Note:

Unless otherwise stated, all references in this financial supplement to income (loss) from continuing operations, income (loss) from continuing operations per share, net income (loss), net income (loss) per share, adjusted operating income (loss), adjusted operating income (loss) per share, book value and book value per share should be read as income (loss) from continuing operations available to Genworth Financial, Inc.'s common stockholders, income (loss) from continuing operations available to Genworth Financial, Inc.'s common stockholders, net income (loss) available to Genworth Financial, Inc.'s common stockholders per share, non-U.S. Generally Accepted Accounting Principles (U.S. GAAP) adjusted operating income (loss) available to Genworth Financial, Inc.'s common stockholders, non-GAAP adjusted operating income (loss) available to Genworth Financial, Inc.'s common stockholders per share, book value available to Genworth Financial, Inc.'s common stockholders per share, respectively.

Dear Investor,

Beginning in the third quarter of 2019, the company's Canada mortgage insurance business (Genworth Canada), previously the only business in the Canada Mortgage Insurance segment, was accounted for as held for sale and reported as discontinued operations. On December 12, 2019, the company completed the sale of Genworth Canada and received approximately \$1.7 billion in net cash proceeds. In the fourth quarter of 2019 and prior to the sale closing, the company also received a special dividend from Genworth Canada of approximately \$54 million. This special dividend reduced the sales price on a per purchased share basis by CAD\$1.45 per common share. During the fourth quarter of 2019, the company recognized an incremental after-tax gain of \$43 million. In connection with the plan to sell the business, the company previously recorded an after-tax loss of approximately \$164 million during the third quarter of 2019.

The following table presents a reconciliation of adjusted operating income (loss) as previously reported to adjusted operating income (loss) re-presented to reflect the Canada mortgage insurance business as discontinued operations for the periods indicated:

	2019		2018				
(Amounts in millions)	2Q	1Q	4Q	3Q	2Q	1Q	Total
ADJUSTED OPERATING INCOME (LOSS) AS PREVIOUSLY REPORTED	\$204	\$121	\$(291)	\$145	\$200	\$125	\$ 179

Adjustment for corporate overhead allocations, net of taxes ⁽¹⁾	(5)	(4)	(4)	(4)	(3)	(4)	(15)
Adjustment for interest on debt that was required to be repaid as a result of the disposal transaction, net of taxes ⁽²⁾	6	6	7	6	5	2	20
Tax adjustments ⁽³⁾	14	13	31	(4)	(26)	(3)	(2)
RE-PRESENTED ADJUSTED OPERATING INCOME (LOSS)	<u>\$178</u>	\$ 95	<u>\$(305)</u>	\$ 99	\$130	\$ 71	\$ <u>(5)</u>

⁽¹⁾ Expenses previously reported in the Canada Mortgage Insurance segment and moved to Corporate and Other Activities.

Thank you for your continued interest in Genworth Financial, Inc.

Regards,

Investor Relations InvestorInfo@genworth.com

⁽²⁾ Interest on a senior secured term loan facility owed by Genworth Holdings, Inc. previously reported in Corporate and Other Activities and moved to discontinued operations.

⁽³⁾ Tax impacts resulting from the classification of Genworth Canada as held-for-sale.

