MicroVision Receives Nasdaq Global Market Listing Deficiency Notice

REDMOND, Wash.--(BUSINESS WIRE)-- MicroVision, Inc. (NASDAQ:MVIS) announced today that it received a notice on February 26, 2013, from The Nasdaq Stock Market advising the company that for 30 consecutive business days preceding the date of the notice the company was not in compliance with the \$50,000,000 minimum market value of listed securities required for continued listing on The Nasdaq Global Market pursuant to Nasdaq's listing requirements. In accordance with Nasdaq's listing rules, the company has 180 calendar days, or until August 26, 2013, to regain compliance with this requirement. This notification is simply a notice of deficiency, not of imminent delisting, and has no current effect on the listing or trading of MicroVision's common stock on The Nasdaq Global Market.

During the 180 day compliance period, MicroVision can regain compliance if the market value of its listed securities closes at \$50,000,000 or more for a minimum of 10 consecutive business days. The company could also regain compliance with Nasdaq's continued listing requirements by reporting stockholders' equity of \$10 million or more. If the company does not regain compliance by August 26, 2013, Nasdaq will notify the company that its securities are subject to delisting.

The company outlined its [business objectives for 2013 and 2012 business results in its recent earnings press release](#) and related conference call. The key objectives for the year included: securing customer commitments under the company's licensing business model, strengthening its supply chain to enable customers to bring products to market and aggressively managing cash used in operations. The company believes the best way to regain compliance is to successfully execute on its strategy.

About MicroVision

MicroVision is the creator of PicoP® display technology, an ultra-miniature laser projection solution for mobile consumer electronics, automotive head-up displays and other applications. MicroVision's patented display technology helps OEMs break down display boundaries and offer enhanced visibility to mobile experiences. Nearly two decades of research has led MicroVision to become an independently recognized leader in the development of intellectual property. MicroVision's IP portfolio has been recognized by the Patent Board as a top 50 IP portfolio among global industrial companies and is also included in the Ocean Tomo 300 Patent Index. The company is based in Redmond, Wash.
