# USANA Unveils New, Comprehensive Bone-Health Supplement

**Combines magnesium, calcium and vitamin D for full body support**

SALT LAKE CITY, March 27, 2017 /PRNewswire/ -- USANA (NYSE: USNA) remains at the forefront of health and nutrition, creating supplements to improve the health and wellness of its customers. Its newest product — **MagneCal D™** — is an all-encompassing bone-health supplement that combines optimal amounts of magnesium, calcium and vitamin D to help individuals maintain a strong, healthy body.\*

"We found people were consuming plenty of calcium, but were getting less than the recommended amounts of magnesium and vitamin D. This gave us the unique opportunity to formulate a supplement to help balance out the body's levels," says USANA's chief scientific officer, Dr. Robert Sinnott. "Through the direction of USANA's founder Dr. Myron Wentz, we calculated the perfect ratio of calcium to magnesium that you'll find in the new MagneCal D supplement."

USANA's MagneCal D supplement contains a healthy 1:1 ratio of magnesium and calcium as well as advanced levels of vitamin D. MagneCal D helps restore a better balance of these nutrients in the body and supports your health better than products with low to no magnesium or vitamin D.\* MagneCal D was designed to work seamlessly as a core optimizer for USANA's flagship triple-action cellular nutrition system — **CellSentials™**.

"We typically do not get enough magnesium in our diets alone, which creates an unbalanced ratio of calcium to magnesium in our bodies," says USANA's executive director of global

research and development, Dr. John Cuomo. "We're excited to give consumers a healthy combination of calcium, magnesium and vitamin D to not only maintain strong, healthy bones and teeth, but also support cardiovascular and metabolic health."\*
