

KODIAK GAS SERVICES

INVESTOR PRESENTATION

May 2026

ONE RELENTLESS FORCE POWERING OUR CRITICAL ENERGY FUTURE

Disclaimer

Cautionary Note Regarding Forward-Looking Statements. This presentation contains, and our officers and representatives may from time to time make, "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Forward-looking statements can be identified by words such as: "anticipate," "intend," "plan," "goal," "seek," "believe," "project," "estimate," "expect," "strategy," "future," "likely," "may," "should," "will" and similar references to future periods. Examples of forward-looking statements include, among others, statements we make regarding: (i) expected operating results, such as revenue growth and earnings, including the integration of acquired businesses into our operations, and our ability to service our indebtedness; (ii) anticipated levels of capital expenditures and uses of capital; (iii) current or future volatility in the credit markets and future market conditions; (iv) potential or pending acquisition transactions or other strategic transactions, the timing thereof, the receipt of necessary approvals to close such acquisitions, our ability to finance such acquisitions, and our ability to achieve the intended operational, financial, and strategic benefits from any such transactions; (v) expectations of the effect on our financial condition of claims, litigation, environmental costs, contingent liabilities and governmental and regulatory investigations and proceedings; (vi) production and capacity forecasts for the natural gas and oil industry; (vii) strategy for customer retention, growth, fleet maintenance, market position and financial results; (viii) our interest rate hedges; and (ix) strategy for risk management.

Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of our control. Our actual results and financial condition may differ materially from those indicated in the forward-looking statements. Therefore, you should not place undue reliance on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following: (i) a reduction in the demand for natural gas and oil; (ii) the loss of, or the deterioration of the financial condition of, any of our key customers; (iii) nonpayment and nonperformance by our customers, suppliers or vendors; (iv) competitive pressures that may cause us to lose market share; (v) our ability to successfully integrate any acquired businesses, including Distributed Power Solutions, LLC ("DPS"), and realize the expected benefits thereof in the expected timeframe or at all; (vi) our ability to source and fund purchases of additional compression and power generation equipment; (vii) changes in the distributed power industry, including any decreases in the demand for electricity and distributed power; (viii) a deterioration in general economic, business, geopolitical or industry conditions, including as a result of the conflict between Russia and Ukraine, the conflict and potential regime change in Iran as well as other hostilities in the Middle East and developments between the United States and Venezuela, inflation, and slow economic growth in the United States; (ix) a downturn in the economic environment, as well as continued inflationary pressures; (x) the outcome of any pending internal review or any future related government enforcement actions; (xi) tax legislation and the impact of changes to applicable tax laws, including the passage of the One Big Beautiful Bill Act, and administrative initiatives or challenges to our tax positions; (xii) the loss of key management, operational personnel or qualified technical personnel; (xiii) our dependence on a limited number of suppliers; (xiv) the cost of compliance with existing and new governmental regulations, as well as the associated uncertainty given the current U.S. federal government administration; (xv) changes in trade policies and regulations, including increases or changes in duties, current and potentially new tariffs or quotas and other similar measures, as well as the potential direct and indirect impact of retaliatory tariffs and other actions; (xvi) the cost of compliance with regulatory initiatives and stakeholders' pressures, including sustainability and corporate responsibility; (xvii) the inherent risks associated with our operations, such as equipment defects and malfunctions; (xviii) our reliance on third-party components for use in our information technology systems; (xix) legal and reputational risks and expenses relating to the privacy, use and security of employee and client information; (xx) threats of cyber-attacks or terrorism; (xxi) agreements that govern our debt contain features that may limit our ability to operate our business and fund future growth and also increase our exposure to risk during adverse economic conditions; (xxii) volatile and/or elevated interest rates and associated central bank policy actions; (xxiii) our ability to access the capital and credit markets or borrow on affordable terms (or at all) to obtain additional capital that we may require; (xxiv) major natural disasters, severe weather events or other similar events that could disrupt operations; (xxv) unionization of our labor force, labor interruptions and new or amended labor regulations; (xxvi) renewal of insurance; (xxvii) the effectiveness of our disclosure controls and procedures; and (xxviii) such other factors as discussed throughout the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections and elsewhere in our Annual Report on Form 10-K for the year ended December 31, 2025, filed with the U.S. Securities and Exchange Commission ("SEC") on February 26, 2026.

Any forward-looking statement made by us in this presentation is based only on information currently available to us and speaks only as of the date on which it is made. Except as may be required by applicable law, we undertake no obligation to publicly update any forward-looking statement whether as a result of new information, future developments or otherwise.

