MTBC Announces New Partnership That Extends the Reach of Its Web-Based Platform to Over 350 Practice Management Systems and EHRs

SOMERSET, N.J., April 15, 2015 (GLOBE NEWSWIRE) -- MTBC (Nasdaq:MTBC), a leading provider of proprietary, web-based electronic health records, practice management, medical billing and mHealth solutions, today announced that it has partnered with X-Link to connect MTBC's highly ranked platform to X-Link's extensive network of healthcare IT platforms.

"We are delighted to be able to extend the reach of our platform to hundreds of additional practice management systems and EHRs through our new collaboration with X-Link," said Stephen Snyder, President of MTBC. "This new collaboration will allow us to help our existing clients save time, reduce expenses and enhance clinical and practice management workflows, while also accelerating MTBC's growth throughout the country."

"This partnership affords MTBC users the opportunity to experience vendor neutrality and achieve interoperability more easily," said Gary Gorsline, President of X-Link. "The ability to improve workflow and avoid duplicate data entry with X-Link's existing and evolving list of partners will allow physicians to save time while also providing customized data transfers specific to their practice."

Interoperability is one of the biggest challenges for healthcare systems. MTBC's partnership with X-Link, which extends MTBC's existing network of interfaces, will augment the ability of its providers to work together within and across organizational boundaries in order to advance the effective delivery of healthcare.

To learn more about MTBC's connectivity to X-Link, providers may contact MTBC at info@mtbc.com.

About MTBC

MTBC (Medical Transcription Billing, Corp.) is a healthcare information technology company that provides a fully integrated suite of proprietary web-based solutions, together with related business services, to healthcare providers practicing in ambulatory care settings. For additional information, please visit MTBC website at www.mtbc.com.

About X-Link

X-Link provides seamless integration of financial and clinical information and avoids duplicate data entry, saving time and reducing errors. Since X-Link operates in "real time",

when information is entered into one system, it automatically shows up in the other systems. With over 350 medical software interfaces and growing, X-Link enables true interoperability by sharing information where you need it, when you need it, ultimately enabling both better patient outcomes and reduced costs.