Use of Non-GAAP Measures

This financial supplement includes the non-GAAP financial measures entitled "adjusted operating income (loss)" and "adjusted operating income (loss) per share." Adjusted operating income (loss) per share is derived from adjusted operating income (loss). The chief operating decision maker evaluates segment performance and allocates resources on the basis of adjusted operating income (loss). The company defines adjusted operating income (loss) from continuing operations excluding the after-tax effects of income (loss) from continuing operations attributable to noncontrolling interests, net investment gains (losses), goodwill impairments, gains (losses) on the sale of businesses, gains (losses) on the early extinguishment of debt, gains (losses) on insurance block transactions, restructuring costs and infrequent or unusual non-operating items. Gains (losses) on insurance block transactions are defined as gains (losses) on the early extinguishment of non-recourse funding obligations, early termination fees for other financing restructuring and/or resulting gains (losses) on reinsurance restructuring for certain blocks of business. The company excludes net investment gains (losses) and infrequent or unusual non-operating items because the company does not consider them to be related to the operating performance of the company's segments and Corporate and Other activities. A component of the company's net investment gains (losses) is the result of impairments, the size and timing of which can vary significantly depending on market credit cycles. In addition, the size and timing of other investment gains (losses) can be subject to the company's opinion, they are not indicative of overall operating trends. Infrequent or unusual non-operating items are also excluded from adjusted operating income (loss) if, in the company's opinion, they are not indicative of overall operating trends.

While some of these items may be significant components of net income (loss) available to Genworth Financial, Inc.'s common stockholders in accordance with U.S. GAAP, the company believes that adjusted operating income (loss) and measures that are derived from or incorporate adjusted operating income (loss), including adjusted operating income (loss) per share on a basic and diluted basis, are appropriate measures that are useful to investors because they identify the income (loss) attributable to the ongoing operations of the business. Management also uses adjusted operating income (loss) as a basis for determining awards and compensation for senior management and to evaluate performance on a basis comparable to that used by analysts. However, the items excluded from adjusted operating income (loss) have occurred in the past and could, and in some cases will, recur in the future. Adjusted operating income (loss) and adjusted operating income (loss) per share on a basic and diluted basis are not substitutes for net income (loss) available to Genworth Financial, Inc.'s common stockholders or net income (loss) available to Genworth Financial, Inc.'s common stockholders per share on a basic and diluted basis determined in accordance with U.S. GAAP. In addition, the company's definition of adjusted operating income (loss) may differ from the definitions used by other companies.

In 2019, the company revised how it taxes the adjustments to reconcile net income (loss) available to Genworth Financial, Inc.'s common stockholders to adjusted operating income (loss) to align the tax rate used in the reconciliation to each segment's local jurisdictional tax rate. Beginning in the first quarter of 2019, the company used a tax rate of 30% for its Australia Mortgage Insurance segment to tax effect its adjustments. Its domestic segments remain at a 21% tax rate. In 2018, the company assumed a flat 21% tax rate on adjustments for all of its segments to reconcile net income (loss) available to Genworth Financial, Inc.'s common stockholders and adjusted operating income (loss). These adjustments are also net of the portion attributable to noncontrolling interests and net investment gains (losses) are adjusted for DAC and other intangible amortization and certain benefit reserves (see page 41).

Prior year amounts have not been re-presented to reflect this revised presentation; however, the previous methodology would not have resulted in a materially different segment-level adjusted operating income (loss).

The company recorded a pre-tax expense of \$4 million in the first quarter of 2019 and \$2 million in the third quarter of 2018 related to restructuring costs as it continues to evaluate and appropriately size its organizational needs and expenses. There were no infrequent or unusual items excluded from adjusted operating income (loss) during the periods presented other than fees incurred during the fourth quarter of 2018 related to Genworth Holdings, Inc.'s bond consent solicitation of \$6 million for broker, advisor and investment banking fees.

The table on page 9 of this financial supplement provides a reconciliation of net income (loss) available to Genworth Financial, Inc.'s common stockholders to adjusted operating income (loss) for the periods presented and reflects adjusted operating income (loss) as determined in accordance with accounting guidance related to segment reporting. This financial supplement includes other non-GAAP measures management believes enhances the understanding and comparability of performance by highlighting underlying business activity and profitability drivers. These additional non-GAAP measures are on pages 43 and 44 of this financial supplement.

