. Huntsman, Chairman, President and CEO, commented:

"We had a strong second quarter that is wholly in line with the outlook we shared at our recent Investor Day, which focused on the opportunity for significant value creation. Our Polyurethanes business continues its growth in variants and systems and enjoys the backdrop of good supply and demand fundamentals, foreseeable for the long term. We completed our multiyear scheduled turnaround in Performance Products and each of our divisions continues to see a positive outlook. We delivered strong free cash flow and our balance sheet remains solidly within investment grade metrics. We are committed to our balanced approach of delivering core growth and executing on sensible opportunities in our downstream businesses, share buybacks, and creating overall strong returns for shareholders."

Segment Analysis for 2Q18 Compared to 2Q17

Polyurethanes

The increase in revenues in our Polyurethanes segment for the three months ended June 30, 2018 compared to the same period of 2017 was due to higher average selling prices and higher sales volumes. MDI average selling prices increased in response to continued strong market conditions. MTBE average selling prices increased primarily as a result of higher pricing for high octane gasoline. MDI sales volumes increased due to increased demand across most major markets. MTBE sales volumes increased due to the impact of maintenance outages during the second quarter of 2017. The increase in segment adjusted EBITDA was primarily due to higher MDI and MTBE margins.

Performance Products

The increase in revenues in our Performance Products segment for the three months ended June 30, 2018 compared to the same period of 2017 was due to higher average selling prices, partially offset by lower sales volumes. Average selling prices increased primarily due to strong market conditions across several of our derivatives businesses and in response to higher raw materials costs. Sales volumes decreased primarily due to the impact of the planned maintenance outage at our Port Neches, Texas facility in the second quarter of 2018, partially offset by higher sales volumes in certain of our specialty amines and maleic anhydride businesses. The decrease in segment adjusted EBITDA was primarily due to lower sales volumes and higher fixed costs attributed to the planned maintenance outage, partially offset by stronger glycol market conditions within intermediates.

Advanced Materials

The increase in revenues in our Advanced Materials segment for the three months ended June 30, 2018, compared to the same period in 2017 was due to higher sales volumes and

higher average selling prices. Sales volumes increased across most markets in our core specialty business, but were partially offset by lower sales volumes in our wind market due to challenging industry conditions. Average selling prices increased in response to higher raw material costs and the impact of a weaker U.S. dollar against major international currencies. The increase in segment adjusted EBITDA was primarily due to higher specialty sales volumes, partially offset by higher raw material and fixed costs.

Textile Effects

The increase in revenues in our Textile Effects segment for the three months ended June 30, 2018 compared to the same period of 2017 was due to higher sales volumes and higher average selling prices. Sales volumes increased across most regions. Average selling prices increased in response to higher raw material costs and the impact of a weaker U.S. dollar against major international currencies. The increase in segment adjusted EBITDA was primarily due to higher sales volumes and higher average selling prices, partially offset by higher raw material costs.

Corporate, LIFO and other

For the three months ended June 30, 2018, segment adjusted EBITDA from Corporate and other for Huntsman Corporation increased \$11 million to a loss of \$39 million from a loss of \$50 million in the same period in 2017, primarily due to a LIFO inventory valuation benefit.

Venator

Our former Pigments and Additives segment, now known as Venator, remains classified as held for sale on our balance sheet and treated as discontinued operations on our income statement. Huntsman currently owns 53% of Venator's outstanding shares.

Liquidity, Capital Resources and Outstanding Debt

During the quarter we generated free cash flow of \$174 million compared to \$154 million a year ago. As of June 30, 2018, we had \$1,459 million of combined cash and unused borrowing capacity compared to \$1,247 million as of December 31, 2017. On May 21, 2018, we entered into a new \$1.2 billion unsecured revolving credit facility that replaced our senior secured credit facility.

During the three months ended June 30, 2018, we spent \$54 million on capital expenditures compared to \$50 million in the same period of 2017. We expect to spend approximately \$325 million on capital expenditures in 2018.

Through the end of the second quarter 2018, we have spent approximately \$138 million to repurchase approximately 4.6 million shares. As of the end of the second quarter 2018 we have approximately \$862 million remaining on our existing multiyear share repurchase authorization.

Income Taxes

During the three months ended June 30, 2018, we recorded income tax expense of \$4 million compared to \$24 million during the same period in 2017. In the second quarter 2018, our adjusted effective tax rate was 18%. We expect our 2018 adjusted effective tax rate will

be approximately 20% - 22%. We expect our long-term adjusted effective tax rate will be approximately 23% - 25%.

Earnings Conference Call Information

We will hold a conference call to discuss our second quarter 2018 financial results on Tuesday, July 31, 2018 at 11:00 a.m. ET.

Call-in numbers for the conference call:
U.S. participants (888) 680 - 0878
International participants (617) 213 - 4855
Passcode 445 723 85#

In order to facilitate the registration process, you may use the following link to pre-register for the conference call. Callers who pre-register will be given a unique PIN to gain immediate access to the call and bypass the live operator. You may pre-register at any time, including up to and after the call start time. To pre-register, please go to:

<https://www.theconferencingservice.com/prereg/key.process?key=PUEAXYC3M>

Webcast Information

The conference call will be available via webcast and can be accessed from the company's website at ir.huntsman.com.

Replay Information

The conference call will be available for replay beginning July 31, 2018 and ending August 7, 2018.

