

Company Overview

Monopar Therapeutics is a clinical-stage biopharmaceutical company focused on developing innovative treatments for cancer patients. Monopar is building a drug development pipeline through the licensing and acquisition of oncology therapeutics in late preclinical and clinical development stages, leveraging its scientific and clinical expertise to help reduce the risk and accelerate the clinical development of its drug product candidates. Monopar currently has three compounds in development: Phase 1b-stage camsirubicin for the treatment of advanced soft tissue sarcoma; Phase 1-stage MNPR-101 for radiopharmaceutical use in advanced cancers; and an early-stage camsirubicin analog, MNPR-202, for various cancers.