Results of Operations and Selected Operating Performance Measures

The company's chief operating decision maker evaluates segment performance and allocates resources on the basis of adjusted operating income (loss). The table on page 9 of this financial supplement provides a reconciliation of net income (loss) available to Genworth Financial, Inc.'s common stockholders to adjusted operating income (loss) for the periods presented and reflects adjusted operating income (loss) as determined in accordance with accounting guidance related to segment reporting.

The company taxes its international businesses at their local jurisdictional tax rates and its domestic businesses at the U.S. corporate federal income tax rate of 21%. The company's segment tax methodology applies the respective jurisdictional or domestic tax rate to the pre-tax income (loss) of each segment, which is then adjusted in each segment to reflect the tax attributes of items unique to that segment such as foreign withholding taxes and permanent differences between U.S. GAAP and local tax law. The difference between the consolidated provision for income taxes and the sum of the provision for income taxes in each segment is reflected in Corporate and Other activities.

The annually-determined tax rates and adjustments to each segment's provision for income taxes are estimates which are subject to review and could change from year to year.

This financial supplement contains selected operating performance measures including "sales" and "insurance in-force" or "risk in-force" which are commonly used in the insurance industry as measures of operating performance.

Management regularly monitors and reports sales metrics as a measure of volume of new business generated in a period. Sales refer to new insurance written for mortgage insurance products. The company considers new insurance written to be a measure of the company's operating performance because it represents a measure of new sales of insurance policies during a specified period, rather than a measure of the company's revenues or profitability during that period.

Management regularly monitors and reports insurance in-force and risk in-force. Insurance in-force for the company's mortgage insurance businesses is a measure of the aggregate original loan balance for outstanding insurance policies as of the respective reporting date. Risk in-force for the company's U.S. mortgage insurance business is based on the coverage percentage applied to the estimated current outstanding loan balance. Risk in-force in the Australia mortgage insurance business is computed using an "effective" risk in-force amount, which recognizes that the loss on any particular loan will be reduced by the net proceeds received upon sale of the property. Effective risk in-force has been calculated by applying to insurance in-force a factor of 35% that represents the highest expected average per-claim payment for any one underwriting year over the life of the company's mortgage insurance business in Australia. The company also has certain risk share arrangements in Australia where it provides pro-rata coverage of certain loans rather than 100% coverage. As a result, for loans with these risk share arrangements, the applicable pro-rata coverage amount provided is used when applying the factor. The company considers insurance in-force and risk in-force to be measures of its operating performance because they represent measures of its business at a specific date which will generate revenues and profits in a future period, rather than measures of its revenues or profitability during that period.

Management also regularly monitors and reports a loss ratio for the company's businesses. For the mortgage insurance businesses, the loss ratio is the ratio of benefits and other changes in policy reserves to net earned premiums. For the long-term care insurance business, the loss ratio is the ratio of benefits and other changes in reserves less tabular interest on reserves less loss adjustment expenses to net earned premiums. The company considers the loss ratio to be a measure of underwriting performance in these businesses and helps to enhance the understanding of the operating performance of the businesses.

These operating performance measures enable the company to compare its operating performance across periods without regard to revenues or profitability related to policies or contracts sold in prior periods or from investments or other sources.

Income (loss) from discontinued operations related to the Canada mortgage insurance business that was sold on December 1, 2015. During the fourth quarter of 2019, the company recorded an after-tax loss of \$110 million in connection with pending litigation involving two insurance companies that were part of the sale of the lifestyle protection insurance business. Refer to page 36 for operating results of discontinued operations related to the Canada mortgage insurance business.

Under applicable accounting guidance, companies in a loss position are required to use basic weighted-average common shares outstanding in the calculation of diluted loss per share. Therefore, as a result of the loss from continuing operations available to Genworth Financial, Inc.'s common stockholders for the three and twelve months ended December 31, 2018, the company was required to use basic weighted-average common shares outstanding in the calculation of diluted loss per share for the three and twelve months ended December 31, 2018, as the inclusion of shares for stock options, restricted stock units and stock appreciation rights of 7.6 million and 3.8 million, respectively, would have been antidilutive to the calculation. If the company had not incurred a loss from continuing operations available to Genworth Financial, Inc.'s common stockholders for the three and twelve months ended December 31, 2018, dilutive potential weighted-average common shares outstanding would have been 508.4 million, respectively.

