

# QuickLogic to Exhibit at All Four GLOBALFOUNDRIES Technology Conferences

**San Jose, CA** – September 24, 2019 – QuickLogic Corporation (NASDAQ: QUIK), a developer of ultra-low power multi-core voice-enabled SoCs, embedded FPGA IP, and Endpoint AI solutions, will be demonstrating its [ArcticPro™ eFPGA](#) solutions at the GLOBALFOUNDRIES Technology Conferences in Santa Clara, California, Munich, Shanghai and Hsinchu, Taiwan.

ArcticPro is the industry's first eFPGA offering for the GLOBALFOUNDRIES 22FDX® (FD-SOI) process. Design engineers using eFPGA technology for SoC designs on the GF's 22FDX process can benefit from the company's 30+ years of extensive experience. Additionally, designers can add reprogrammable hardware acceleration capability to their designs to improve system-level performance while simultaneously reducing power consumption. Having embedded FPGA technology also enables post-production design changes to address emerging specifications and standards.

## **Dates and Locations**

Date: Tuesday, September 24

Venue: Marriott Hotel, Santa Clara, CA

Time: 8:00 am – 6:00 pm

Date: Friday, October 11

Venue: Hilton Park Munich, Munich, Germany

Time: 7:30 am – 5:00 pm

Date: Thursday, October 24

Venue: Kerry Hotel, Shanghai, China

Time: 8:00 am – 6:00 pm

Date: Tuesday, November 5

Venue: Sheraton Hotel, Hsinchu, Taiwan

Time: 8:00 am – 5:00 pm

## **About QuickLogic**

QuickLogic Corporation (NASDAQ: QUIK) is a fabless semiconductor company that develops low power, multi-core semiconductor platforms and Intellectual Property (IP) for Artificial Intelligence (AI), voice and sensor processing. The solutions include embedded FPGA IP (eFPGA) for hardware acceleration and pre-processing, and heterogeneous multi-core SoCs that integrate eFPGA with other processors and peripherals. The Analytics Toolkit from our recently acquired wholly owned subsidiary, SensiML Corporation, completes the end-to-end solution with accurate sensor algorithms using AI technology. The full range

of platforms, software tools and eFPGA IP enables the practical and efficient adoption of AI, voice and sensor processing across mobile, wearable, hearable, consumer, industrial, edge and endpoint IoT.
