## **QuickLogic Announces Strategic Investment by Long-Time and New Institutional Investors**

- Investors purchased 310,000 shares for gross proceeds of approximately \$1.48 million**
- Purchases made with no discount to the market price at the time of the agreement**
- Funds will support continued Open Source, growth and profitability objectives**

SAN JOSE, Calif., Feb. 9, 2022 /PRNewswire/ -- QuickLogic Corporation (NASDAQ: QUIK), a developer of ultra-low power multi-core voice-enabled SoCs, embedded FPGA IP, and Endpoint AI solutions, today announced current and new institutional investors have purchased, in separate private placement transactions, 310,000 shares, or 2.6 percent of the current shares outstanding, raising proceeds of approximately \$1.48 million.

"We are pleased with the continued financial support we are receiving from both our long-time shareholders and investors who have followed QuickLogic for many years. They understand the tremendous opportunity we have with our Open Source initiatives," said Brian Faith, President and CEO of QuickLogic. "Following our recent announcement that we would be at or above operating cash breakeven in Q4, these investors again reached out to us wanting to further support our efforts. With our pipeline of business growing, this additional capital adds greater financial resources to quickly execute on our growth and profitability objectives."

## About QuickLogic

QuickLogic Corporation (NASDAQ: QUIK) is a fabless semiconductor company that develops low power, multi-core semiconductor platforms and Intellectual Property (IP) for Artificial Intelligence (AI), voice and sensor processing. The solutions include embedded FPGA IP (eFPGA) for hardware acceleration and pre-processing, and heterogeneous multi-core SoCs that integrate eFPGA with other processors and peripherals. The Analytics Toolkit from our recently acquired wholly owned subsidiary, SensiML Corporation, completes the end-to-end solution with accurate sensor algorithms using AI technology. The full range of platforms, software tools and eFPGA IP enables the practical and efficient adoption of AI, voice, and sensor processing across mobile, wearable, hearable, consumer, industrial, edge and endpoint IoT.