Basic Diluted ⁽²⁾	503.5 510.4	503.5 511.2	503.4 508.7	501.2 508.6	502.9 509.7	500.8 500.8	500.7 503.3	500.6 502.6	499.6 502.7	500.4 500.4

¹⁾ Net investment (gains) losses were adjusted for the portion attributable to noncontrolling interests and DAC and other intangible amortization and certain benefit reserves (see page 41 for reconciliation).

Under applicable accounting guidance, companies in a loss position are required to use basic weighted-average common shares outstanding in the calculation of diluted loss per share. Therefore, as a result of the loss from continuing operations available to Genworth Financial, Inc.'s common stockholders for the three and twelve months ended December 31, 2018, the company was required to use basic weighted-average common shares outstanding in the calculation of diluted loss per share for the three and twelve months ended December 31, 2018, as the inclusion of shares for stock options, restricted stock units and stock appreciation rights of 7.6 million and 3.8 million, respectively, would have been antidilutive to the calculation. If the company had not incurred a loss from continuing operations available to Genworth Financial, Inc.'s common stockholders for the three and twelve months ended December 31, 2018, dilutive potential weighted-average common shares outstanding would have been 508.4 million and 504.2 million, respectively.

The expense ratios included above were calculated using whole dollars and may be different than the ratios calculated using the rounded numbers included herein.

⁽¹⁾ Primary insurance in-force represents aggregate loan balances for outstanding insurance policies and is used to determine premiums. Original loan balances are presented for policies with level renewal premiums. Amortized loan balances are presented for policies with annual, amortizing renewal premiums.

⁽²⁾ Flow risk in-force represents current loan balances as provided by servicers, lenders and investors and conforms to the presentation under the Private Mortgage Insurer Eligibility Requirements (PMIERs).

⁽³⁾ As of December 31, 2019, 88% of the bulk risk in-force was related to loans financed by lenders who participated in the mortgage programs sponsored by the Federal Home Loan Banks.

⁽⁴⁾ The ratio of an insurer's general expenses to net earned premiums. In the business, general expenses consist of acquisition and operating expenses, net of deferrals, and amortization of DAC and intangibles.

⁽⁵⁾ The ratio of an insurer's general expenses to net premiums written. In the business, general expenses consist of acquisition and operating expenses, net of deferrals, and amortization of DAC and intangibles.

⁽⁶⁾ Certain states limit a private mortgage insurer's risk in-force to 25 times the total of the insurer's policyholders' surplus plus the statutory contingency reserve, commonly known as the "risk to capital" requirement. The current period risk to capital ratio is an estimate due to the timing of the filing of statutory statements and is prepared consistent with the presentation of the statutory financial statements in the combined annual statement of the U.S. mortgage insurance business.

⁽⁷⁾ The PMIERs sufficiency ratio is calculated as available assets divided by required assets as defined within PMIERs. The current period PMIERs sufficiency ratio is an estimate due to the timing of the PMIERs filing for the U.S. mortgage insurance business. As of December 31, 2019, September 30, 2019, June 30, 2019 and March 31, 2019, the PMIERs sufficiency ratios were in excess of \$1,050 million, \$850 million, \$650 million and \$600 million, respectively, of available assets above the PMIERs requirements. As of December 31, 2018, September 30, 2018, June 30, 2018 and March 31, 2018, the PMIERs sufficiency ratios were in excess of \$750 million, \$750 million, \$700 million and \$600 million, respectively, of available assets above the prior PMIERs requirements.

The loss ratio included above was calculated using whole dollars and may be different than the ratio calculated using the rounded numbers included herein.

