# Microvision, Inc. Joins Russell 2000 and Russell Global Indexes

REDMOND, Wash.--(BUSINESS WIRE)--

Microvision, Inc. (NASDAQ:MVIS), a developer of light-scanning technologies for display and imaging products, joined the U.S. small-cap Russell 2000(R) Index and the Russell Global Index when Russell Investments reconstituted its comprehensive family of global indexes on June 27, 2008. Membership in the Russell 2000, which remains in place for one year, is based on membership in the broad-market Russell 3000(R) Index.

Annual reconstitution of Russell's U.S. indexes captures the 4,000 largest U.S. stocks as of the end of May, ranking them by total market capitalization. Russell determines membership for its equity indexes primarily by objective, market-capitalization rankings and style attributes. The Russell 3000, composed of the large-cap Russell 1000(R) Index and small-cap Russell 2000(R) Index, also serves as the U.S. component to the Russell Global Index, which Russell launched last year.

Russell indexes are widely used by investment managers and institutional investors for index funds and as benchmarks for both passive and active investment strategies. An industry-leading \$4.4 trillion in assets currently are benchmarked to them. These investment tools originated from Russell's multi-manager investment business in the early 1980s when the company saw the need for a more objective, market-driven set of benchmarks in order to evaluate outside investment managers. Real-time market analysis on the Russell 3000 and other Russell Indexes is available at [www.russell.com/Indexes/performance/real\\_time\\_market\\_analysis.asp](http://www.russell.com/Indexes/performance/real_time_market_analysis.asp).

About Microvision ([www.microvision.com](http://www.microvision.com))

Microvision provides the PicoP display technology platform designed to enable next generation display and imaging products for pico projectors, vehicles displays, and wearable displays that interface to mobile devices. The company also manufactures and sells its bar code scanner product line which features the company's proprietary MEMS technology.

## Forward-Looking Statements Disclaimer

Certain statements contained in this release, including those relating to future products, are forward-looking statements that involve a number of risks and uncertainties. Factors that could cause actual results to differ materially from those projected in the Company's forward-looking statements include the following: our ability to raise additional capital when needed; the risk of market acceptance of our technology and products, our financial and technical resources relative to those of our competitors; our ability to keep up with rapid technological change; our ability to enforce our intellectual property rights and protect our proprietary technologies; the timing of commercial product launches and delays in product development; the ability to achieve key technical milestones in key products; our ability to secure needed

third party manufacturing and sales resources, dependence on third parties to develop, manufacture, sell and market our products; potential product liability claims and other risk factors identified from time to time in the Company's SEC reports, including the Company's Annual Report on Form 10-K filed with the SEC. Except as expressly required by the federal securities laws, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changes in circumstances or any other reason.