Non-GAAP Financial Measures. This presentation contains certain financial measures not presented in accordance with generally accepted accounting principles ("GAAP"), including adjusted gross margin, adjusted gross margin percentage, adjusted net income, adjusted EBITDA, adjusted EBITDA percentage, discretionary cash flow and free cash flow. Such non-GAAP measures should not be considered an alternative to, or more meaningful than, the most directly comparable measure of financial performance presented in accordance with GAAP. Moreover, such non-GAAP measures may not be comparable to similarly titled measures of other companies. However, we believe these non-GAAP financial measures provide useful information to investors because, when viewed with our GAAP results and the accompanying reconciliation, they provide a more complete understanding of our performance than GAAP results alone. See the Supplemental Slides for reconciliation of non-GAAP measures.

Industry & Market Data. The market data and certain other statistical information used throughout this presentation are based on independent industry publications, government publications or other published independent sources. Although we believe these third-party sources are reliable as of their respective dates, we have not independently verified the accuracy or completeness of this information. Some data is also based on our good faith estimates and our management's understanding of industry conditions. The industry in which we operate is subject to a high degree of uncertainty and risk due to a variety of factors. These and other factors could cause results to differ materially from those expressed in these publications.

Intellectual Property. This presentation contains trademarks, trade names and service marks of other companies, which are the property of their respective owners. We do not intend our use or display of other parties' trademarks, trade names or service marks to imply, and such use or display should not be construed to imply, a relationship with, or endorsement or sponsorship of us by, these other parties.

Kodiak's Energized Growth Outlook

Compelling Fundamentals & Proven Execution Today

Energized Growth Outlook Ahead

Constructive Compression Fundamentals

Multi-year growth outlook in U.S natural gas combined with tight contract compression market

Proven Execution

Track record of increasing utilization & delivering industry leading service

Strong Financial Performance

Focused on increasing margins & return on capital

Attractive Capital Return Program

Committed to returning capital to shareholders through paying a well-covered and growing dividend and opportunistically repurchasing stock

Massive Power Demand

"Bring-your-own-generation" solutions desperately needed to meet rapidly growing power grid shortfall

Track Record

Proven track record of integrating acquisitions and capturing efficiencies

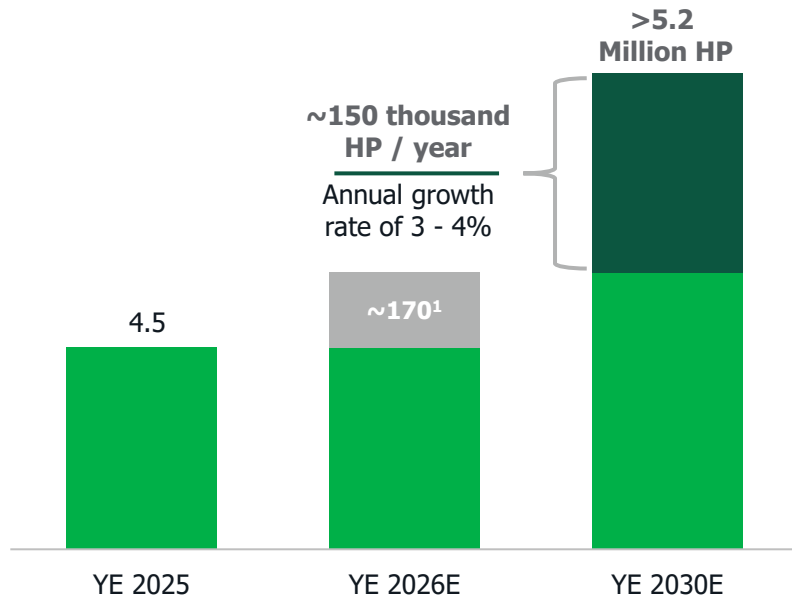

Energized Growth Outlook

Upside to historical high single-digit percentage EBITDA growth, funded by stable contract compression cash flow

Investing to Power Our Critical Energy Future

Power Infrastructure Adjusted Gross Margin Percentage ¹		60.0%	70.0%
Other Services Revenue	\$	125,000	\$ 160,000
Other Services Adjusted Gross Margin Percentage ¹		13.0%	16.0%
Capital Expenditures			
Compression Infrastructure Growth Capex	\$	245,000	\$ 275,000
Power Infrastructure Growth Capex	\$	400,000	\$ 500,000
Other Capex	\$	45,000	\$ 55,000
Maintenance Capex	\$	80,000	\$ 90,000