Assumed is comprised of reinsurance arrangements with state governmental housing finance agencies.

Other includes loss adjustment expenses, pool and incurred but not reported reserves.

Reinsurance recoverable excludes ceded unearned premium recoveries and amounts for which cash proceeds have not yet been received.

The ratio of benefits and other changes in policy reserves to net earned premiums. The company recorded a favorable reserve adjustment of \$13 million and a favorable adjustment to net earned premiums of \$14 million in the fourth quarter of 2019, which reduced the loss ratio by six percentage points for the three months ended December 31, 2019. The company also recorded a favorable reserve adjustment of \$10 million in the second quarter of 2019, which reduced the loss ratio by five percentage points for the three months ended June 30, 2019. These adjustments reduced the loss ratio by three percentage points for the twelve months ended December 31, 2019. During the second quarter of 2018, the company recorded a favorable reserve adjustment of \$28 million, which reduced the loss ratio by four percentage points for the twelve months ended December 31, 2018 and 15 percentage points for the three months ended June 30, 2018.

The loss and expense ratios included above were calculated using whole dollars and may be different than the ratios calculated using the rounded numbers included herein.

⁽¹⁾ The ratio of benefits and other changes in policy reserves to net earned premiums.

⁽²⁾ The ratio of an insurer's general expenses to net earned premiums. In the business, general expenses consist of acquisition and operating expenses, net of deferrals, and amortization of DAC and intangibles.

⁽³⁾ The ratio of an insurer's general expenses to net premiums written. In the business, general expenses consist of acquisition and operating expenses, net of deferrals, and amortization of DAC and intangibles.

⁽⁴⁾ The business currently has structured insurance transactions with three lenders where it is in a secondary loss position. The insurance in-force and risk in-force associated with these arrangements are excluded from these metrics. The risk in-force on these transactions was approximately \$162 million, \$152 million, \$157 million, \$157 million, \$154 million, \$158 million, \$158 million, \$159 million and \$160 million as of December 31, 2019, September 30, 2019, June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018, June 30, 2018 and March 31, 2018, respectively.

The business currently provides 100% coverage on the majority of the loans the company insures. For the purpose of representing the risk in-force, Australia has computed an "effective risk in-force" amount which recognizes that the loss on any particular loan will be reduced by the net proceeds received upon sale of the property. Effective risk in-force has been calculated by applying to insurance in-force a factor that represents the highest expected average per-claim payment for any one underwriting year over the life of the business. This factor was 35% for all periods presented. Australia also has certain risk share arrangements where it provides pro-rata coverage of certain loans rather than 100% coverage. As a result, for loans with these risk share arrangements, the applicable pro-rata coverage amount provided is used when applying the factor.

⁽⁶⁾ Loan amount in loan-to-value ratio calculation includes capitalized premiums, where applicable.

 $\textbf{Primary Insurance}^{(1)}$

Insured loans in-force

⁽¹⁾ The business currently has structured insurance transactions with three lenders where it is in a secondary loss position. The loans in-force, including delinquent loans, and risk in-force associated with these arrangements are excluded from these metrics.

⁽²⁾ Paid claims exclude adjustments for expected recoveries related to loss reserves and prior paid claims.

All amounts presented in Australian dollars.

⁽¹⁾ Paid claims exclude adjustments for expected recoveries related to loss reserves and prior paid claims.

⁽²⁾ The percentages in this table are based on the amount of primary insurance in-force in each loan band as a percentage of total insurance in-force.

The business currently has structured insurance transactions with three lenders where it is in a secondary loss position. The loans in-force associated with these arrangements are excluded from these metrics.

Includes inter-segment eliminations and the results of other businesses that are managed outside the operating segments, including certain smaller international mortgage insurance businesses.

