Mirion Dosimetry Services Hosts Educational Webinar on New InstadoseVUE Wireless Dosimeter

On March 26th, Mirion Dosimetry Services hosted a live webinar addressing how the new Instadose®VUE Wireless Dosimeter enables faster, more precise, and richer dose data insights for occupational radiation exposure monitoring. [This 39-minute webinar is now available for on-demand viewing.](#)

The presentation – from John Huppmann, Strategy and Operations Program Manager, Mirion – touches on how this new device harnesses the power of advanced wireless technologies and the benefits it offers. See how it can help transform radiation safety programs, improve compliance and ALARA safety, and reduce liability.

About the Speaker

John Huppmann is the Strategy and Operations Program Manager for Mirion Dosimetry Services. He previously served as Mirion's Director of Military Programs for 5 years. Prior to Mirion, he spent 23 years at Oak Ridge Associated Universities (ORAU), engaged in domestic and international radiological response and security operations. His background also includes serving as an officer in several of the U.S. Army's rapid deployment divisions.
