"Though worldwide economic conditions have not changed materially, we have adapted well by effectively managing our asset base, leveraging our customer relationships to capture growth in key markets, and implementing programs to drive efficiencies and improve results," said John A. Hayes, chairman, president and chief executive officer. "Specialty can growth in the Americas, improved cost management in our global packaging operations and solid program execution in our aerospace operations led to results that exceeded our expectations."

Fourth quarter 2013 net earnings attributable to Ball Corporation were \$124.5 million or 85 cents per diluted share, on sales of \$2.0 billion, compared to \$60.6 million, or 39 cents per diluted share, on sales of \$2.1 billion, in the fourth quarter of 2012. On a comparable basis, Ball's fourth quarter results were net earnings of \$126.8 million, or 86 cents per diluted share, compared to \$98.9 million, or 64 cents per diluted share in the fourth quarter of 2012.

Details of comparable segment earnings for the full year and the fourth quarter can be found in the notes to the unaudited consolidated financial statements that accompany this news release.

Metal Beverage Packaging, Americas & Asia

Metal beverage packaging, Americas and Asia, comparable segment operating earnings were \$511.8 million for full-year 2013 on sales of \$4.2 billion, compared to \$522.5 million in 2012 on sales of \$4.5 billion. For the fourth quarter, comparable earnings were \$147.3 million on sales of \$1.0 billion, compared to \$138.0 million on sales of \$1.1 billion in 2012.

Continued excellent operating performance and strong demand for specialty packaging continued in the Americas offset by sluggish 12-ounce can demand in North America. During the fourth quarter, the second production line in the Alagoinhas, Brazil, beverage can plant contributed favorably to segment results. In Asia, Ball relocated beverage can and end equipment from the Shenzhen plant to the company's existing Foshan plant to maximize efficiencies during a challenging period of industry overcapacity.

Metal Beverage Packaging, Europe

Metal beverage packaging, Europe, comparable segment results in 2013 were operating earnings of \$182.6 million on sales of \$1.8 billion, compared to \$182.3 million on sales of \$1.8 billion in 2012. For the fourth quarter, comparable operating earnings in 2013 were \$39.4 million on sales of \$427.8 million, compared to \$29.6 million on sales of \$394.3 million in the fourth quarter of 2012.

Full-year and fourth quarter comparable operating earnings were affected favorably by solid demand for beverage containers across the region and good cost management. Our plans for long-term cost optimization, including the consolidation of the Ratingen, Germany, regional administrative offices, are progressing as planned.

Metal Food & Household Products Packaging

Metal food and household products packaging comparable segment results for 2013 were operating earnings of \$177.4 million on sales of \$1.6 billion, compared to \$167.8 million in 2012 on sales of \$1.6 billion. For the fourth quarter of 2013, comparable segment results were operating earnings of \$36.8 million on sales of \$345.2 million, compared to \$36.8 million on sales of \$363.2 million in the same period of 2012.

Full-year 2013 results were up due to solid operating performance across all product lines and continued volume growth for global metal aerosol packaging. In an ongoing effort to improve efficiencies, the company ceased operations at its Elgin, Ill., facility and announced the closure of its Danville, Ill., steel aerosol manufacturing plant during the quarter. The company is deploying the manufacturing assets from these plants across the North American system to supply its existing customer base.

Aerospace and Technologies

Aerospace and technologies comparable segment results were operating earnings of \$80.1 million on sales of \$897.1 million in 2013, compared to \$86.6 million on sales of \$876.8 million in 2012. For the fourth quarter, earnings were \$25.1 million on sales of \$222.1 million, compared to \$24.2 million on sales of \$245.0 million in the fourth quarter of 2012. Contracted backlog at the close of the year was \$938 million.

Full-year comparable operating earnings were negatively affected by the U.S. budget sequestration and the subsequent government shutdown. During the quarter, the previously delivered STPSat-3, the Department of Defense Space Test Program's Standard Interface Vehicle (STP-SIV), launched successfully.

Outlook

Ball announced yesterday an increase to its share repurchase authorization enabling the company to repurchase up to a total of 20 million shares of its common stock.

"We anticipate full-year 2014 free cash flow to be in the range of \$550 million after capital expenditures of nearly \$375 million with the majority of free cash flow being returned to shareholders via share repurchases," said Scott C. Morrison, senior vice president and chief financial officer.

"As we transition into 2014, we are confident in our ability to increase EVA dollar generation and achieve our long-term diluted earnings per share growth goal of 10 to 15 percent," Hayes said.