Income (loss) from discontinued operations is considered part of Corporate and Other Activities but is excluded from the above table. For the three and twelve months ended December 31, 2019, income (loss) from discontinued operations on pages 8 and 9 herein included a loss of \$110 million recorded in connection with pending litigation related to the sale of the Canada mortgage insurance business, which was sold on December 12, 2019. Operating results of the Canada mortgage insurance business presented as discontinued operations were as follows:

Yields are based on net investment income as reported under U.S. GAAP and are consistent with how the company measures its investment performance for management purposes. Yields are annualized, for interim periods, and are calculated as net investment income as a percentage of average quarterly asset carrying values except for fixed maturity securities, derivatives and derivative counterparty collateral, which exclude unrealized fair value adjustments and securities lending activity, which is included in other invested assets and is calculated net of the corresponding securities lending liability. See page 44 herein for average invested assets and cash used in the yield calculation.

⁽¹⁾ Investment income for other invested assets includes amortization of terminated cash flow hedges, which have no corresponding book value within the yield calculation.

⁽²⁾ Limited partnership investments are primarily equity-based and do not have fixed returns by period.

Non-GAAP Definition for Operating ROE

The company references the non-GAAP financial measure entitled "operating return on equity" or "operating ROE." The company defines operating ROE as adjusted operating income (loss) divided by average ending Genworth Financial, Inc.'s stockholders' equity, excluding accumulated other comprehensive income (loss) in average ending Genworth Financial, Inc.'s stockholders' equity. Management believes that analysis of operating ROE enhances understanding of the efficiency with which the company deploys its capital. However, operating ROE is not a substitute for net income (loss) available to Genworth Financial, Inc.'s stockholders divided by average ending Genworth Financial, Inc.'s stockholders' equity determined in accordance with U.S. GAAP.

⁽¹⁾ The twelve months ended information is derived by adding the four quarters of net income (loss) available to Genworth Financial, Inc.'s common stockholders and adjusted operating income (loss) from page 9 herein.

Quarterly average Genworth Financial, Inc.'s stockholders' equity, excluding accumulated other comprehensive income, is derived by averaging ending Genworth Financial, Inc.'s stockholders' equity, excluding accumulated other comprehensive income, for the most recent five quarters.

⁽³⁾ Net income (loss) available to Genworth Financial, Inc.'s common stockholders and adjusted operating income (loss) from page 9 herein.

⁽⁴⁾ Quarterly average Genworth Financial, Inc.'s stockholders' equity, excluding accumulated other comprehensive income, is derived by averaging ending Genworth Financial, Inc.'s stockholders' equity, excluding accumulated other comprehensive income.

Non-GAAP Definition for Core Yield

The company references the non-GAAP financial measure entitled "core yield" as a measure of investment yield. The company defines core yield as the investment yield adjusted for items that do not reflect the underlying performance of the investment portfolio. Management believes that analysis of core yield enhances understanding of the investment yield of the company. However, core yield is not a substitute for investment yield determined in accordance with U.S. GAAP.

⁽¹⁾ Represents the incremental assets and investment income related to restricted commercial mortgage loans.

⁽²⁾ Includes cost basis adjustments on structured securities and various other immaterial items.

Corporate Information

Financial Strength Ratings As Of February 3, 2020

Company	Standard & Poor's Financial Services LLC (S&P)	Moody's Investors Service, Inc. (Moody's)	A.M. Best Company, Inc. (A.M. Best)
Genworth Mortgage Insurance Corporation	BB+ (Marginal)	Baa3 (Adequate)	N/A
Genworth Financial Mortgage Insurance Pty Limited (Australia)(1)	A (Strong)	N/A	N/A
Genworth Life Insurance Company	B- (Weak)	B3 (Poor)	C++ (Marginal)
Genworth Life and Annuity Insurance Company	B- (Weak)	B1 (Poor)	B (Fair)
Genworth Life Insurance Company of New York	B- (Weak)	B3 (Poor)	C++ (Marginal)

The S&P, Moody's, A.M. Best, Fitch Rating Service (Fitch) and HR Ratings ratings included are not designed to be, and do not serve as, measures of protection or valuation offered to investors. These financial strength ratings should not be relied on with respect to making an investment in the company's securities.

