- [Provided](#) Comasco with an IoT solution for real-time tracing and inventory management of their rented crane parts.

Management Commentary

“The measurable pickup we experienced in new sales activity across our geographic regions was a key driver of the robust revenue growth we generated in the second quarter,” said Chris Wolfe, PowerFleet CEO. “The acceleration we are seeing across our end markets drove a 16% sequential increase and 30% year-over-year increase in total revenue, while our focus on building predictable revenue streams produced an 11% year-over-year increase in high margin, recurring and services revenue. Our financial performance also demonstrates the leverage in our business model, reflected by our expanding profitability metrics. Overall, our second quarter results reveal the continued execution of our long-term strategy to increase high margin recurring and services revenue by expanding our high-

value solutions offerings and growing our business in our targeted markets.

“PowerFleet’s improving financial performance is a direct result of the building sales activity we’ve been seeing across our key geographic regions, which is also validated by our robust backlog and opportunity pipeline. Domestically, we secured several new wins and follow-on orders in the quarter, including adding a major North American moving company and White Oak as new customers as well as signing a major 3,000-unit follow-on order with a customer who we announced last year. Internationally, our sales momentum and customer traction were equally as robust. Our Israeli operations achieved two major milestones in Q2, including surpassing 200,000 monthly subscribers and installing 6,400 units in the month of June, which is the highest monthly installation count since the company’s inception.

“As our financial and operational performance indicate, we have entered the second half of 2021 with encouraging momentum, giving us confidence in our growth prospects. We are making meaningful progress on our financial goals and toward realizing our vision to be the leading solutions provider in the massive industrial IoT solutions space.”

Second Quarter 2021 Financial Results

Non-GAAP Financial Measures

To supplement its financial statements presented in accordance with Generally Accepted Accounting Principles (GAAP), PowerFleet provides certain non-GAAP measures of financial performance. These non-GAAP measures include non-GAAP net income (loss), non-GAAP net income (loss) per basic and diluted share and adjusted EBITDA. Reference to these non-GAAP measures should be considered in addition to results prepared under current accounting standards, but are not a substitute for, or superior to, GAAP results. These non-GAAP measures are provided to enhance investors’ overall understanding of PowerFleet’s current financial performance. Specifically, PowerFleet believes the non-GAAP measures provide useful information to both management and investors by excluding certain expenses, gains and losses that may not be indicative of its core operating results and business outlook. Adjusted EBITDA is not a measure of financial performance or liquidity under GAAP and, accordingly, should not be considered as an alternate to net income or cash flow from operating activities as an indicator of operating performance or liquidity. Because PowerFleet’s method for calculating the non-GAAP measures may differ from other companies’ methods, the non-GAAP measures may not be comparable to similarly titled measures reported by other companies. Reconciliation of all non-GAAP measures included in this press release to the nearest GAAP measures can be found in the financial tables included in this press release.
