## BioSig Technologies to Present at the Dawson James 2016 Small Cap Growth Stock Conference

Minneapolis, MN, Oct. 12, 2016 (GLOBE NEWSWIRE) -- BioSig Technologies, Inc. (OTCQB: BSGM), a medical device company developing the PURE EP(TM) System, a novel cardiac electrophysiology (EP) signal acquisition and analysis system, today announced that its Executive Chairman, Mr. Kenneth Londoner will present at the Dawson James 2016 Small Cap Growth Stock Conference. The Conference will be held on October 20, 2016 at the Wyndham Grand Hotel in Jupiter, Florida.

**Event:** Dawson James 2016 Small Cap Growth Stock Conference

**Location:** Wyndham Grand Hotel, Jupiter, Florida

**Time:** Thursday, October 20th at 8:30am in Track 1 – Preserve Ballroom C

During the conference Mr. Londoner will deliver the Company's corporate presentation and discuss recent business highlights. Management will also be available for one-on-one meetings. To arrange a meeting with management, please contact Lora Mikolaitis [lmikolaitis@biosigtech.com](mailto:lmikolaitis@biosigtech.com).

### About Dawson James, Inc.

Dawson James Securities, a member of FINRA/SIPC, is a full service investment bank headquartered in Boca Raton, FL. The company has set out to create the highest-quality, full service investment firm specializing in the complex and fast-moving healthcare, biotechnology, technology and clean-tech sectors. For more information, please visit <http://www.dawsonjames.com>.

### About BioSig Technologies

BioSig Technologies is a medical device company that is developing a proprietary technology platform designed to improve the \$4 billion EP marketplace (1) ([biosigtech.com](http://biosigtech.com)). Led by a proven management team and a veteran, independent Board of Directors, Minneapolis-based BioSig Technologies is preparing to commercialize its PURE EP System.

The PURE EP(TM) System is a surface electrocardiogram and intracardiac multichannel signal acquisition and analysis system engineered to assist electrophysiologists in making clinical decisions in real-time by acquiring and displaying high-fidelity cardiac signal

recordings and providing clarity of data which may be used to guide the electrophysiologists in identifying ablation targets - areas of tissue to treat that otherwise create a heart rhythm disturbance (arrhythmia).

Analysts forecast the global market for EP devices will grow at a 12.1 percent compound annual growth rate, from \$2.5 billion in 2012 to \$5.5 billion by 2019(1), making it one of the fastest growing medical device segments. Just in the US, the number of Atrial Fibrillation (AF) and Ventricular Tachycardia (VT) arrhythmia ablations is forecast to grow at 10.5 percent from 2012 to 2017(2).

BioSig has partnered with Minnetronix on technology development and is working toward a FDA 510(k) clearance for the PURE EP System. The Company has achieved proof of concept validation and tested its prototype at the University of California at Los Angeles (UCLA) Cardiac Arrhythmia Center; and, has performed pre-clinical studies at Mayo Clinic in Minnesota. Additionally, an Advanced Research Program at Mayo Clinic began in June 2016. The Company is also collaborating with other prestigious cardiac arrhythmia centers including Texas Cardiac Arrhythmia Institute, UH Case Medical Center in Cleveland, Ohio and Mount Sinai Medical Center in New York.