¹ The Company is unable to reconcile projected adjusted EBITDA to projected net income (loss), projected discretionary cash flow to projected net cash provided by operating activities, and projected adjusted gross margin % to projected gross margin, the most comparable financial measures calculated in accordance with GAAP, respectively, without unreasonable efforts because components of the calculations are inherently unpredictable, such as changes to current assets and liabilities, unknown future events, and estimating certain future GAAP measures. The inability to project certain components of the calculation would significantly affect the accuracy of the reconciliations. ² Discretionary cash flow assumes no change to Secured Overnight Financing Rate futures

Anatomy of a Compression Unit

Non-GAAP Financial Measures

Adjusted Net Income (Loss)

Adjusted net income and adjusted earnings per share are considered non-GAAP measures. Adjusted net income is defined as net income adjusted to exclude certain items, as applicable, such as (i) impairment of long-lived assets; (ii) severance expenses; (iii) transaction expenses; (iv) sales tax reserve; (v) loss on disposal of business; (vi) loss (gain) on derivatives; (vii) loss on extinguishment of debt; and (viii) the tax effects of the adjustments. Adjusted earnings (loss) per share is calculated by dividing adjusted net income by the weighted average diluted shares outstanding.

Adjusted EBITDA and Adjusted EBITDA Percentage

Adjusted EBITDA and adjusted EBITDA percentage are considered non-GAAP measures. Adjusted EBITDA is defined net income before interest expense; income tax expense; and depreciation and amortization; plus certain items, as applicable, such as (i) impairment of long-lived assets; (ii) loss (gain) on derivatives; (iii) equity compensation expense; (iv) severance expenses; (v) transaction expenses; (vi) sales tax reserve; (vii) loss (gain) on disposal of business; (viii) loss (gain) on sale of assets; and (ix) loss on extinguishment of debt. We define adjusted EBITDA percentage as adjusted EBITDA divided by total revenues.

Adjusted net income, adjusted diluted EPS, adjusted EBITDA and adjusted EBITDA percentage are used as supplemental financial measures by our management and external users of our financial statements, such as investors, commercial banks and other financial institutions, to assess: (i) the financial performance of our assets without regard to the impact of financing methods, capital structure or historical cost basis of our assets; (ii) the viability of capital expenditure projects and the overall rates of return on alternative investment opportunities; (iii) the ability of our assets to generate cash sufficient to make debt payments and pay dividends; and (iv) our operating performance as compared to those of other companies in our industry without regard to the impact of financing methods and capital structure. We believe adjusted net income, adjusted diluted EPS, adjusted EBITDA and adjusted EBITDA percentage provide useful information because, when viewed with our GAAP results and the accompanying reconciliation, they provide a more complete understanding of our performance than GAAP results alone. We also believe that external users of our financial statements benefit from having access to the same financial measures that management uses in evaluating the results of our business.

Adjusted Gross Margin

Adjusted gross margin is defined as revenue less cost of operations, exclusive of depreciation and amortization expense. Adjusted gross margin percentage is defined as adjusted gross margin divided by total revenues. We believe adjusted gross margin and adjusted gross margin percentage are useful as supplemental measures to investors of our operating profitability.

Discretionary Cash Flow

Discretionary cash flow is considered a non-GAAP measure. We define discretionary cash flow as net cash provided by operating activities less (i) maintenance capital expenditures; (ii) certain changes in operating assets and liabilities; and (iii) certain other expenses; plus certain items, as applicable, such as (w) severance expenses; (x) transaction expenses; and (y) sales tax reserve. We believe discretionary cash flow is a useful liquidity and performance measure and supplemental financial measure for us in assessing our ability to pay cash dividends to our stockholders, make growth capital expenditures and assess our operating performance.

Free Cash Flow

Free cash flow is considered a non-GAAP measure. We define free cash flow as net cash provided by operating activities less (i) maintenance capital expenditures; (ii) certain changes in operating assets and liabilities; (iii) certain other expenses; (iv) growth capital expenditures; and (v) other capital expenditures; plus certain items, as applicable, such as (w) severance expenses; (x) transaction expenses; (y) sales tax reserve; and (z) proceeds from sale of assets. We believe free cash flow is a liquidity measure and useful supplemental financial measure for us in assessing our ability to pursue business opportunities and investments to grow our business and to service our debt.

Reconciliation of Non-GAAP Financial Measures