2. Significant Business Consolidation Activities and Other Noncomparable Items

2013

Metal Beverage Packaging, Americas and Asia

During July 2013, the company signed a compensation agreement with the Chinese government for approximately \$72 million pretax to close the Shenzhen manufacturing facility and relocate the production capacity. As of December 31, 2013, the company has received and recorded the following: (1) \$34.0 million of compensation for land and buildings, resulting in income of \$26.2 million for the excess compensation over net book value; (2) \$26.8 million of compensation for machinery and equipment, including removal costs, of which \$3.8 million was used to offset 2013 costs and \$23.0 million was deferred in the balance sheet to offset future capital expenditures for the relocation of capacity; (3) \$6.2 million of compensation for business interruption, of which \$4.1 million was recognized in cost of sales in 2013 and \$2.1 million will be recognized in 2014; and (4) \$7.2 million of expense for severance costs.

The fourth quarter and full year included charges of \$3.4 million (\$2.0 million after tax) and \$20.5 million (\$12.4 million after tax) related to previously announced closures and capacity reductions in the company's Milwaukee, Wisconsin; Columbus, Ohio; and Gainesville, Florida, facilities; as well as related voluntary separation programs.

Metal Food and Household Products Packaging

During the fourth quarter, the company announced that it will close its Danville, Illinois, food and household products packaging facility in the second half of 2014 and recorded charges of \$4.9 million (\$3.0 million after tax). The Danville facility produces steel aerosol cans and ends for household products customers, and its production capabilities will be supplied by other Ball food and household products packaging facilities.

In the third quarter, the company recorded an accounts receivable provision of \$27.0 million (\$16.4 million after tax) as a result of the October 28, 2013, bankruptcy filing of a metal food and household products packaging segment customer. This provision represents the company's estimate of the most likely potential loss of value it expects to incur as a result of the financial condition of this customer. The company's estimate of potential loss as a result of this event may change in the future if the customer's facts and circumstances change.

In February 2013, Ball announced the closure of its Elgin, Illinois, metal food and household products packaging facility, which ceased production in December. The fourth quarter and full year included charges of \$1.0 million (\$0.9 million after tax) and \$29.0 million (\$18.0 million after tax), respectively, in connection with this closure. The full year also included charges of \$5.9 million (\$3.6 million after tax) to migrate certain employees from a multi-employer defined benefit pension plan to a Ball-sponsored defined benefit pension plan and income of \$3.5 million (\$2.1 million after tax) related to the reimbursement of funds paid in 2012 to settle certain Canadian defined benefit pension liabilities.

Metal Beverage Packaging, Europe, and Corporate

The fourth quarter and full year included charges of \$6.2 million (\$5.8 million after tax) and \$11.7 million (\$10.1 million after tax) for headcount reductions, cost-out initiatives and the relocation of the company's European headquarters from Germany to Switzerland, as well as additional tax expense of \$2.0 million and \$7.9 million, respectively, related to this relocation.

During the second quarter, Ball issued \$1 billion of 4.00 percent senior notes due in November 2023 and tendered for the redemption of \$375 million of 7.125 percent senior notes originally due in September 2016. The redemption of the bonds and the renegotiation of Ball's bank credit facilities in June resulted in a charge of \$26.9 million (\$16.3 million after tax) for the call premium and the write off of unamortized financing costs and discounts.

2012

In August 2012, Ball announced plans to close its Columbus, Ohio, beverage can manufacturing facility and its Gainesville, Florida, can end facility. In connection with the closures and a related voluntary separation program completed in the segment, the company recorded charges of \$18.9 million (\$11.5 million after tax) in the fourth quarter and \$50.2 million (\$30.5 million after tax) for the full year.

In the fourth quarter, the company finalized the settlement of certain Canadian defined benefit pension plan liabilities resulting in pretax charges of \$27.1 million (\$16.5 million after tax). The fourth quarter also included charges of \$2.9 million (\$1.7 million after tax) for transaction costs related to an acquisition in Mexico in December 2012 and \$3.4 million (\$2.1 million after tax) for a voluntary separation program offered to corporate headquarters and aerospace and technologies employees. The fourth quarter and full year included charges of \$1.3 million (\$1.0 million after tax) and \$1.7 million (\$1.3 million after tax), respectively, related to a fire at one of the company's beverage container plants in the United Kingdom.

Notes to the Condensed Financial Statements (Fourth Quarter 2013)

2. Significant Business Consolidation Activities and Other Noncomparable Items (continued)

The fourth quarter and full year of 2012 included charges of \$2.9 million (\$2.1 million after tax) and \$12.5 million (\$8.9 million after tax), respectively, for the relocation of the company's European headquarters from Germany to Switzerland during the third quarter of 2012, as well as fourth quarter and full year 2012 charges of additional tax expense of \$1.9 million and \$3.2 million, respectively, related to the relocation.

The fourth quarter and full year of 2012 also included net charges of \$2.3 million (\$1.6 million after tax) and \$5.0 million (\$3.3 million after tax), respectively, for ongoing costs related to previously closed facilities and other insignificant costs.
