CAUTIONARY STATEMENT

FORWARD-LOOKING STATEMENTS. Statements of future events, conditions, or expectations in this presentation or the subsequent discussion period are forward-looking statements. Similarly, discussions of future carbon capture, biofuels, and hydrogen plans to drive toward net zero are dependent on future market factors, such as continued technological progress and policy support, and represent forward-looking statements. Actual future results, including financial and operating performance; earnings, cash flow, and rates of return; total capital expenditures and mix, including allocations of capital to low carbon solutions; cost reductions and efficiency gains, including the ability to offset inflationary pressures; plans to reduce future emissions and emissions intensity; technology efforts, including timing and outcome of projects to capture and store CO2, produce biofuels and use plastic waste as recycled feedstock; timing and outcome of hydrogen projects; achievement of ambitions to reach Scope 1 and Scope 2 net zero from operated assets by 2050, or Scope 1 and Scope 2 net zero in Upstream Permian operated assets by 2030, the elimination of routine flaring in-line with World Bank Zero routine flaring, or the completion of major asset emission-reduction roadmaps; maintenance and turnaround activity; price and margin recovery; shareholder distributions; the ability to access debt markets; resource recoveries and production rates; and product sales levels and mix could differ materially due to a number of factors including global or regional changes in oil, gas, petrochemicals, or feedstock prices, differentials, or other market or economic conditions affecting the oil, gas, and petrochemical industries and the demand for our products; the impact of trading activities; policy and consumer support for emission-reduction products and technology, the outcome of competitive bidding and project wins; regulatory actions targeting public companies in the oil and gas industry; changes in local, national, or international laws, regulations, and policies affecting our business including with respect to the environment; the development and transportation of our products; taxes, trade sanctions, and actions taken in response to pandemic concerns; the pace of regional and global economic recovery from the pandemic and the occurrence and severity of future outbreaks; the ability to realize efficiencies within and across our business lines and to maintain cost reductions without impairing our competitive positioning; the outcome and timing of exploration and development projects; and decisions to invest in future reserves, reservoir performance, including variability in unconventional projects; timely completion of construction projects; war and other security disturbances; actions of consumers and changes in consumer preferences; opportunities for and regulatory approval of investments or divestments that may arise; the outcome of our or our competitors’ research efforts and the ability to bring new technology to commercial scale on a cost-competitive basis; the development and competitiveness of alternative energy and emission reduction technologies; unforeseen technical or operating difficulties including the need for unplanned maintenance; and other factors discussed here and in Item 1A.