S&P states that an insurer rated "A" (Strong) has strong financial security characteristics that outweigh any vulnerabilities and is highly likely to have the ability to meet financial commitments. Insurers rated "A" (Strong), "BB" (Marginal) or "B" (Weak) have strong, marginal or weak financial security characteristics, respectively. The "A," "BB" and "B" ranges are the third-, fifth- and sixth-highest of nine financial strength rating ranges assigned by S&P, which range from "AAA" to "R." A plus (+) or minus (-) shows relative standing within a rating category. These suffixes are not added to ratings in the "AAA" category or to ratings below the "CCC" category. Accordingly, the "A," "BB+" and "B-" ratings are the sixth-, eleventh- and sixteenth-highest of S&P's 21 ratings categories.

Moody's states that insurance companies rated "Baa" (Adequate) offer adequate financial security and those rated "B" (Poor) offer questionable financial security. The "Baa" (Adequate) and "B" (Poor) ranges are the fourth- and sixth-highest, respectively, of nine financial strength rating ranges assigned by Moody's, which range from "Aaa" to "C." Numeric modifiers are used to refer to the ranking within the groups, with 1 being the highest and 3 being the lowest. These modifiers are not added to ratings in the "Aaa" category or to ratings below the "Caa" category. Accordingly, the "Baa3," "B1" and "B3" ratings are the tenth-, fourteenth- and sixteenth-highest, respectively, of Moody's 21 ratings categories.

A.M. Best states that its "B" (Fair) rating is assigned to companies that have, in its opinion, a fair ability to meet their ongoing insurance obligations while "C++" (Marginal) is assigned to those companies that have, in its opinion, a marginal ability to meet their ongoing insurance obligations. The "B" (Fair) and "C++" (Marginal) ratings are the seventh- and ninth-highest of 15 ratings assigned by A.M. Best, which range from "A++" to "F."

The Australian mortgage insurance subsidiary also solicits a rating from Fitch. Fitch states that "A" (Strong) rated insurance companies are viewed as possessing strong capacity to meet policyholder and contract obligations. The "A" rating category is the third-highest of nine financial strength rating categories, which range from "AAA" to "C." The symbol (+) or (-) may be appended to a rating to indicate the relative position of a credit within a rating category. These suffixes are not added to ratings in the "AAA" category or to ratings below the "B" category. Accordingly, the "A+" rating is the fifth-highest of Fitch's 21 ratings categories.

The company also solicits a rating from HR Ratings on a local scale for Genworth Seguros de Credito a la Vivienda S.A. de C.V., its Mexican mortgage insurance subsidiary, with a short-term rating of "HR1" and long-term rating of "HR AA." For short-term ratings, HR Ratings states that "HR1" rated companies are viewed as exhibiting high capacity for timely payment of debt obligations in the short-term and maintain low credit risk. The "HR1" short-term rating category is the highest of six short-term rating categories, which range from "HR1" to "HR D." For long-term ratings, HR Ratings states that "HR AA" rated companies are viewed as having high credit quality and offer high safety for timely payment of debt obligations and maintain low credit risk under adverse economic scenarios. The "HR AA" long-term rating is the second-highest of HR Rating's eight long-term rating categories, which range from "HR AAA" to "HR D."

S&P, Moody's, A.M. Best, Fitch and HR Ratings review their ratings periodically and the company cannot assure you that it will maintain the current ratings in the future. These and other agencies may also rate the company or its insurance subsidiaries on a solicited or an unsolicited basis.

⁽¹⁾ Genworth Financial Mortgage Insurance Pty Limited (Australia) is also rated "A+" by Fitch.