Call-in numbers for the replay:
U.S. participants (888) 286 - 8010
International participants (617) 801 - 6888
Replay code 29385180

Upcoming Conferences

During the third quarter 2018 a member of management is expected to present at:

Jefferies Global Industrials Conference on August 7, 2018
UBS Global Chemicals & Paper and Packaging Conference on September 5, 2018
RBC Capital Markets Industrials Conference on September 6, 2018

A webcast of the presentation, if applicable, along with accompanying materials will be available at ir.huntsman.com.

- (a) During the six months ended June 30, 2018, we released \$95 million of valuation allowances in Switzerland and the U.K. We eliminated the effect of this significant change in tax valuation allowances from our presentation of adjusted net income to allow investors to better compare our ongoing financial performance from period to period. We do not adjust for insignificant changes in tax valuation allowances because we do not believe this provides more meaningful information than is provided under GAAP.

See end of press release for footnote explanations

Footnotes

- (1) We use adjusted EBITDA to measure the operating performance of our business and for planning and evaluating the performance of our business segments. We provide adjusted net income because we feel it provides meaningful insight for the investment community into the performance of our business. We believe that net income (loss) is the performance measure calculated and presented in accordance with generally accepted accounting principles in the U.S. ("GAAP") that is most directly comparable to adjusted EBITDA and adjusted net income (loss). Additional information with respect to our use of each of these financial measures follows:

Adjusted EBITDA, adjusted net income (loss) and adjusted diluted income (loss) per share, as used herein, are not necessarily comparable to other similarly titled measures of other companies.

Adjusted EBITDA is computed by eliminating the following from net income (loss): (a) net income attributable to noncontrolling interests, net of tax; (b) interest; (c) income taxes; (d) depreciation and amortization (e) amortization of pension and postretirement actuarial losses (gains); (f) restructuring, impairment and plant closing costs (credits); and further adjusted for certain other items set forth in reconciliation of adjusted EBITDA to net income (loss) in Table 4 above.

Adjusted net income (loss) and adjusted diluted income (loss) per share are computed by eliminating the after tax impact of the following items from net income (loss): (a) net income attributable to noncontrolling interest; (b) amortization of pension and postretirement actuarial losses (gains); (c) restructuring, impairment and plant closing costs (credits); and further adjusted for certain other items set forth in reconciliation of adjusted EBITDA to net income (loss) in Table 4 above. The income tax impacts, if any, of each adjusting item represent a ratable allocation of the total difference between the unadjusted tax expense and the total adjusted tax expense, computed without consideration of any adjusting items using a with and without approach.

We do not provide reconciliations for adjusted EBITDA, adjusted net income (loss) or adjusted diluted income (loss) per share on a forward-looking basis because we are unable to provide a meaningful or accurate calculation or estimation of reconciling items and the information is not available without unreasonable effort. This is due to the inherent difficulty of forecasting the timing and amount of certain items, such as, but not limited to, (a) business acquisition and integration expenses and purchase accounting adjustments, (b) merger costs, and (c) certain legal and other settlements and related costs. Each of such adjustments has not yet occurred, are out of our control and/or cannot be reasonably predicted. For the same reasons, we are unable to address the probable significance of the unavailable information.

- (2) Management internally uses a free cash flow measure: (a) to evaluate the Company's liquidity, (b) to evaluate strategic investments, (c) to plan stock buy back and dividend levels and (d) to evaluate the Company's ability to incur and service debt. Free cash flow is not a defined term under U.S. GAAP, and it should not be inferred that the entire free cash flow amount is available for discretionary expenditures. The Company defines free cash flow as cash flow provided by operating activities less cash flow used in investing activities, excluding acquisition/disposition activities and non-recurring separation costs. Free cash flow is typically derived directly from the Company's condensed consolidated statement of cash flows; however, it may be adjusted for items that affect comparability between periods.
- (3) During the third quarter of 2017 we separated our Pigments and Additives division through an Initial Public Offering of Venator Materials PLC; Additionally, during the first quarter 2010 we closed our Australian styrenics operations. Results from these associated businesses are treated as discontinued operations.
- (4) We believe adjusted effective tax rate provides improved comparability between periods through the exclusion of certain items that management believes are not indicative of the businesses' operational profitability and that may obscure underlying business results and trends. In our view, effective tax rate is the performance measure calculated and presented in accordance with U.S. GAAP that is most directly comparable to adjusted effective tax rate.

The reconciliation of historical adjusted effective tax rate and effective tax rate is set forth in Table 4 above. We do not provide reconciliations for adjusted effective tax rate on a forward-looking basis because we are unable to provide a meaningful or accurate calculation or estimation of reconciling items and the information is not available without unreasonable effort. This is due to the inherent difficulty of forecasting the timing and amount of certain items, such as, but not limited to, (a) business acquisition and integration expenses, (b) merger costs, and (c) certain legal and other settlements and related costs. Each of such adjustments has not yet occurred, are out of our control and/or cannot be reasonably predicted. For the same reasons, we are unable to address the probable significance of the unavailable information.

- (5) Net debt is a measure we use to monitor how much debt we have after taking into account our total cash. We use it as an indicator of our overall financial position, and calculate it by taking our total debt, including the current portion, and subtracting total cash.

About Huntsman:

Huntsman Corporation is a publicly traded global manufacturer and marketer of differentiated and specialty chemicals with 2017 revenues more than \$8 billion. Our chemical products number in the thousands and are sold worldwide to manufacturers serving a broad and diverse range of consumer and industrial end markets. We operate more than 75 manufacturing, R&D and operations facilities in approximately 30 countries and employ approximately 10,000 associates within our four distinct business divisions. For more information about Huntsman, please visit the company's website at www.huntsman.com.
